# 1. Precautions

---

## 1-1. Precautions for the Service

---

- **Use the correct parts when changing the electric parts.**
  - Please check the labels and notices for the model name, proper voltage, and proper current for the electric parts.
- **Fully repair the connection for the types of harness when repairing the product after breakdown.**
  - A faulty connection can cause irregular noise and problems.
- **When disassembling or assembling, make sure that the product is laid down on a work cloth.**
  - Doing so will prevent scratching to the exterior of the rear side of the product.
- **Completely remove dust or foreign substances on the housing, connection, and inspection parts when performing repairs.**
  - This can prevent fire hazards for tracking, short, etc.
- **Please tighten the service valve of the outdoor unit and the valve cap of the charging valve as securely as possible by using a monkey spanner.**
- **Check whether the parts are properly and securely assembled after performing repairs.**
  - These parts should be in the same condition as before the repair.

## 1-2. Precautions for the Static Electricity and PL

---

- **Please carefully handle the PCB power terminal during repair and measurement when it is turned on since it is vulnerable to static electricity.**
  - Please wear insulation gloves before performing PCB repair and measurement.
- **Check if the place of installation is at least 2m away from electronic appliances such as TV, video players, and stereos.**
  - This can cause irregular noise or degrade the picture quality.
- **Please make sure the customer does not directly repair the product.**
  - Arbitrary dismantling may result in electric shock or fire.

## 1-3. Precautions for the Safety

---

- **Do not pull or touch the power plug or the subsidiary power switch with wet hands.**
  - This may result in electric shock or fire.
- **If the power line or the power plug is damaged, then it must be changed since this is a hazard.**
- **Do not bend the wire too much or position it so that it can be damaged by a heavy object on top.**
  - This may result in electric shock or fire.
- **The use of multiple electric outlets should be prohibited.**
  - This may result in electric shock or fire.
- **Ground the connection if it is necessary.**
  - The connection must be grounded if there is any risk of electrical short due to water or moisture.
- **Unplug the power or turn off the subsidiary power switch when changing or repairing electrical parts.**
  - Doing so will prevent electric shock.
- **Explain to workers that the battery for the remote control needs to be separated for storage purposes when the product will not be used for a long time.**
  - This can cause a problem for the remote control since battery fluid may trickle out.

## 1-4. Precautions for Handling Refrigerant for Air Conditioner

---

### Environmental Cautions: Air pollution due to gas release

- **Safety Cautions**

If liquid gas is released, then body parts that come into contact with it may experience frostbite/blister/numbness.

If a large amount of gas is released, then suffocation may occur due to lack of oxygen. If the released gas is heated, then noxious gas may be produced by combustion.

- **Container Handling Cautions**

Do not subject container to physical shock or overheating. (Flowage is possible while moving within the regulated pressure.)

## 1-5. Precautions for Welding the Air Conditioner Pipe

---

- **Dangerous or flammable objects around the pipe must be removed before the welding.**

- **If the refrigerant is kept inside the product or the pipe, then remove the refrigerant prior to welding.**

If the welding is carried out while the refrigerant is kept inside, the welding cannot be properly performed. This will also produce noxious gas that is a health hazard. This leakage will also explode with the refrigerant and oil due to an increase in the refrigerant pressure, posing a danger to workers.

- **Please remove the oxide produced inside the pipe during the welding with nitrogen gas.**

Using another gas may cause harm to the product or others.

## 1-6. Precautions for Additional Supplement of Air Conditioner Refrigerant

---

- **Precisely calculate the refrigerant by using a scale and S-net, and proceed with the test operation.**

Excessive supplement can cause harm to the product since it can cause an inflow of the liquid refrigerant into the compressor.

- **Do not heat the refrigerant container for a forced injection.**

This may cause harm to the product or others since the refrigerant container may burst.

- **Do not operate the product after removing the product safety pressure switch and sensor.**

If the product is blocked inside, then this may cause harm to the product or others due to the excess pressure increase of the refrigerant gas.

## 1-7. Other Precautions

---

- **There should be no leakage of the pipes after installation. When withdrawing the refrigerant, the compressor should be stopped before removing the connecting pipe.**

**If the compressor is operating while the refrigerant pipe is not correctly connected and the service valve is opened, then air and other substances can enter the pipe. The interior of the refrigerant cycle may then build up excessive high pressure resulting in explosion and damage.**

- **If the Wall Mounted type(Wind free) indoor unit is included in the installation combination, please contact us before changing the Capacity correction for heating function to 33kg/cm2g during Outdoor unit key function setting.**

## 2. Product Specifications

### 2-1. CAC Single

#### ■ Stabilize the atmosphere with broad temperature allowance and control

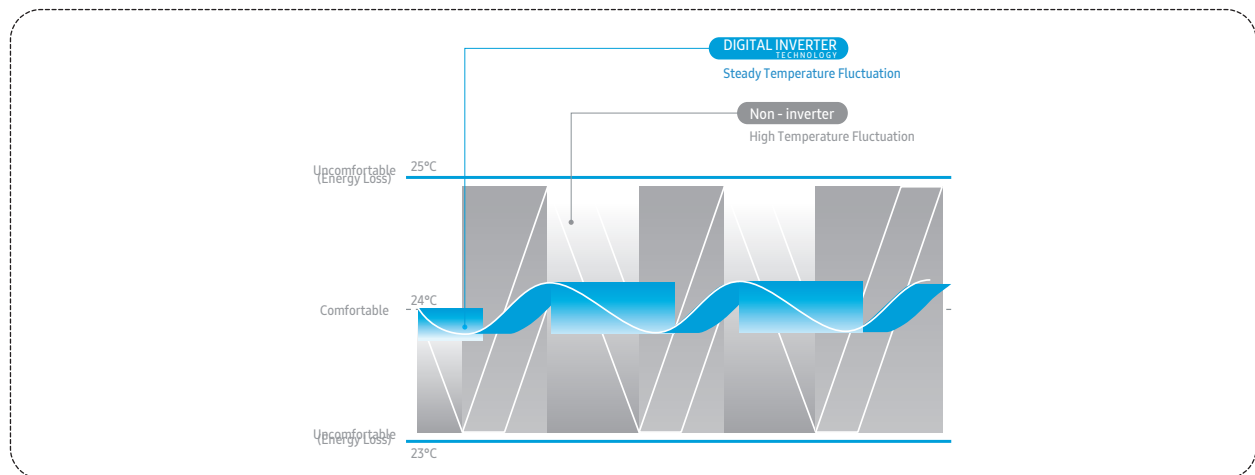

Samsung is dedicated to supporting comfortable living and working environments based on the strength of its technologies. With a single unit, CAC Single delivers reliable comfort and control over multiple areas to ensure a pleasant atmosphere in any climate.

#### ■ Wide temperature performance

No matter how extreme the temperature, the highperforming CAC Single can handle the condition without the need for an additional unit. Featuring a wide temperature allowance, it can cool in heat of up to 50 and provide warmth in the freezing cold of -20°C to ensure a constant and comfortable home environment.

#### ■ Ideal comfort in minutes

The CAC Single digital inverter air conditioner works at maximum capacity at startup. As soon as the temperature reaches the desired or set temperature, CAC Single performs fine adjustments to cope with any changes. This means less temperature fluctuation and ideal comfort in a matter of minutes.

#### ■ Versatile piping installation

CAC Single outdoor units offer a selection of pipe directions. The internal pipe connection ports allow four different pipe directions, supporting a neater, more organized-looking unit upon installation.

## 2-2. The Feature of Product

### 2-2-1. Features (Wind-Free 1Way CST)

#### ■ Wind-Free cooling

Comfort wind implementation by Wind-Free cooling.

※ Wind-Free implementation : Still air by the velocity of flow below 0.15m/s.

#### ■ Big blade

Max. 8m Horizontal reach

※ Blade enlargement about 47% compare to conventional product

※ Reach : 8m (Height 0.6m, Wind speed 0.3m/s) Conventional product (Samsung) : 5m

※ Based on Wind-Free 1Way 7.1kW

#### ■ Even cooling

Even cooling For spacious space

※ Expand the blade angle from 30° to 80°

Conventional product (Samsung) : 40~80°

## 2-3. The Feature of Product

### 2-3-1. Features (Wind-Free 4Way CST)

#### ■ Wind-Free Cooling with Micro holes

The Wind Free Air conditioner pushes air out through 15,000 micro holes in the panel, producing a dispersed and gentle flow of air actually defined as “still air” and the key here is all of those holes create a still, cooled air flow that infiltrates the room gently and softly.

No Direct Wind & Cold Draft

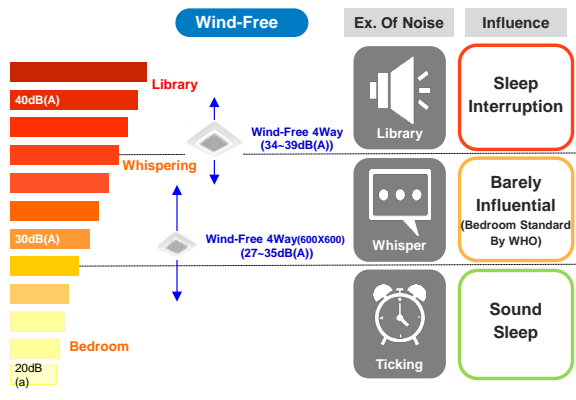

[ Comparison of Room Temp.]

#### ■ Wind-Free Cooling with Micro holes

Quiet Operation

“Extremely quiet with Wind-Free Operation”  
⇒ Suitable for office, school, library.....

Cost, Energy Saver

“Energy Saving with Wind-Free Operation”

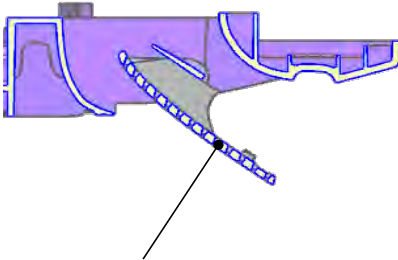

## Features (Wind-Free 4Way CST) (cont.)

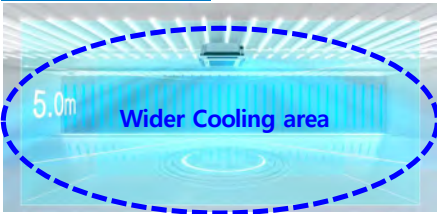

- **Big Blade, Long Wind**  
Big and optimized blades enable wider cooling range.

**Wider Cooling Range**

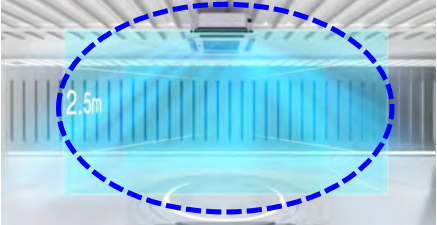

81mm Big Blade (26% ↑)  
Optimized Blade Shape

**Wind-Free 4Way**

5.0m  
Wider Cooling area

**Conventional 4Way**

2.5m

- **Smart Comfort Operation**  
Smart comfort operation enable to maintain optimal room condition automatically by detecting not only temperature but also relative humidity.

**Automatic Wind-Free Operation**

If room reaches comfort zone

If room get out of comfort zone

**Normal Cooling**

**Wind-Free Cooling**

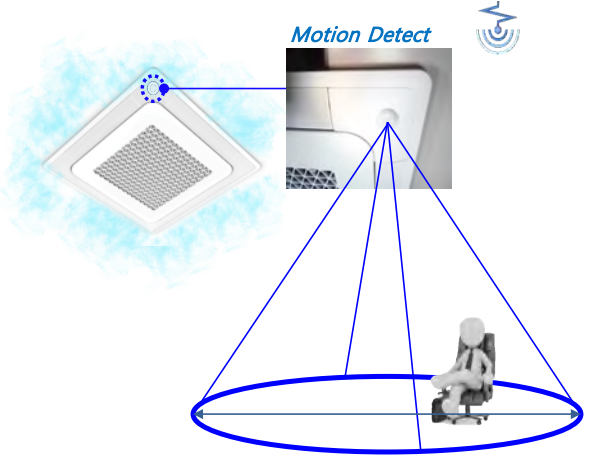

**Normal Cooling**

## Features (Wind-Free 4Way CST) (cont.)

### ■ New MDS operation (Option)

New designed Motion Detect enable customized air direction and efficient operation by detecting the location of people.

### Automatic MDS Operation (Option)

Motion Detect

※ MDS : Motion Detect Sensor

Conventional Saving 35%

### ■ World's Lightest Weight

## Advanced Features

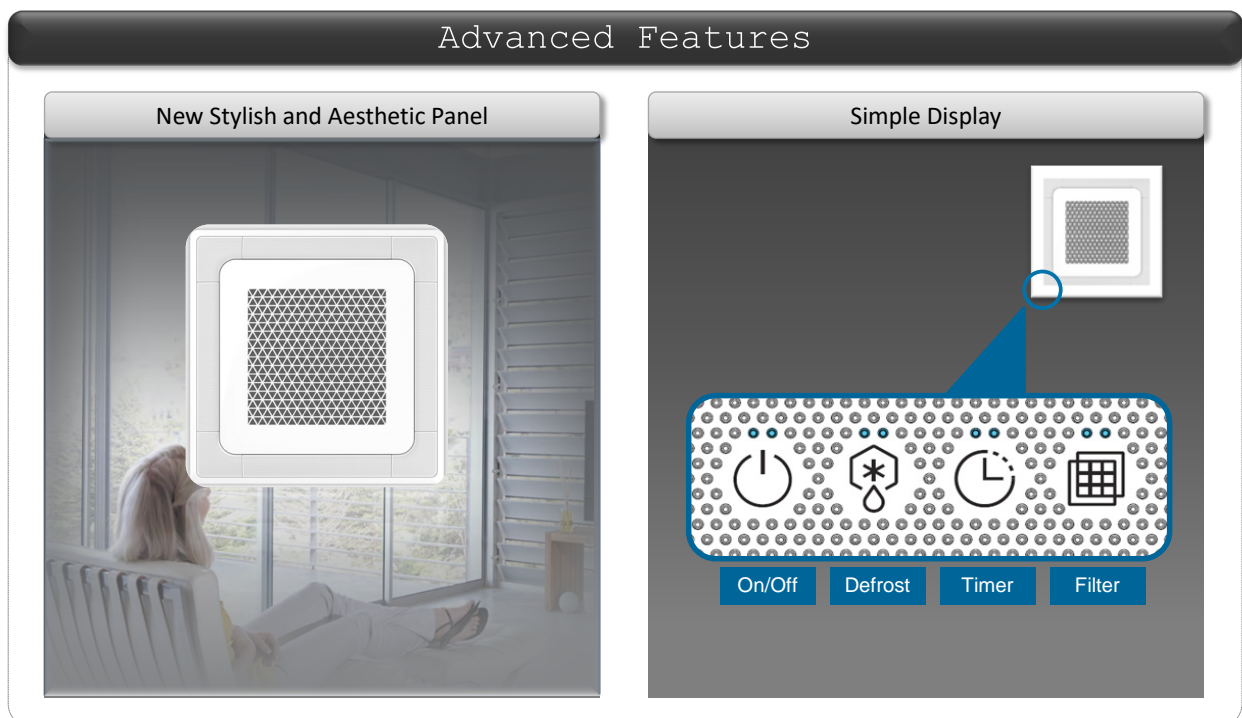

## Features (Wind-Free 4Way CST) (cont.)

### ■ Easy Installation in 4 Different Ways

Freely install anywhere without worrying about direction. (Body and Panel as well)

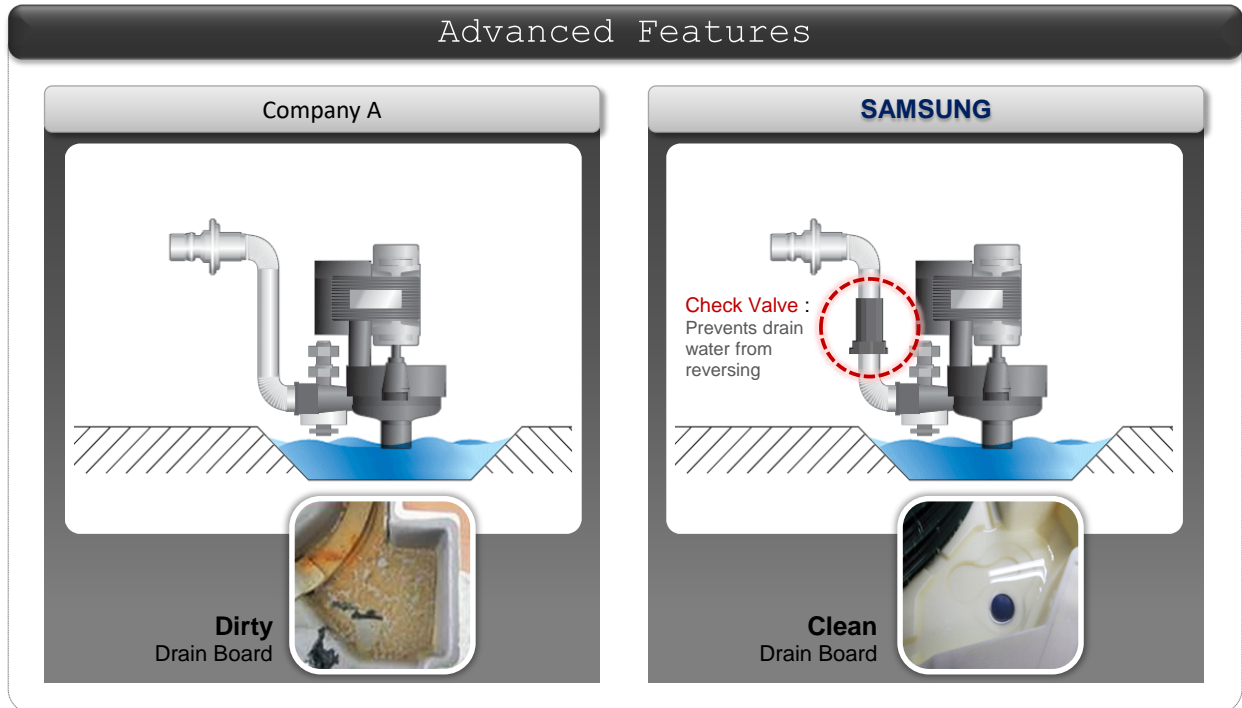

### ■ New Improved Design

## Features (Wind-Free 4Way CST) (cont.)

### ■ ENo Back Flowing Drain Water

Check Valve on the drain pump prevents drain water from reversing  
→ Minimize water gathering in Drain Board to prevent rusting

### ■ Easy Maintenance

Easy Air Flow Blade Cleaning

## 2-4. Features & Benefits

---

### 2-4-1. 4Way Cassette (600 x 600)

#### ■ Add chic flair to your interior design with a stylish yet powerful AC system

Samsung's advanced 4Way Cassette (600 x 600) builds on the aesthetic appeal and performance of the standard 4Way Cassette with an enhanced design. The 4Way Cassette (600 x 600) comes in a variety of patterns to complement any interior. The stylish cassette unit visually harmonizes with the indoor space, while efficient cooling and heating performance make it a dependable and practical air conditioning solution. The 4Way Cassette (600 x 600) indoor air conditioning system provides high-performance heating and cooling in an elegant design with features such as:

- **Tasteful design and compact, lightweight build.**  
Create a polished ambiance with a discreetly sized design and a choice of attractive panel patterns.
- **Enhanced comfort control.**  
Optimize comfort and save energy with optional motion detection.
- **Low maintenance and powerful airflow.**  
Ease installation and maintenance and maximize airflow with an efficient design and robust performance.

### 2-4-2. 4Way Cassette (600 x 600) - Tasteful design, Compact, Lightweight build

#### ■ Refine the interior with an elegant, compact design

The enhanced Samsung 4Way Cassette (600 x 600) indoor air conditioner features a selection of simple panel patterns to blend seamlessly into any interior design. Its uniquely lightweight frame blends effortlessly and beautifully into any décor, while clever blade construction keeps the unit clean for a tidy appearance.

#### ■ Attractive panel and display

The 4Way Cassette (600 x 600) features a fashionable panel with a simple, beveled corner design. The rounded panel frame promotes a neat, tidy look for an aesthetic flair that blends perfectly with any ambience.

Waffle Pattern

Classic Pattern

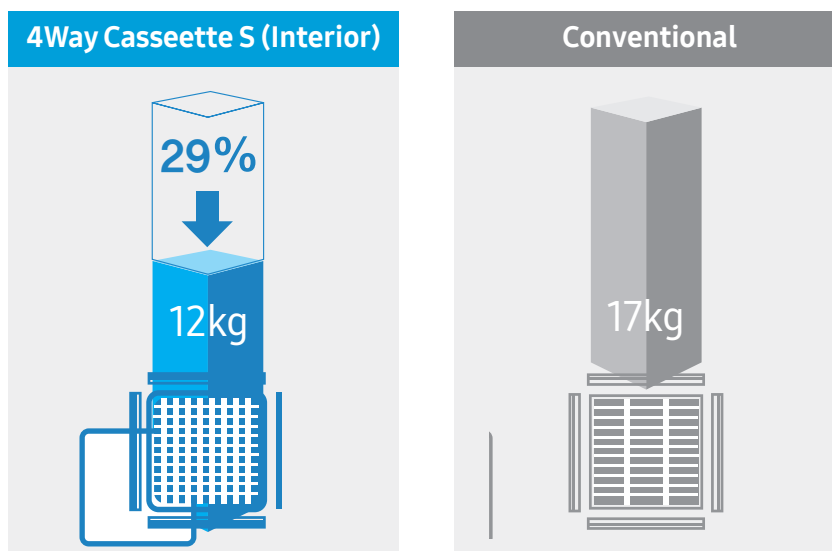

■ **Ultra-compact size**

Samsung's 4Way Cassette (600 x 600) air conditioner can be installed on a single standard ceiling tile (600W x 600D) which helps minimize installation time and effort.

■ **Light, robust design**

The Samsung 4Way Cassette (600 x 600) indoor unit is now lighter in weight at 11kg. It is the lightest indoor unit in the industry, about 35 percent lighter than our conventional products.

### 2-4-3. 360 Cassette

#### ■ All round cooling and comfort

The Samsung 360 Cassette air conditioner offers a brand new way of staying comfortably cool in every corner of the room. Its innovative circular design not only means it perfectly fits in everywhere, adding a sophisticated look to many different sites, but it also blows cool air in all directions, so that the whole room is the same temperature\*. And its bladeless outlet ensures that cool air is gently dispersed, without creating a cold draft\*\*, and doesn't block the air flow, even at low angles, so it expels 25% more air\* and spreads it farther.

#### ■ EVENLY CIRCULATES & COOLS EVERY CORNER

Unlike 4-way, cassette type air conditioners that create areas of uneven airflow where cool air can't reach\*, a circular outlet blows cool air in all directions, so every corner of a room is the same temperature\*\*.

\* Samsung testing compared to a general 4 way cassette type air conditioner.

\*\* Within an 9.3m radius the temperature difference is less than 0.6°C.

\* Within an 9.3m radius the temperature difference is less than 0.6°C.

#### ■ Comfortably cool, not cold

A bladeless design softly disperses cool air across the room, making you comfortably cool without feeling a cold draft\*\*. With no blades to block the air flow, it also expels 25% more air\* and spreads it farther.

\* Within a 5m radius, no cold draft between 0~1.5m in height (with 14.0kw).

■ **Circular to perfectly fit in everywhere**

Its innovative circular design can match a multitude of interior designs, so it perfectly fits in everywhere. Its minimalist modern styling creates a sophisticated look and its circular shape stands out beautifully.

■ **Spreads more air in more ways**

An innovative Booster Fan enables cool air to be expelled at much lower angles. It creates a low pressure area around the outlet, so that cool air comes out parallel to the ceiling and disperses across a wider area.

■ **All round simpler & intuitive control**

Intuitively control its performance and see where the air is going. The Wireless Remote Controller's\* Jog shuttle and button offer a fun way to adjust the air flow and a Circular LED Display shows its direction.

## 2-4-4. Duct S

### ■ Overview

Samsung Ducted Type air conditioning units are a smart solution for low-maintenance, consistent cooling and heating performance in any environment. Their compact, slim frame blends seamlessly into ceilings, enhancing the beauty of the interior space and affording users more flexible installation options. Offering a comprehensive lineup, Samsung Ducted Type air conditioning units offer just the right solution for every need—from the office or shop to the restaurant kitchen.

### ■ Experience performance and convenient comfort for any weather condition

Samsung Duct S delivers unparalleled cooling and heating and flexible management with customizable comfort settings in any climate—all year round. Plus, it boasts a slim, compact size and multiple access points for easy setup exactly where needed.

### ■ Smart pressure control

Samsung Ducted Type units feature a smart pressure control system. This system adjusts the fan speed based on the external static pressure (ESP), delivering consistent cooling and heating power, regardless of the surrounding environment.

### ■ Convenient installation

The optional lift-up drain pump lifts condensed water up to 750 mm, compared to a limit of 700 mm on conventional models, for flexible and convenient installation.

The Duct S indoor air conditioning unit delivers smooth, consistent operation and convenience with features such as:

- Efficient operation. Stage the desired atmosphere with energy-efficient performance and customized airflow.
- Smart management. Cool spaces efficiently and manage the air conditioning unit even while away, with features designed for efficiency and control.
- Easy, flexible setup. Install and maintain even multiple units with a compact and easily accessible design.

## 2-4-5. Wall Mount Type

### ■ Breathe easily with wall-mounted systems designed for all-day freshness

Samsung Wall Mount Type air conditioners have been designed from the ground up to be exceptionally efficient. With their stylish, innovative designs, these wall-mounted air conditioners optimize comfort with cool, clean, healthy freshness for everyday living.

### ■ Improved blade operation

Samsung's wide twin blade can open up to 90° for more effective cooling. The longer twin blade ensures that air reaches every corner of the room with greater control.

### ■ Superior dust filtration

A Full High Density (HD) filter creates cleaner air through enhanced filtration, reducing microscopic dust particles by up to 90 percent.

### ■ Cleaner, healthier air

Virus Doctor eliminates the harmful substances and viruses breeding in the atmosphere of living spaces, thus providing the highest level of indoor air quality. This smart solution creates a purified zone, eliminating the hazards of airborne allergens and controlling the active oxygen that contributes to disease, cancer and accelerated aging.

### ■ Good's sleep

Samsung's Wall Mount Type units feature Good's sleep mode for a comfortable bedroom climate perfectly tempered for a restful night. With automatic temperature and moisture adjustment, all three vital stages of sleep are protected from humidity and heat so users wake up fully rested and refreshed.

## 2-4-6. Wall Mounted Wind Free - Wind Free, Auto Clean

### ■ Wind-Free™ Cooling

With Wind-Free™ Cooling mode, cool air is gently dispersed across the room through 23,000 micro air holes. It creates a 'still Air' environment with a very low air speed of just 0.15m/s and no temperature fluctuation – so there are no annoying cold draft and you don't feel too cold, just pleasant comfort.

### ■ Auto Clean

Keep the inside of your air conditioner hygienic without much effort at all! After it's been working, the Auto Clean function automatically dries the Heat Exchanger using a 3-step process. It removes moisture by blowing air for between 10 to 30 min. So it prevents the build-up of bacteria and odors.

\*Only available in Wind-Free™ models that have a humidity sensor.

(Watch out for the damate of hooks)</p> <p>3) Remove the HOLDER PIPE.</p> <p>4) Unfasten a screw of the Fan Moter side. (Use (+) Screw Driver.)</p> <p>5) Unfasten 2 screws of the opposite side of the Fan Moter. (Use (+) Screw Driver.)</p>	

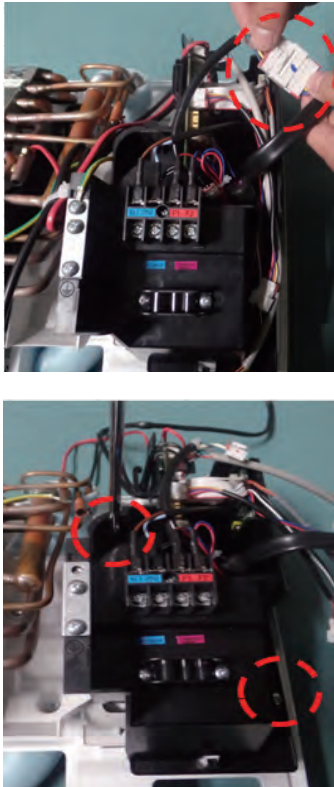

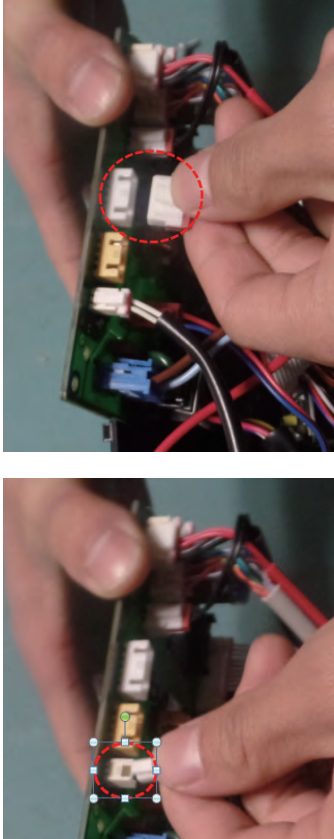

No	Parts	Procedure	Remark
4	EVAPORATOR	<p>6) Pull up the EVAPORATOR of the opposite side of the Fan Moter.</p> <p>7) loosen a hook of the Fan Moter side.</p> <p>8) Pull up the EVAPORATOR toward to you.</p>	

No	Parts	Procedure	Remark
5	FAN MOTOR & CROSS FAN	<p>1) Unfasten a screw on the COVER MOTER. (Use (+) Screw Driver.)</p> <p>2) Unwind the Moter Wire.</p> <p>3) Detach the COVER MOTER.</p> <p>4) Unfasten a screw of the CROSS FAN a little. (Use (+) Screw Driver.)</p> <p>5) Raise up the CROSS FAN of the left side and pull out from the Moter.</p>	

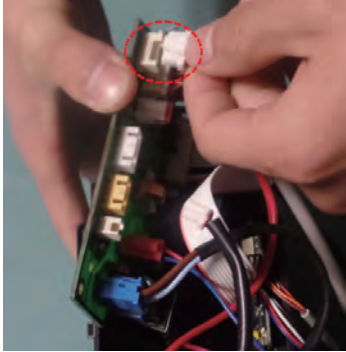

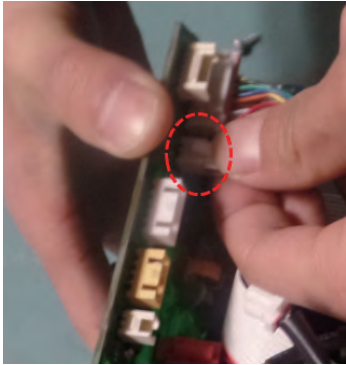

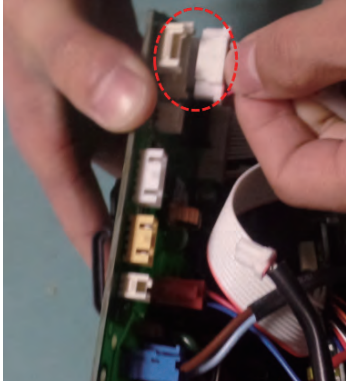

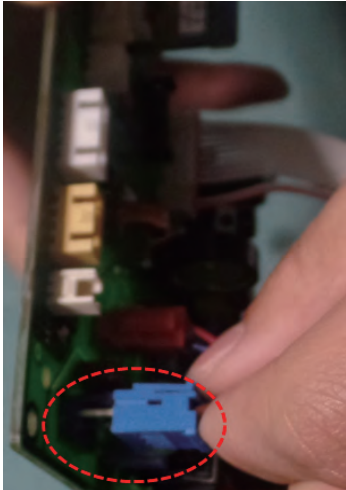

■ RAC(MAX) : AC\*\*\*BNTDCH

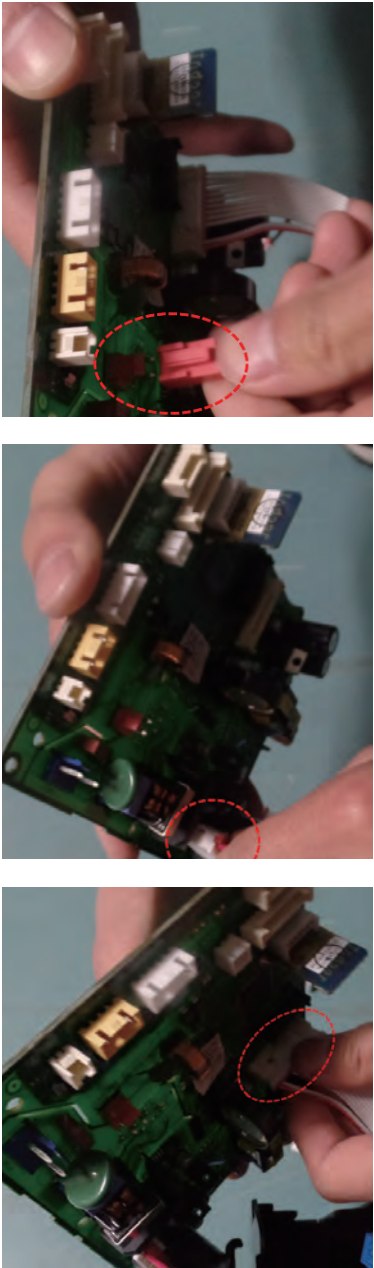

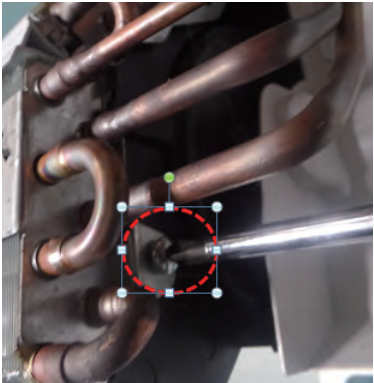

No	Parts	Procedure	Remark
1	Panel-Front	<p>1) Stop the driving of air conditioner and shut off main power supply.</p> <p>2) Open the FRONT-GRILLE and pull out from the PANEL-FRONT.</p> <p>3) Detach COVER-TERMINAL from the PANEL FRONT. (use + Screw Driver)</p> <p>4) Loosen connector wire(white) and detach the temperature sensor wire.</p> <p>5) To detach the FRONT-PANELthe main frame, unfasten 2 screw at the bottom. (use + Screw Driver )</p> <p>6) Take off the FRONT-PANEL,lifting up the bottom</p>	

No	Parts	Procedure	Remark
2	TRAY DRAIN	<p>1) Loosen stepping motor wire and detach the hook of main frame.</p> <p>2) To detach TRAY-DRAIN from the main frame, pull the bottom of the TRAY-DRAIN towards you.</p> <p>3) To detach TRAY-DRAIN from the main frame, pull the bottom of the TRAY-DRAIN towards you.</p>	
.3	CONTROL IN	<p>1) Unfasten the earth screw. (use + ScrewDriver)</p> <p>2) Detach the temperature sensor and Humidity sensor.</p> <p>3) Detach the temperature sensor.</p>	

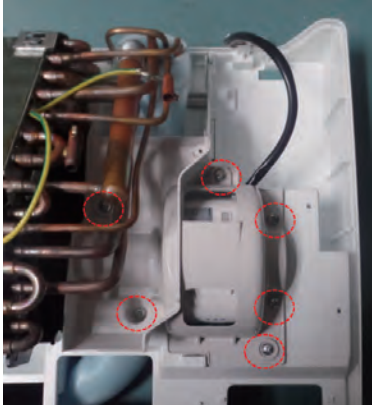

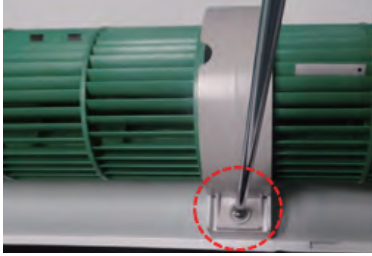

No	Parts	Procedure	Remark
		<p>4) Loosen MOTOR wires(white).</p> <p>5) Take off the CASE-CONTROL from the main frame. (use + Screw Driver)</p>	
4	PBA	<p>1) Loosen the STEP UP/DOWN connector (CN802).</p> <p><b>⚠ Caution</b> When you separate the connector, pull pressing the locking button.</p> <p>2) Loosen the FUSE CHK connector (CN140).</p> <p><b>⚠ Caution</b> When you separate the connector, pull pressing the locking button.</p>	

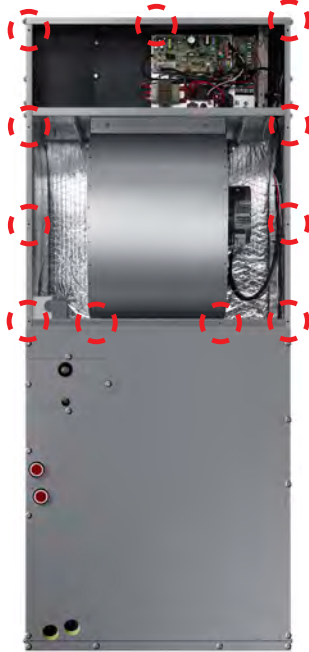

No	Parts	Procedure	Remark
		<p>3) Loosen the EVA IN/OUT connector. (CN403)</p> <p><b>⚠ Caution</b> When you separate the connector, pull pressing the locking button.</p>	
		<p>4) Loosen the Humidity sensor connector (CN401). → Option connector.</p> <p><b>⚠ Caution</b> The terminal is locking type. So, when you separate terminals, pull pressing the button.</p>	
		<p>5) Loosen the DISPLAY connector. (CN501).</p> <p><b>⚠ Caution</b> The terminal is locking type. So, when you separate terminals, pull pressing the button.</p>	
		<p>6) Loosen the POWER connector.</p> <p><b>⚠ Caution</b> When you separate the connector, pull pressing the locking button.</p>	

No	Parts	Procedure	Remark
		<p>7) Loosen the COMM wire connector (CN303).</p> <p><b>⚠ Caution</b> When you take off the PBA, don't touch the components. Please hold the PBA both side.</p> <p>8) Loosen the Motor connector(CN701).</p> <p><b>⚠ Caution</b> When you separate the connector, pull pressing the locking button.</p> <p>9) Take off the main PBA from the ASS'Y Control in.</p> <p><b>⚠ Caution</b> When you take off the PBA, don't touch the components. Please hold the PBA both side.</p>	
5	EVAPORATOR	<p>1) Unfasten the screw at the right side. (use + ScrewDriver)</p>	

No	Parts	Procedure	Remark
		2) Unfasten the screw at the left side. (use + ScrewDriver)	
		3) Detach the HOLDER PIPE. (use + Screw Driver)	
		4) Detach the BRACKET-EVAP. (use + Screw Driver)	
		5) Detach the HOLDER EVAP. (use + Screw Driver)	
		6) Loosen 1 fixing earth screw right side. (use + Screw Driver)	

No	Parts	Procedure	Remark
6	FAN MOTOR & CROSS FAN	<p>1) Loosen 6 fixing screws of HOLDER-MOTOR</p> <p>2) unfasten the screw a little. (use + Screw Driver)</p> <p>3) unfasten the screw a little and pull the MOTOR FAN to the right side. (use + Screw Driver)</p> <p>4) Loosen 1 fixing screws of HOLDER-FAN. (use + Screw Driver)</p> <p>5) unfasten the screw a little. (use + Screw Driver)</p>	    

■ MPAH : AC\*\*\*BNZDCH, AC\*\*\*KNZDCH

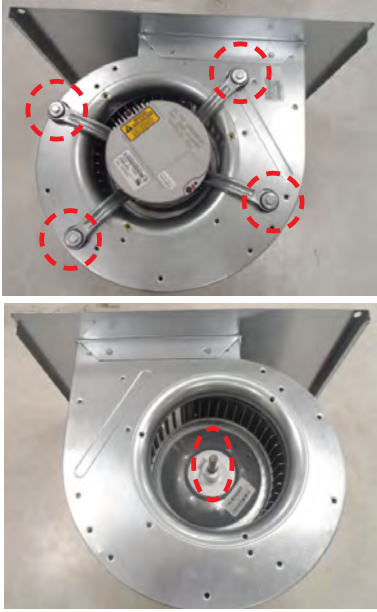

No	Parts	Procedure	Remark
1	FRONT VIEW	1) Stop the operation of the air conditioner and disconnect the main power supply.	
2	Control-BOX	1) Loosen 11 of the front screw(CCW) and detach the Cabinet Front Up.  2) Disconnect the Connector Wire that is connected to the indoor unit's PBA  3) Unscrew the 1 fixed screws on middle of the PBA and 4 fixed PBA HOLDER, and disassemble the PBA from the indoor unit. (Use + Screw Driver)	 

No	Parts	Procedure	Remark
3	DRAIN PAN	<p>1) Loosen 11 of the front screw(CCW) and detach the Cabinet Front Down.</p> <p>2) Loosen 2 of the Left side screw(CCW).</p> <p>3) Loosen 5 of the front screw(CCW) and detach the 2 Bracket drain and 1 Bracket Low</p> <p>4) Pull the Heat Exchanger and Drain.</p> <p>5) Detach the Drain from indoor Unit.</p>	

No	Parts	Procedure	Remark
4	Heat Exchanger	<p>1) Loosen 11 of the front screw(CCW) and detach the Cabinet Front Down.</p> <p>2) Loosen 2 of the Left side screw(CCW).</p> <p>3) Loosen 5 of the front screw(CCW) and detach the 2 Bracket drain and 1 Bracket Low.</p> <p>4) Disconnect the Connector Wire that is connected to the Heat Exchanger.</p> <p>5) Pull the Heat Exchanger and Drain.</p> <p>6) Detach the Heat Exchanger.</p>	

No	Parts	Procedure	Remark
5	FAN & MOTOR (Continues)	<p>1) Loosen 11 of the front screw(CCW) and detach the Cabinet Front Down.</p> <p>2) Loosen 6 of the Front screw(CCW) and detach the Bracket.</p> <p>3) Disconnect the Connector Wire that is connected to the Motor.</p> <p>4) Pull the A'ssy Fan Blower.</p>	   

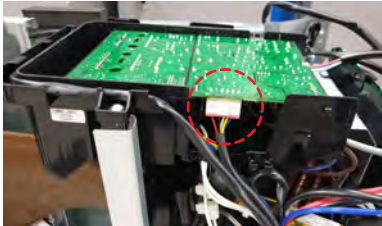

No	Parts	Procedure	Remark
5	FAN & MOTOR	6) Loosen 4 of the screw and 1 nut on the CASE and Detach the motor and fan.	

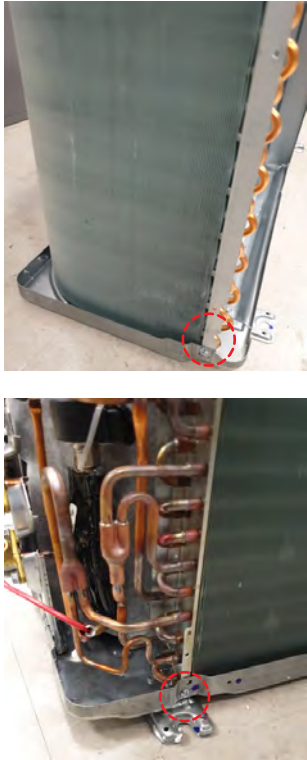

### 3-2. Outdoor unit

■ AC009/012BXADCH

No.	Parts	Procedure	Remark
1	Common work	1) Loosen each screws and detach the cabi Top cover.	
		2) Loosen screws of the cabi front and detach it.	 
		3) Remove the 4 Cond Bar from the holder of outdoor unit cabinet. * This process is supported by heating models only	

No.	Parts	Procedure	Remark
1	Common work	4) Loosen screws from the Cabi Front Lh and detach it.	
		5) Loosen screws from the Cabi Side Rh and detach it.	 
2	Fan & Motor	1) Detach the Nut Flange like the picture on the right side. (Turn clockwise because the screw is left-handed.) (Use Monkey Spanner.)	

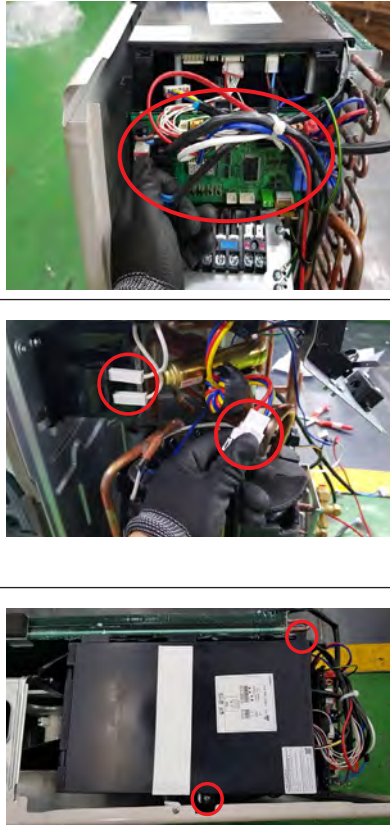

No.	Parts	Procedure	Remark
2	Fan & Motor	2) Detach the Fan Propeller. 3) Loosen 4 fixing screws to detach the Motor. (Use Monkey Spanner.)	
		4) Disconnect the wire between Ass'y Control Out and Motor.	
		5) Loosen fixing bolts and detach the Bracket Motor	
3	Base Heater	1) Loosen fixing screw and deattach the Base Heater	
4	Assy Control Out	1) To remove the Cover control box : Pull the motor wire to allow sufficient space as shown on the right side and then remove the screw.	

No.	Parts	Procedure	Remark
4	Assy Control Out	2) Detach several connectors from the Assy Control Out. 3) Detach several connectors from the PCB of Assy Control Out.	
		1) Release the refrigerant at first. 2) Loosen screw on both sides. 3) Disassemble the pipes in both inlet and outlet with welding torch. 4) Detach the Heat Exchanger.	

No.	Parts	Procedure	Remark
5	Compressor	1) Loosen the nut and detach the Compressor Lead Wire. (Use Monkey Spanner.)	
		2) Loosen the bolts at the bottom of Compressor like the picture on the right side. (Use Monkey Spanner.)	

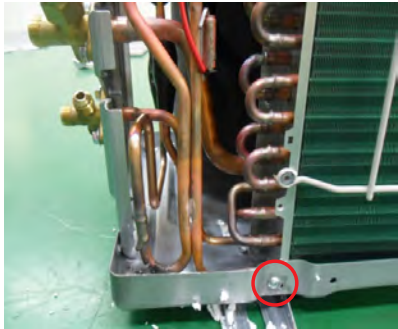

■ AC018BXADCH

No.	Parts	Procedure	Remark
1	Cabi Top	1) Unscrew and remove 8 screws on each side of the Cabinet-Top. (Use + Screw Driver)	
2	Ass'y cover control	1) Unscrew and remove a screw of Cover-Control. (Use + Screw Driver)	
3	Outdoor and indoor unit's power cable and communication cable	<p>⚠ <b>Make sure shutting the power off supply before disassembling.</b></p> <p>3) Unscrew the numbers of screws on terminal block and separate power and communication 'Ring' cables from terminal block.</p>	
4	Ass'y cabinet side rh	1) Unscrew and remove 10 screws on Cabinet-side rh. (Use + Screw Driver)	

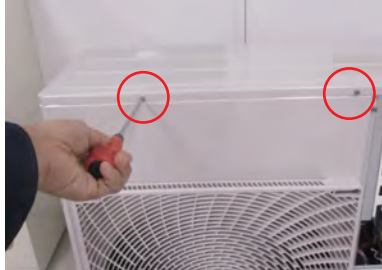

No.	Parts	Procedure	Remark
5	Ass'y cabinet front	1) Unscrew and remove 7 screws on Assy Cabinet Front. (Use + Screw Driver)	
6	Ass'y control out	<p>1) Disconnect and Separate 5 Connectors of wire from Assy Control Out.</p> <p>2) Separate Comp wire and Reactor wire from each object.  <span style="color: red;">⚠ (When you disconnect BLDC motor connector you have to cut the power off first and disconnect 30 seconds later And Make sure that is impossible to connect and disconnect BLDC motor connector when the power is on)</span></p> <p>3) Unscrew and remove 2 screws on of Assy Control out.</p>	

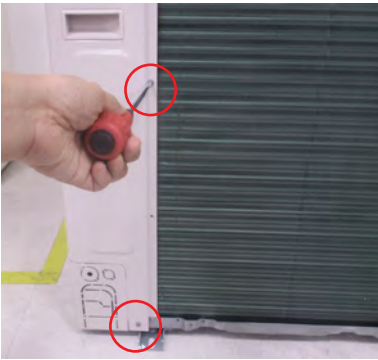

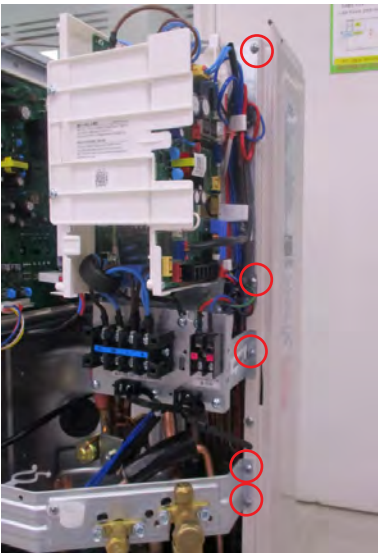

No.	Parts	Procedure	Remark
7	Fan propeller + Motor	1) Take Fan Propeller apart.	
		2) Unscrew and remove 4 screws on Motor to take apart Motor. (Use + Screw Driver)	
8	Ass'y bracket Motor	1) Unscrew and remove 2 screws on to take apart Bracket Motor. (Use + Screw Driver)	
9	Base Heater	1) Loosen fixing screw and deattach the Base Heater	

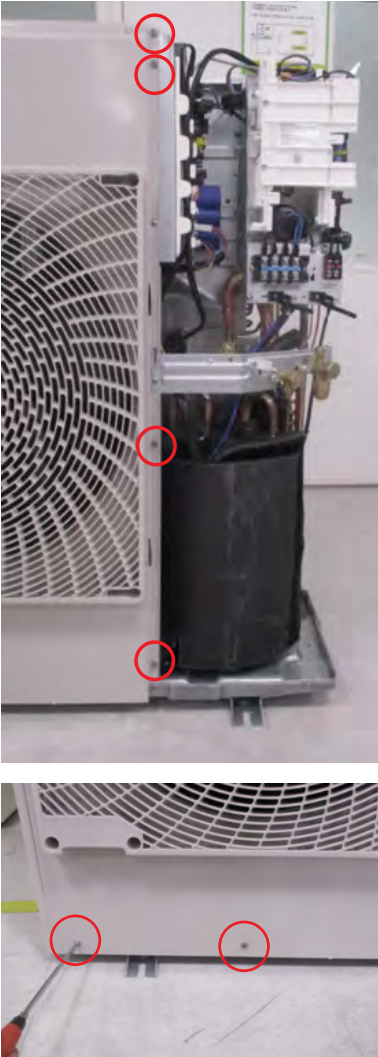

No.	Parts	Procedure	Remark
10	Heat Exchanger	<ol style="list-style-type: none"><li>1) Purge the Refrigerant first.</li><li>2) Unscrew the fix screw.</li><li>3) Separate the pipe from the Entrance and Exist by using a welder.</li><li>4) Separate Heat Exchanger from Unit.</li></ol> <p><b>⚠ When removing the Compressor, Heat Exchanger, and Pipe, Purge the Refrigerant inside the Compressor completely and remove the pipe with a weld-ing flame.</b></p>	

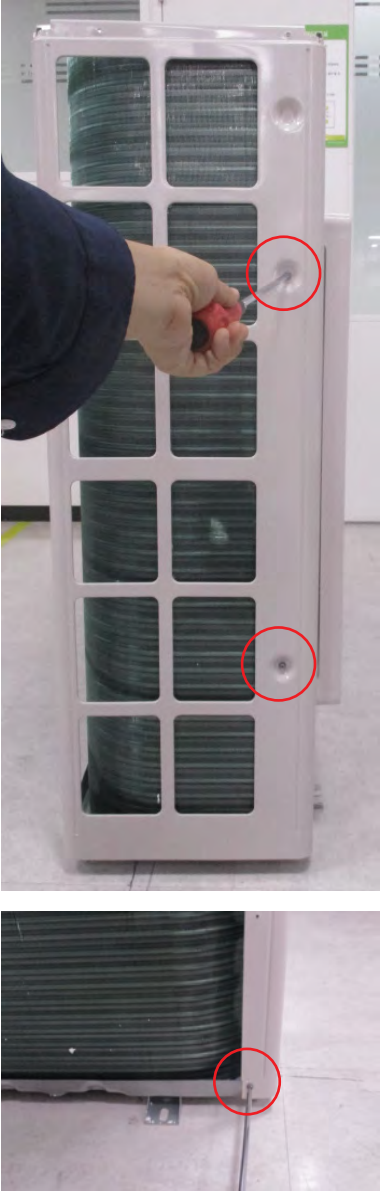

■ AC024BXADCH, AC030BXADCH

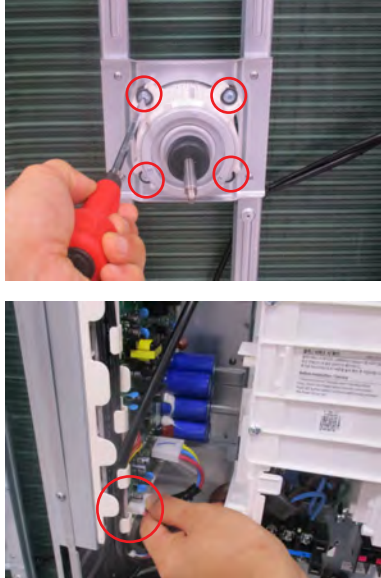

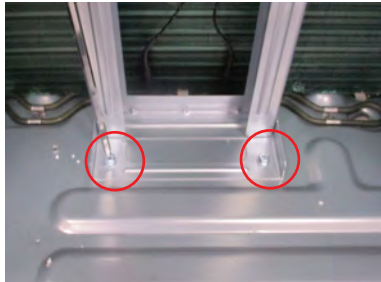

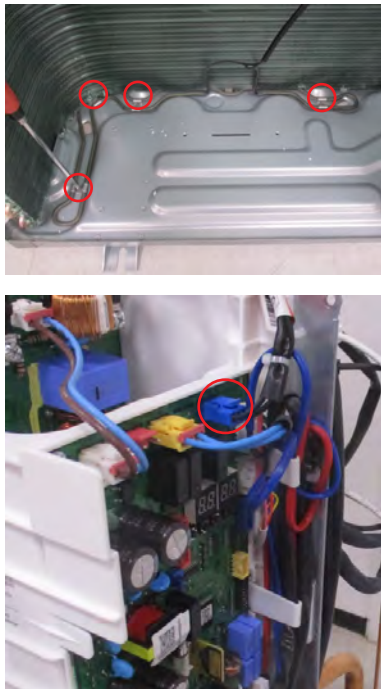

No.	Parts	Procedure	Remark
1	Cabinet Front RH	<p><b>⚠ Turn off the power before disassembly necessarily.</b></p> <p>1) Remove 2ea of screws from the Cabinet Front RH and separate it. (Use + Screw Driver)</p>	
2	Cabinet Upper	<p>1) Remove 9ea of screws which are fixed to each side of Cabinet Upper and separate it. (Use + Screw Driver)</p>	
3	Cabinet-Installation Front Part	<p>1) Remove a screw which is fixed to Cabinet-Installation Front Part and separate it. (Use + Screw Driver)</p>	

No.	Parts	Procedure	Remark
4	Outdoor Unit Guard	<p>1) Pull out the sensor from the Outdoor Unit Guard and separate it.</p> <p>2) Remove the 4ea of screws which are fixed to Outdoor Unit Guard and separate it. (Use + Screw Driver)</p>	 

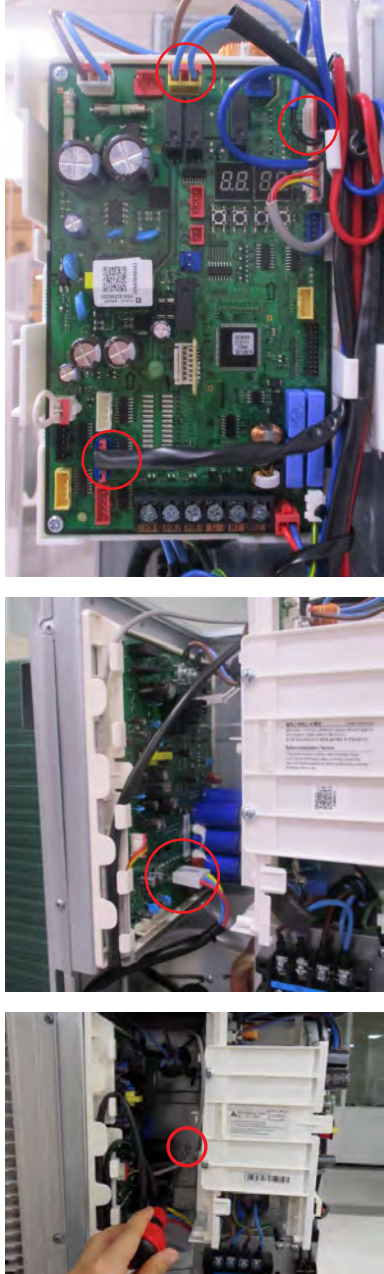

No.	Parts	Procedure	Remark
5	Cabinet Rear RH	<p>1) Pull out the sensor from the Cabinet Rear RH and separate it.</p> <p>2) Remove 9ea of screws which are fixed to each side of Cabinet Rear RH and separate it. (Use + Screw Driver)</p>	   

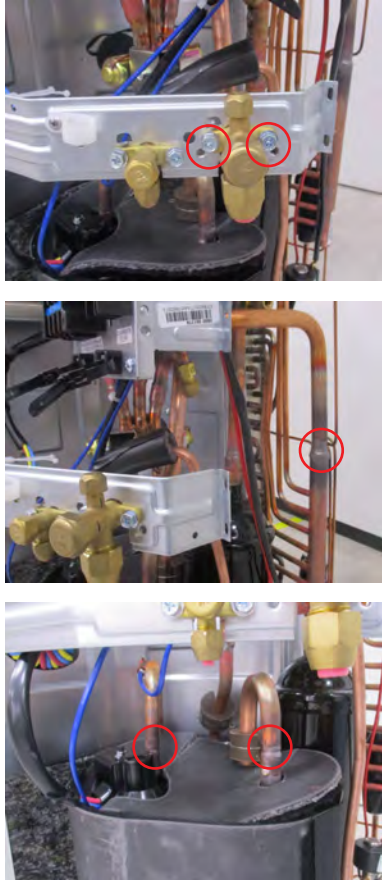

No.	Parts	Procedure	Remark
6	Cabinet-Installation Rear Part	1) Remove a screw from the Cabinet-Installation Rear Part and separate it. (Use +Screw Driver)	
7	Cabinet Front LF	1) Remove 10ea of screws from the Cabinet Front LF and separate it. (Use +Screw Driver)	

No.	Parts	Procedure	Remark
7	Cabinet Front LF		
8	Fan	<p>1) Remove the 2 hex nuts like the picture on the right side. (Use Hexagon Wrench, Monkey Spanner, Hexagon Socket)</p>	

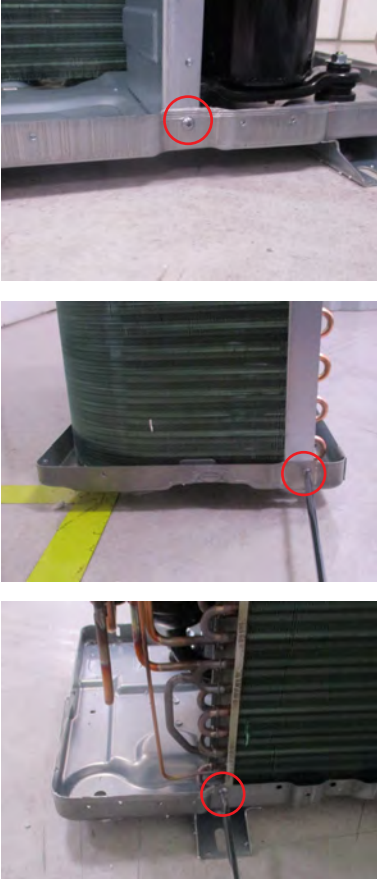

No.	Parts	Procedure	Remark
9	Motor	1) Separate the Fan Propeller.  2) Remove 8ea of screws which are fixed to Motor. (Use +Screw Driver)  3) Separate the Motor Wire connector from the Outdoor Unit Control Part.	 <p>The top photograph shows a hand using a red screwdriver to remove screws from the motor assembly. Four screws are circled in red. The bottom photograph shows the motor wire connector being disconnected from the control board, with the connector circled in red.</p>
10	Bracket Motor	1) Remove 2ea of screws from the Bracket Motor and separate it. (Use +Screw Driver)	 <p>The photograph shows the motor bracket with two screws circled in red, indicating they are to be removed.</p>
11	Base Heater (※ AC024BXADCH Only)	1) Remove 4ea of screws from the Base heater and separate it. (Use +Screw Driver)  2) Separate the Base heater Wire connector from the Outdoor Unit Control Part.	 <p>The top photograph shows the base heater with four screws circled in red. The bottom photograph shows the base heater wire connector being disconnected from the control board, with the connector circled in red.</p>

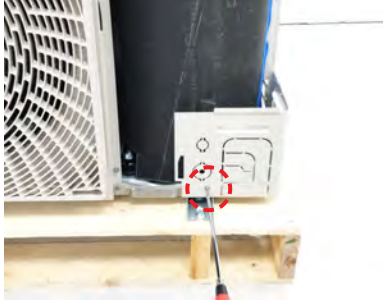

No.	Parts	Procedure	Remark
12	Control Part	<p>1) Separate the 4 connectors from the Outdoor Unit Control part.</p> <p>2) Remove the 2ea screw which is fixed to Control Part. (Use +Screw Driver)</p> <p>3) Separate the Control Part.</p>	

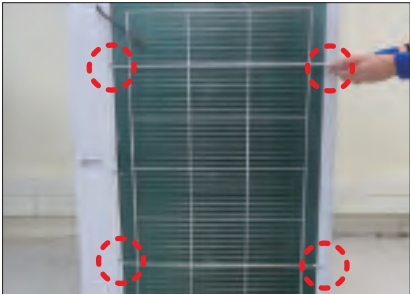

No.	Parts	Procedure	Remark
13	4 Way Valve	<p>1) First, discharge the refrigerant.</p> <p>2) Remove 2ea of screws which are fixed to Service Valve. (Use +Screw Driver)</p> <p>3) Separate the inlet and outlet pipes by welding torch.</p> <p><b>⚠ If you separate the Compressor, Heat Exchanger or Pipe, please fully discharge refrigerant in the Compressor and then separate the Pipe by welding torch.</b></p>	
14	EEV Valve	<p>1) Remove 2ea of screws which are fixed to Service Valve and separate it. (Use +Screw Driver)</p> <p>2) Separate the inlet and outlet pipes by welding torch</p>	

No.	Parts	Procedure	Remark
15	Compressor	<p>1) Remove a hex nut from the end of Cover and separate it (Use Hexagon Wrench, Monkey Spanner, Hexagon Socket)</p> <p>2) Separate the Felt Compressor.</p> <p>3) Remove the 3 hex nuts from the bottom of Compressor like the picture on the right side. (Use Hexagon Wrench, Monkey Spanner, Hexagon Socket)</p>	

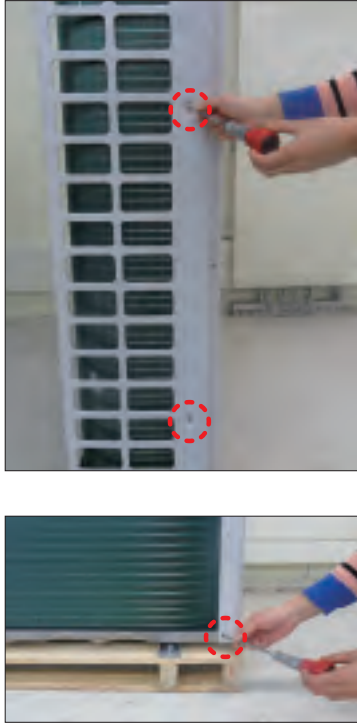

No.	Parts	Procedure	Remark
16	Condenser Connection Part	1) Remove 3ea of screws which are fixed to each side of Condenser Connection Part and separate it. (Use + Screw Driver)	

■ AC036/042/048BXADCHA

## 4. Troubleshooting

### 4-1. Setting an indoor unit address and installation option

- ▶ Set the indoor unit address and installation option with remote controller option.  
Set the each option separately since you cannot set the ADDRESS setting and indoor unit installation setting option at the same time. You need to set twice when setting indoor unit address and installation option.

#### 4-1-1. The procedure of setting option

#### Step 1 Entering mode for option setting.

1. Remove batteries from the remote controller.
2. Insert the batteries while you press [+ Temperature] and [- Temperature] button at the same time.
3. Check if you have entered the option setting status.

#### Step 2 Option setting procedure. (The option setting procedure is the same for other models.)

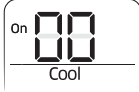

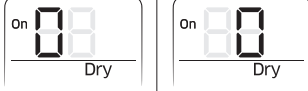

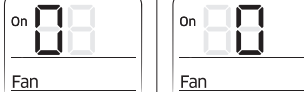

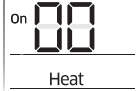

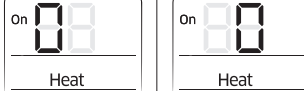

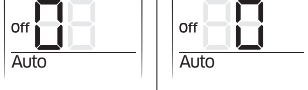

After entering the option setting status, select the option as listed below.

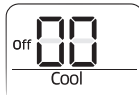

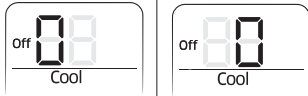

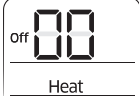

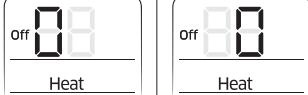

- Option setting is available from SEG1 to SEG 24.
- SEG1, SEG7, SEG13, SEG19 are not set as page option.
- Set the SEG2~SEG6, SEG8~SEG12 in the ON status and SEG14~18, SEG20~24 in the OFF status.

SEG1	SEG2	SEG3	SEG4	SEG5	SEG6	SEG7	SEG8	SEG9	SEG10	SEG11	SEG12	On (SEG1~12)	Off (SEG13~24)
0	X	X	X	X	X	1	X	X	X	X	X		
SEG13	SEG14	SEG15	SEG16	SEG17	SEG18	SEG19	SEG20	SEG21	SEG22	SEG23	SEG24		
2	X	X	X	X	X	3	X	X	X	X	X		

### 4-1-2. The procedure of setting option

Option setting	Status
<p>1. Setting SEG2, SEG3 option                      Press Low Fan button(∨) to enter SEG2 value .                      Press High Fan button(∧) to enter SEG3 value .                      Each time you press the button,  →  → ...  →  will be selected in rotation .</p>	 <p style="text-align: center;">SEG2                      SEG3</p>
<p>2. Setting Cool mode   Press Mode button to be changed to Cool mode in the ON status .</p>	
<p>3. Setting SEG4, SEG5 option                      Press Low Fan button(∨) to enter SEG4 value .                      Press High Fan button(∧) to enter SEG5 value .                      Each time you press the button,  →  → ...  →  will be selected in rotation .</p>	 <p style="text-align: center;">SEG4                      SEG5</p>
<p>4. Setting Dry mode   Press Mode button to be changed to DRY mode in the ON status .</p>	
<p>5. Setting SEG6, SEG8 option                      Press Low Fan button(∨) to enter SEG6 value .                      Press High Fan button(∧) to enter SEG8 value .                      Each time you press the button,  →  → ...  →  will be selected in rotation .</p>	 <p style="text-align: center;">SEG6                      SEG8</p>
<p>6. Setting Fan mode   Press Mode button to be changed to FAN mode in the ON status .</p>	
<p>7. Setting SEG9, SEG10 option                      Press Low Fan button(∨) to enter SEG9 value .                      Press High Fan button(∧) to enter SEG10 value .                      Each time you press the button,  →  → ...  →  will be selected in rotation .</p>	 <p style="text-align: center;">SEG9                      SEG10</p>
<p>8. Setting Heat mode   Press Mode button to be changed to HEAT mode in the ON status .</p>	
<p>9. Setting SEG11, SEG12 option                      Press Low Fan button(∨) to enter SEG11 value .                      Press High Fan button(∧) to enter SEG12 value .                      Each time you press the button,  →  → ...  →  will be selected in rotation .</p>	 <p style="text-align: center;">SEG11                      SEG12</p>
<p>10. Setting Auto mode   Press Mode button to be changed to AUTO mode in the OFF status.</p>	
<p>11. Setting SEG14, SEG15 option                      Press Low Fan button(∨) to enter SEG14 value .                      Press High Fan button(∧) to enter SEG15 value .                      Each time you press the button,  →  → ...  →  will be selected in rotation.</p>	 <p style="text-align: center;">SEG14                      SEG15</p>

### The procedure of setting option (cont.)

Option setting	Status
<p>12. Setting Cool mode</p> <p> Press Mode button to be change to Cool mode in the OFF status.</p>	
<p>13. Setting SEG16, SEG17 option</p> <p>Press Low Fan button(∨) to enter SEG16 value.</p> <p>Press High Fan button(∧) to enter SEG17 value.</p> <p>Each time you press the button,  →  → ...  →  will be selected in rotation.</p>	 <p style="text-align: center;">SEG16                      SEG17</p>
<p>14. Setting Dry mode</p> <p> Press Mode button to be change to Dry mode in the OFF status.</p>	
<p>15. Setting SEG18, SEG20 option</p> <p>Press Low Fan button(∨) to enter SEG18 value.</p> <p>Press High Fan button(∧) to enter SEG20 value.</p> <p>Each time you press the button,  →  → ...  →  will be selected in rotation.</p>	 <p style="text-align: center;">SEG18                      SEG20</p>
<p>16. Setting Fan mode</p> <p> Press Mode button to be change to Fan mode in the OFF status.</p>	
<p>17. Setting SEG21, SEG22 option</p> <p>Press Low Fan button(∨) to enter SEG21 value.</p> <p>Press High Fan button(∧) to enter SEG22 value.</p> <p>Each time you press the button,  →  → ...  →  will be selected in rotation.</p>	 <p style="text-align: center;">SEG21                      SEG22</p>
<p>18. Setting Heat mode</p> <p> Press Mode button to be change to HEAT mode in the OFF status.</p>	
<p>19. Setting SEG23, SEG24 mode</p> <p>Press Low Fan button(∨) to enter SEG23 value.</p> <p>Press High Fan button(∧) to enter SEG24 value.</p> <p>Each time you press the button,  →  → ...  →  will be selected in rotation.</p>	 <p style="text-align: center;">SEG23                      SEG24</p>

Check the option you have set

**Step 4** Input option

Press the operation button  with the direction of remote control for set.  
For the correct option setting, you must input the option twice.

**Step 5** Check operation

- 1) Reset the indoor unit by pressing the RESET button of indoor unit or outdoor unit.
- 2) Take the batteries out of the remote controller and insert them again and then press the operation button.

## The procedure of setting option (Cont.)

▶ AR-KH04U remote control (for 360 cassette only)

### Step 1 Enter the mode for setting the options

- a. Remove the batteries from the remote control.
- b. While holding down the (Temp) and (Timer) buttons simultaneously, insert the batteries into the remote control.
- c. Make sure that you are entered to the mode for setting the options:

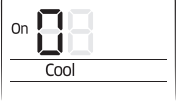

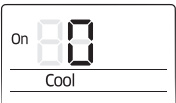

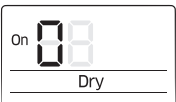

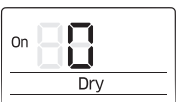

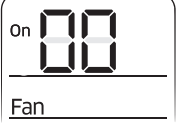

### Step 2 Set the option values.

- The total number of available options are 24: SEG1 to SEG24.
- Because SEG1, SEG7, SEG13, and SEG19 are the page options used by the previous remote control models, the modes to set values for these options are skipped automatically.
- Set a 2-digit value for each option pair in the following order :  
 SEG2 and SEG3 → SEG4 and SEG5 → SEG6 and SEG8 → SEG9 and SEG10 → SEG11 and SEG12 → SEG14 and SEG15 → SEG16 and SEG17 → SEG18 and SEG20 → SEG21 and SEG22 → SEG23 and SEG24

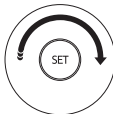

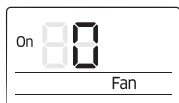

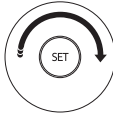

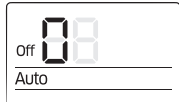

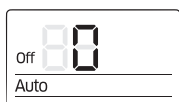

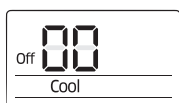

SEG1	SEG2	SEG3	SEG4	SEG5	SEG6	SEG7	SEG8	SEG9	SEG10	SEG11	SEG12	On (SEG1~12)	Off (SEG13~24)
0	X	X	X	X	X	1	X	X	X	X	X		
SEG13	SEG14	SEG15	SEG16	SEG17	SEG18	SEG19	SEG20	SEG21	SEG22	SEG23	SEG24		
2	X	X	X	X	X	3	X	X	X	X	X		

### The procedure of setting option (Cont.)

<p><b>18</b> Press the  (Mode) button. Heat and Off appear on the remote control display.</p>	

### The procedure of setting option (Cont.)

Steps	Remote control display
<p><b>19</b> Set the SEG23 and SEG24 values:</p> <p><b>a</b> Set the SEG23 value by rotating the Wheel counterclockwise until the value you want to set appears on the remote control display.</p> <p><b>b</b> Set the SEG24 value by rotating the Wheel clockwise until the value you want to set appears on the remote control display.</p> <p>When you rotate the Wheel, values appear in the following order: 0 → 1 → ... → E → F</p>	 <p>SEG 23</p> <p>SEG 24</p>

### Step 3 Check whether the option values that you have set are correct by pressing the (Mode) button repeatedly

### Step 4 Save the option values into the indoor unit:

Point the remote control to the remote control sensor on the indoor unit and then press the  (Power) button on the remote control twice. Make sure that this command is received by the indoor unit. When it is successfully received, you can hear a short sound from the indoor unit. If the command is not received, press the  (Power) button again.

### Step 5 Check whether the air conditioner operates in accordance with the option values you have set:

- a** Reset the indoor or outdoor unit.
  - Indoor unit : Press the  (Set) and  (Option) buttons on the remote control simultaneously for 4 seconds.
  - Outdoor unit : Press the K3 button.
- b** Remove the batteries from the remote control, insert them again, and then press the  (Power) button on the remote control.

### 4-1-3. Order for Setting Options (Wired Remote Controller)

1. If you want to use the various additional functions for your Wired Remote Controller, press the set and delete buttons at the same time for more than three seconds.
  - ▶ You will enter the additional function settings, and the [Main menu] will be displayed.
2. Refer to the list of additional functions for your Wired Remote Controller on the next page, and select the desired menu.
  - ▶ Using the [^]/[v] buttons, select a main menu number and press the [>] button to enter the sub-menu setting screen.
  - ▶ Using the [^]/[v] buttons, select a sub-menu number and press the [>] button to enter data setting screen.
  - ▶ When you enter the setting stage, the current setting will be displayed.
  - ▶ Refer to the chart for data settings.
  - ▶ Using the [^]/[v] buttons, select the settings. Press the [>] button to move to the next setting.
  - ▶ Press the **Set** button to save the settings and exit to the sub-menu setting screen.
  - ▶ Press the **Esc** button to exit to normal mode.

- While setting the data, you can use the [<]/[>] buttons to set the range of Data bit.
- While configuring the setting, press the **Esc** button to exit to the setting sub-menu without saving your changes.

### 4-1-4. Setting the indoor unit addresses

Before installing an indoor unit, be sure to set an address for the indoor unit by taking the following steps:

1. Make sure that the power is supplied to the indoor unit. If the indoor unit is not plugged in, it must include a power supply.
2. Set an address for each indoor unit using the remote control, according to your air conditioning system plan, by referring to the following table and by following the steps in Common steps for setting the addresses and options on page 4-1.
  - The indoor unit addresses (main and RMC addresses) are set to 0A0000-100000-200000-300000 by default.
  - If indoor units and outdoor units match 1:1, you don't need to set the main address because it is automatically set by the outdoor unit.
  - If you are using on or off controller, set RMC address.

Option No. for an indoor unit: 0AXXXX-1XXXXX-2XXXXX-3XXXXX

Option	SEG1		SEG2		SEG3		SEG4		SEG5		SEG6	
Explanation	Page		Mode		Setting main address		100-digit of indoor unit address		10-digit of indoor unit		A single digit of indoor unit

Indication and details	Indication	Details			Indication	Details			Indication	Details	Indication	Details
		1				0	No RMC address			RMC1	1~F	RMC2
					1	RMC address setting mode						

- The main address must be set to a value in the range 0 to 15. If you set other values, communication error will occur.
- If any of SEG5 and SEG6 is set to a value in the range A to F, the main address of the indoor unit does not change.
- If SEG3 is set to 0, the indoor unit maintains the existing main address even if SEG6 is set to a new value.
- If SEG9 is set 0, the indoor unit maintains the existing RMC address even if SEG11 and SET12 are set to new values.

### 4-1-5. Setting an indoor unit installation option (Suitable for the condition of each installation location)

1. Make sure that the power is supplied to the indoor unit.  
If the indoor unit is not plugged in, it must include a power supply.
2. Make sure that the panel is connected to the indoor unit so that it can receive options
3. Set the functional options of indoor units, by referring to the following table and by following the steps in Common steps for setting the addresses and options on page 4-1.
  - The SEG20 option, Individual control with remote control, allows you to control multiple indoor units individually by using the remote control.

■ 1Way CST, 4Way CST : AC\*\*\*BN1DCH, AC\*\*\*BN4DCH

- 1) SEG4  
By SEG4 setting, Minimizing fan operation when thermostat is off.  
- Fan operates for 20 seconds at an interval of 5 minutes in heat mode.  
- Fan stops or operates Ultra low in Cooling when thermostat is off.
- 2) SEG20  
If you set the Individual control with remote control option to a value other than 0 to 4, it is automatically set to 0 (Indoor1)
- 3) SEG21  
Default value of Heating setting compensation is 3.6°F(2°C).

### 4-1-6. Changing the addresses and options individually

When you want to change the value of a specific option, refer to the following table and follow the steps in Common steps for setting the addresses and options

Option	SEG1		SEG2		SEG3		SEG4		SEG5		SEG6	
Function	Page		Mode		Type of the option to change		Tens position of the option number		Units position of the option number		New value	
Indication and details	Indication	Details	Indication	Details	Indication	Details	Indication	Details	Indication	Details	Indication	Details
		0		D		Option type	0 to F	Tens position value	0 to 9	Units position value	0 to 9e	New value

Example: Changing the Buzzer control (SEG17) option of the functional options to 1 disuse.

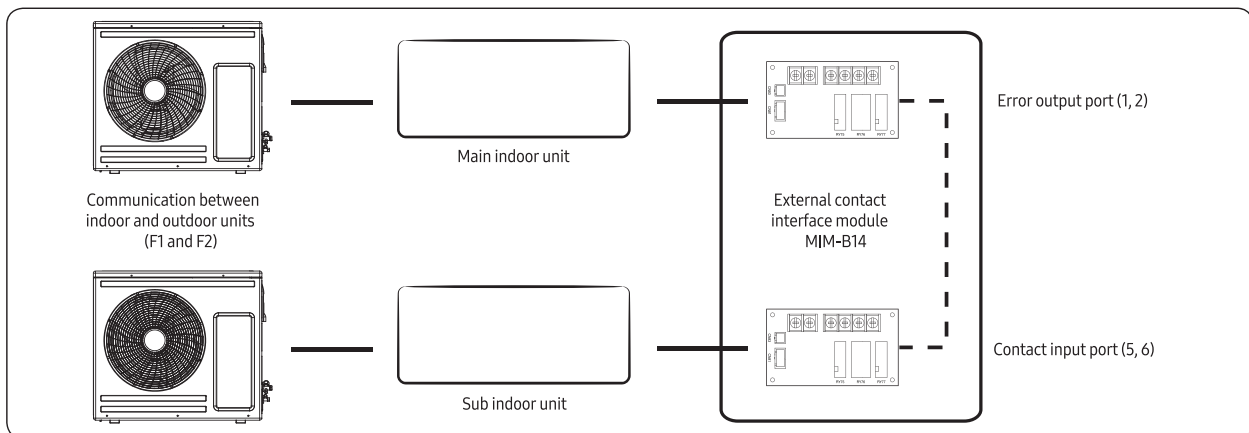

Option	SEG1		SEG2		SEG3		SEG4		SEG5		SEG6	
Function	Page		Mode		Type of the option to change		Tens position of the option number		Units position of the option number		New value	
Indication	0		D		2		1		7		1	

### 4-1-7. Emergency Temperature Output (ETO) function

- In order to deploy the ETO function, the MIM-B14, an external contact interface module, must be installed in each indoor unit.
- The ETO is a concept of emergency operation of indoor units. If the indoor unit 1 (main indoor unit) stops because of an error, the indoor unit 2 (sub indoor unit) starts to operate.
- Basically, the indoor unit 2 operates in the previous mode. [For the first time operation, it starts in 24 °C Auto mode.]
- To set more detailed operation conditions for the indoor unit 2, use the S-net Pro.

#### ■ Setting up the ETO

#### 1 Main indoor unit

- Disable the external contact control (Default).
- Connect the S-net pro2 to F1 and F2.
- Enable the ETO function and set the temperature and time.

#### 2 Sub indoor unit

- (Required) Enable the external contact control (with the installation option SEG14 - Reverse Control).
- Connect the S-net pro2 to F1 and F2.
- Enable the entrance control and set the mode, set temperature, and fan speed.

## Emergency Temperature Output (ETO) function (Cont.)

### ■ ETO operation specifications

#### 1 Main indoor unit

- Based on the external contact control settings, the main indoor unit decides whether to generate output when an error (indoor unit stop) occurs.
- Based on the ETO settings, the main indoor unit decides whether to generate output according to the temperature and time conditions.

#### 2 Sub indoor unit

- Based on the entrance control settings, the sub indoor unit decides the mode, set temperature, and fan speed when contact inputs are given.

	Enable of ETO	Enable of external contact	Error port output
Main indoor unit	X	X	N/A
	X	O	Output due to an error
	O	X	Output by ETO entrance conditions (temperature / time / error occurrence)
	O	O	Output by ETO entrance conditions (temperature / time / error occurrence) * Ready to control the main contact input

	Enable of entrance control	Enable of external contact	Operation when outputting Main
Sub indoor unit	X	X	N/A
	X	O	On with the previous operation conditions
	O	O	On with the entrance control enabled

## 4-3. Diagnostic Checklist

### 4-3-1. Test operation mode and check mode

#### ■ Display Options key

Key	Push type	Mode	Display				
			SEG1	SEG2	SEG3	SEG4	
K1	Short	1st	Heating test mode	H	1	8	8
		2nd	Defrost test mode <sup>1)</sup>	H	3	8	8
		3rd	End Key operation	8	8	8	8
K2	Short	1st	Cooling test mode	H	2	8	8
		2nd	Inverter check	H	4	8	8
		3rd	Pump down	H	6	8	8
		4th	Not Used/No Function	H	8	8	8
		5th	Inverter Fault Detection (Comp#1) <sup>2)</sup>	H	A	8	8
		6th	Auto trial operation	H	E	8	8
		7th	Auto check <sup>3)</sup> (Installation commissioning mode)	H	E	8	8
8th	End Key operation	8	8	8	8		
K3	Short	1st	Reset Release Eco mode	8	8	8	8

1) Defrost test mode

Condition 1: The outdoor temperature is below 10°C.

Condition 2: All the temperature conditions should meet the defrost conditions.

2) Indication on the display and action to take when an inverter fault is detected

	SEG1	SEG2	SEG3	SEG4	Action to take
Fault detection is in progress	8	8	8	8	-
OK	8	8	0	H	-
NG	8	8	A	0	PBA defect: Replace the PBA
Check	8	8	E	H	Manual inspection is required
Going into fault detection mode failed	8	8	F	L	Try fault detection again

3) Auto check (Installation commissioning mode)

To ensure normal operation of the product, first make sure to complete auto check. .

※ AC\*\*BXSCC series are not allowed to proceed K1 key test operation mode due to cooling only models.

<AC024/030/036/042/048BXADCH, AC030/036BXSCC, AC030/036BXSCCH>

<AC009/012/018BXADCH, AC018/024BXSCC>

## Test operation mode and check mode (Cont.)

### ■ View Mode

K4 short push	Display contents	SEG1	SEG2	SEG3	SEG4	Unit
1	Order frequency	1	Hundreds digit	Tens digit	Units digit	Hz
2	Current frequency	2	Hundreds digit	Tens digit	Units digit	Hz
3	The number of preset indoor units	3	Hundreds digit	Tens digit	Units digit	EA
4	Ambient temperature sensor	4	Hundreds digit or - <sup>1)</sup>	Tens digit	Units digit	°C or °F <sup>2)</sup>
5	Compressor discharge sensor	5	Hundreds digit	Tens digit	Units digit	°C or °F <sup>2)</sup>
6	Eva-Mid sensor	6	Hundreds digit or - <sup>1)</sup>	Tens digit	Units digit	°C or °F <sup>2)</sup>
7	Condensor sensor	7	Hundreds digit or - <sup>1)</sup>	Tens digit	Units digit	°C or °F <sup>2)</sup>
8	Current	8	Tens digit	Units digit	The first place of decimals	A
9	Outdoor fan RPM	9	Thousands digit	Hundreds digit	Tens digit	rpm
10	Target discharge temperature	A	Hundreds digit or - <sup>1)</sup>	Tens digit	Units digit	°C or °F <sup>2)</sup>
11	EEV	B	Hundreds digit	Tens digit	Units digit	step
12	The capacity sum of indoor units	C	Tens digit	Unit digit	The first place of decimals	kW or kBtu/h <sup>3)</sup>
13	Protective control	D	0: Cooling 1: Heating	Protective control 0: No Protective control 1: Freezing 2: Non-stop defrosting 3: Over-load 4: Discharge 5: Total electric current	Frequency status 0: Normal 1: Hold 2: Down 3: Up_limit 4: Down_limit	-
14	IPM temperature	E	Hundreds digit or - <sup>1)</sup>	Tens digit	Units digit	°C or °F <sup>2)</sup>
15	The number of connected indoor units	F	Hundreds digit	Tens digit	Units digit	EA
16	ESC EEV(CAM)	G	Hundreds digit	Tens digit	Units digit	step
17	ESC IN sensor	H	Hundreds digit or - <sup>1)</sup>	Tens digit	Units digit	°C or °F <sup>2)</sup>
18	ESC OUT sensor	I	Hundreds digit or - <sup>1)</sup>	Tens digit	Units digit	°C or °F <sup>2)</sup>
19	View mode end	BLANK	BLANK	BLANK	BLANK	

1) Sub-zero temperatures are expressed as a minus, instead of hundreds digit.

2) The temperature unit can be switched between Celsius and Fahrenheit through Setting outdoor unit option switches. (Default value is Celsius.)

3) If the temperature unit is set to Fahrenheit through Setting outdoor unit option switches, the value is expressed in the unit of kBtu/h.

## Test operation mode and check mode (Cont.)

### ■ Version Check & Address Check

		Display contents	SEG1	SEG2	SEG3	SEG4
K4 long push	-	Main micom version	Year (Dec)	Month (Hex)	Date (Tens digit)	Date (Units digit)
	After short push 1	Inverter micom version	Year (Dec)	Month (Hex)	Date (Tens digit)	Date (Units digit)
	After short push 2	E2P version	Year (Dec)	Month (Hex)	Date (Tens digit)	Date (Units digit)
	After short push 3	Page 1 - AUTO Page 2 - (SEG1,2 - Indoor : "A","0") (SEG3,4 - Address : ex)00 )				
	After short push 4	Page 1 - MANU Page 2 - (SEG1,2 - Indoor : "A","0") (SEG3,4 - Address : ex)00 )				

- Long push K4(Main micom ver.) → short push 1 more (Inv. micom ver.) → short push 1 more (E2P. ver.) → short push 1 more (Automatic address) → short push 1 more (Manual address) → short push 1 more (Main micom ver.) → ..... → Long push K4(veiw mode end)

## Test operation mode and check mode (Cont.)

### ■ Setting outdoor unit option switch and address manually

#### ▶ Setting the option

- Press and hold K2 to enter the option setting. (Only available when the operation is stopped)
  - If you enter the option setting, display will show the following.

- Seg 1 and Seg 2 will display the number for selected option.
- Seg 3 and Seg 4 will display the number for set value of the selected option.
- If you have selected desired option, you can shortly press the K2 switch to adjust the value of the Seg 3, Seg 4 and change the function for the selected option

#### Example)

- If you have selected desired option, you can shortly press the K2 switch to adjust the value of the Seg 3, Seg 4 and change the function for the selected option.

#### Example)

- After selecting the function for options, press and hold the K2 switch for 2 seconds. Edited value of the option will be saved when entire segments blinks and tracking mode begins.

Option item	Input unit	SEG1	SEG2	SEG3	SEG4	Function
Channel address	Main	0	0	A	U	Automatic setting (Factory default)
				00~15		Manual setting
Snow accumulation prevention control	Main	0	1	0	0	Disabled (Factory default)
				0	1	Enabled
Step for Silence mode	Main	0	2	0	0	Disabled (Factory default)
				0	1	Step1
				0	2	Step2
				0	3	Step3
Type of Silence mode	Main	0	3	0	0	Automatic Silence mode (Factory default)
				0	1	Manual Silence mode
Temperature unit	Main	0	4	0	0	Celsius (default)
				0	1	Fahrenheit
Not applicable	Main	0	5	0	0	Not applicable
				0	1	Not applicable
Current restriction rate <sup>1)</sup>	Main	0	6	0	0	100% (Factory default)
				0	1	95%
				0	2	90%
				0	3	85%
				0	4	80%
				0	5	75%
				0	6	70%
				0	7	65%
				0	8	60%
				0	9	55%
				1	0	50%
				1	1	100%
Dedicated mode for cooling/ heating <sup>2)</sup>	Main	0	7	0	0	Cooling / Heating operation (default)
				0	1	Cooling operation only
				0	2	Heating operation only

- 1) Current restriction rate : When restriction option is set, cooling and heating performance may decrease.
- 2) AC\*\*\*BXSCCC models are cooling-only models and do not support heating mode.  
These models operate in cooling mode only, even if "heating operation only" mode is enabled.

## Test operation mode and check mode (Cont.)

### ■ Auto check(Installation commissioning mode)

- This is a self-diagnosis function to determine the installation status and product integrity in the initial installation. (This model requires the Auto check to be implemented in the installation step before its normal operation is initiated.)
- Procedures of Auto check
  - 1 Check the product installation status.
    - Check the power supply, communication cables, service valve openings, and quantity of additional refrigerant.
    - In the initial power supply after installation, the warning of non-fulfilment of Auto check ( *UIP* ) will be indicated on the outdoor unit and the system will not function properly.
  - 2 Enter the mode of Auto check.
    - Press the K2 button 7 times consecutively.
    - During the Auto check, the display will show “ F ”, “ E ” “BLANK” “BLANK” and it will take about 10 to 30 minutes for completion.
  - 3 The mode of Auto check will then be completed.
    - Successful Auto check: After checking the blinking that indicates installation completion on the display ( *PASS* ), press the K1 or K2 button to turn the status to the standby mode for normal operation.
    - Failure of Auto check: An error code blinks on the display. Resolve the error by referring to the details on the Troubleshooting page about how to troubleshoot for each error code, and then perform the Auto check again.

- If you intend to install more refrigerant piping prior to entering the mode of Auto check, make sure that the refrigerant to be added meets the related requirements. In this process, it is possible to test the cooling test mode (K2 switch: once) and heating test mode (K1 switch: once).  
(※ AC\*\*\*BXSCCC models are cooling-only models and do not support heating test mode.)
- You may stop the mode of test operation for installation by pressing the K3 switch during the test operation.  
(After it stops, *UIP* (the warning of incomplete Auto check) will be displayed)
- During the Auto check, it is possible to refer to the system status by pressing the K4 switch.
- In the case that there is an error during the Auto check, the Auto check will stop. In this case, take a measure for the error and then try the test operation again.
- If the test operation is not completed properly, the product will not function in the intended way.  
*UIP* (no implementation of Auto check) will be displayed. Be sure to solve the trouble and complete the test operation for installation properly.
- *UIP* indicates, not that the unit is out of order, but that the Auto check has yet to be implemented as an essential step of installation.
- If you have completed the Auto check function normally once( *PASS* ) and run Auto check again,
  - **Successful Auto check:** After checking the blinking that indicates installation completion on the display ( *0000* )
  - **Failure of Auto check:** An error code blinks on the display. Resolve the error by referring to the details on the Troubleshooting page about how to troubleshoot for each error code, and then perform the Auto check again.

### 4-3-2. Error code [indoor]

## 4-4. Troubleshooting by symptoms

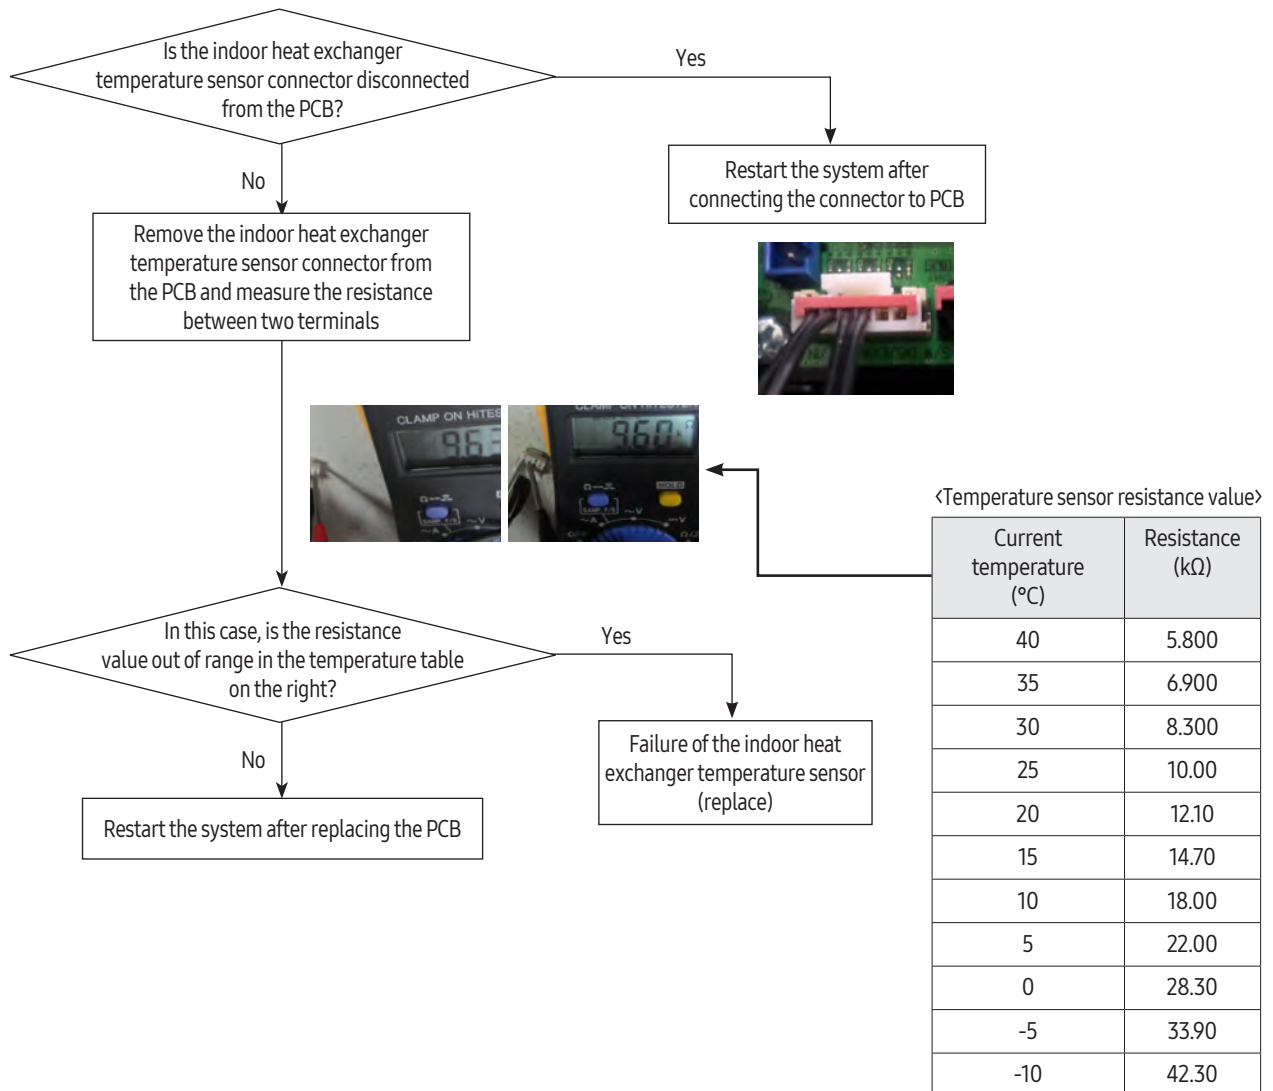

### 4-4-1. Indoor temperature sensor error (E121)

Display	Outdoor Unit display		E121															
	Wired remote Control, Wind Free RAC		E121															
	Duct, 1way Cassette			4way Cassette, 4way Cassette(600x600)				MAX4			Console			360 Cassette				
	 Duct Blue   Red 1way Blue   Yellow		or 	or 	or 								...					Red ●
	X	X	●	X	X	X	●	X	X	X	●	X	X	X	●	X	X	
Judgment method	Refer to checking method, as shown below.																	
Symptom	If the indoor temperature sensor is open or short circuit.																	

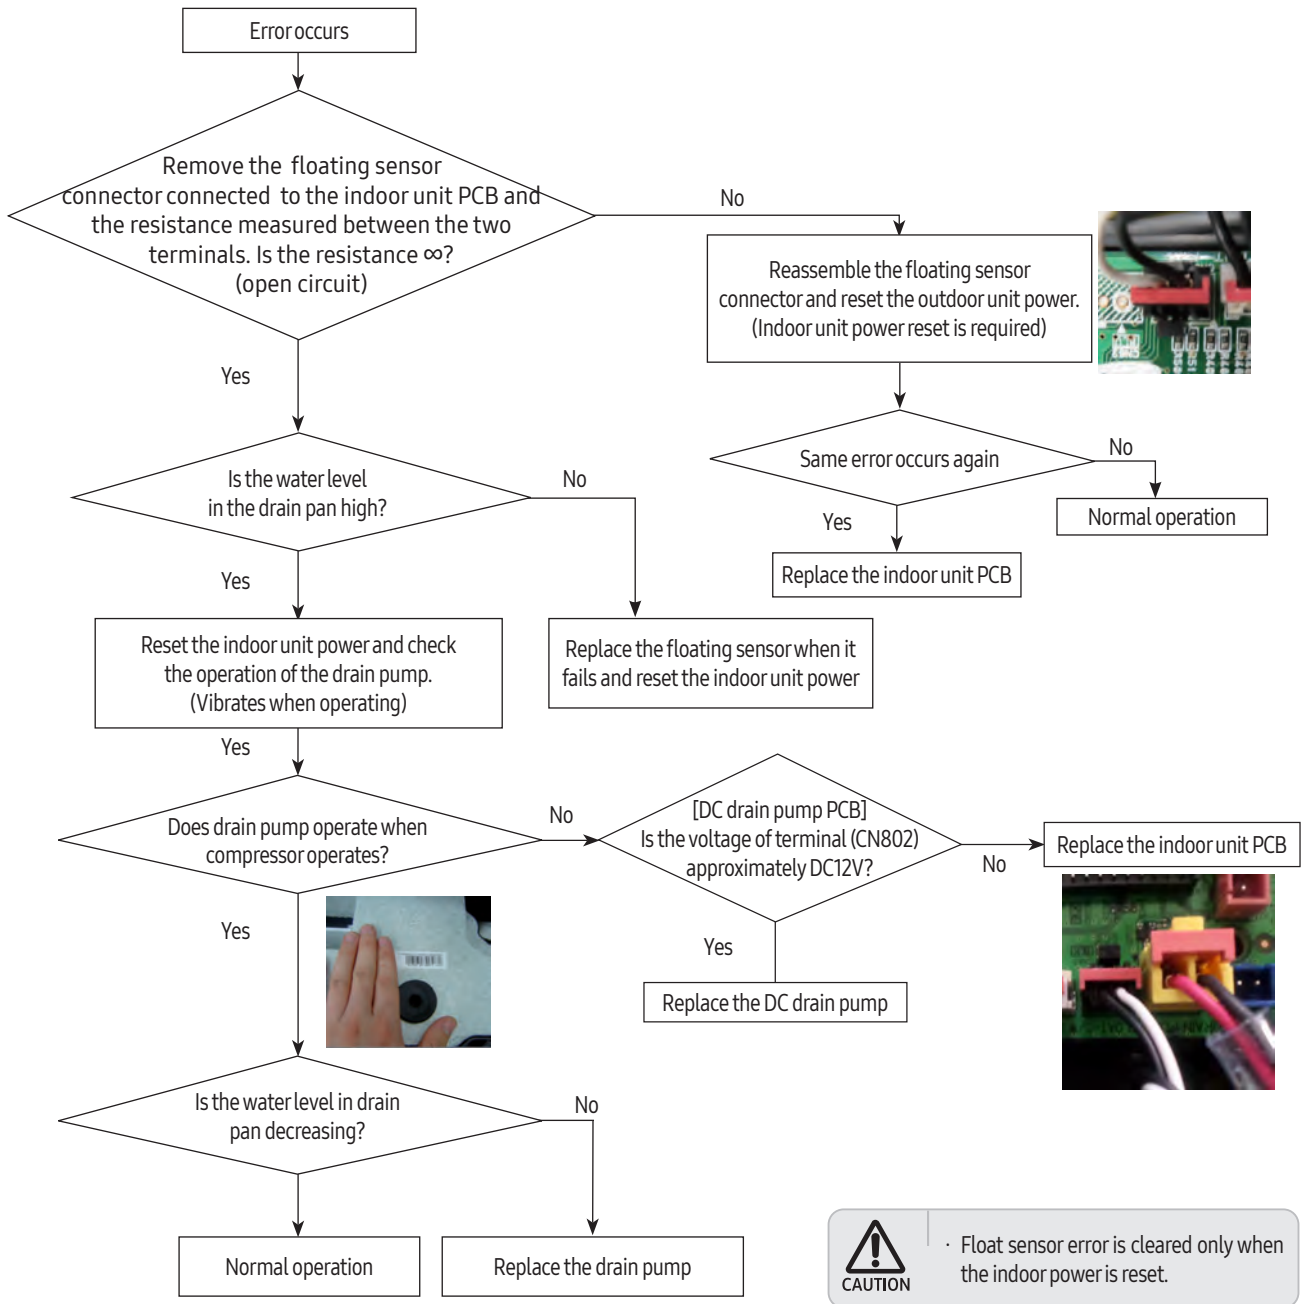

### 4-4-2. Indoor heat exchanger temperature sensor error (E122)

Display	Outdoor Unit display		E122													
	Wired remote Control, Wind Free RAC		E122, E123													
	Duct, 1way Cassette			4way Cassette, 4way Cassette(600x600)				MAX4		Console				360 Cassette		
Blue	Red	or	or	or	○	○	X	X	○	○	X	X	X	○	X	○
Blue	Yellow				○	○	X	X	○	○	X	X	X	○	X	○
○	X	○	X	X	○	○	X	X	○	○	X	X	X	○	X	○
Judgment method	Refer to checking method, as shown below															
Symptom	If the short or open circuit of indoor heat exchanger temperature sensor.															

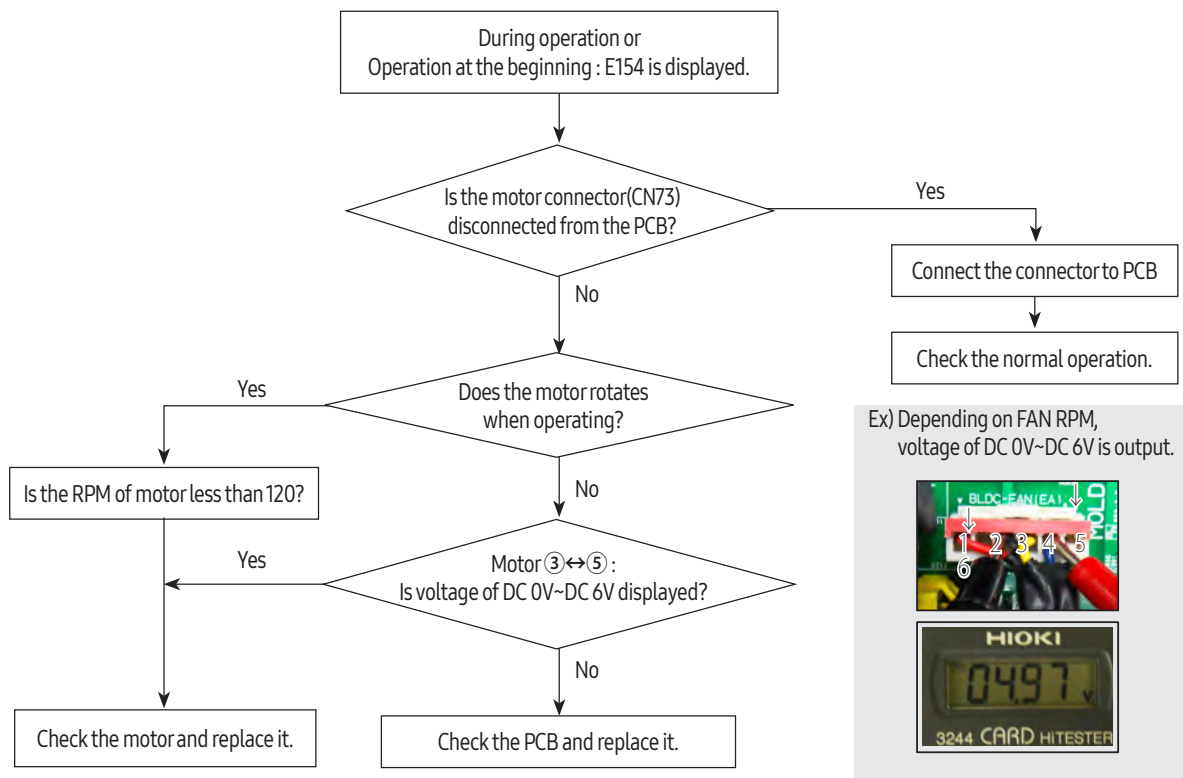

### 4-4-3. Indoor unit float sensor error (E153)

Display	Outdoor Unit display		E153							
	Wired remote Control, Wind Free RAC		E153							
	Duct, 1way Cassette			4way Cassette, 4way Cassette(600x600)				360 Cassette		
										GRN ● ↔ BLUE ●
	Duct		or	or	or					
Blue	Red									
1way										
Blue	Yellow									
	X	X	X	●	●	X	X	●	●	
Judgment method	Refer to checking method, as shown below									
Symptom	If the increase in the drain pan water level due to failure of the indoor unit drain pump or indoor unit float switch is open and that state is maintained for more than one minute.									

### 4-4-4. Indoor Fan error (E154)

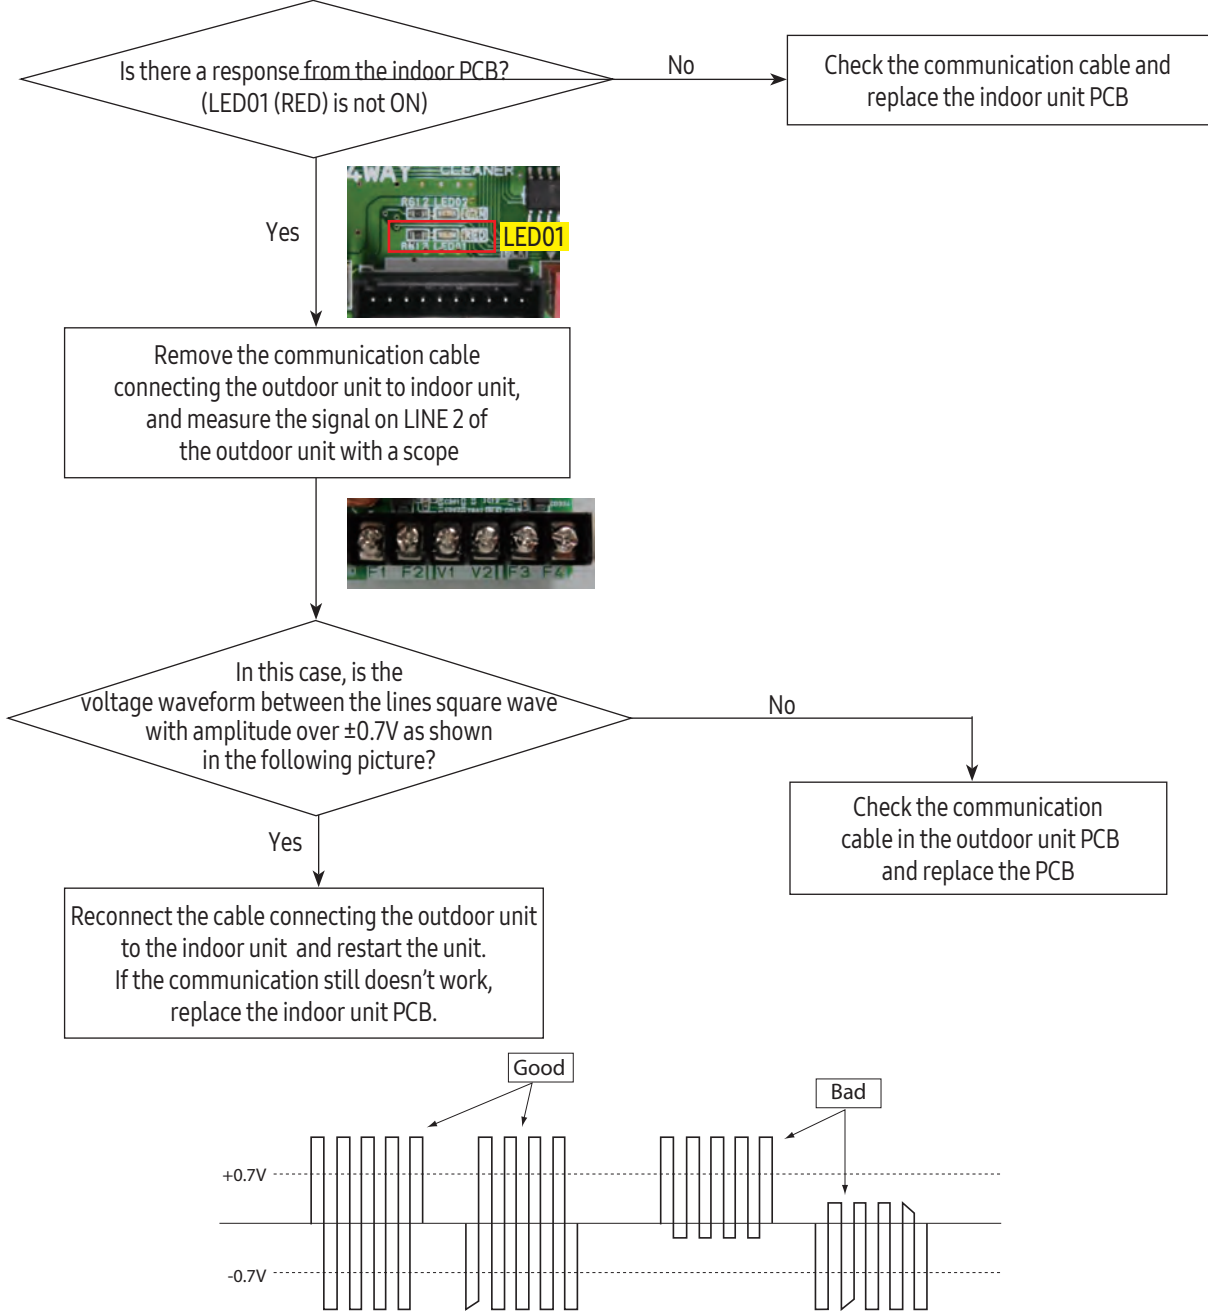

Display	Outdoor Unit display		E154																
	Wired remote Control, Wind Free RAC		E154																
	Duct, 1way Cassette			4way Cassette, 4way Cassette(600x600)				MAX4			Console				360 Cassette				
	Duct Blue   Red		or [Clock]	or [Fan]	or [Grid]	[Power]	[Shield]	[Clock]	[Grid]	[Power]	[Clock]	[Turbid]	[Dots]	[Fan]	[Clock]	[Shield]	[Black Circle]	RED ● ↔ BLU ●	
	1way Blue   Yellow		[Clock]	[Fan]	[Grid]	X	X	[Clock]	X	X	X	[Turbid]	X	[Fan]	X	X	X		
X		X	X	○	X	X	○	X	X	X	○	X	○	X	X	X			
Judgment method	Refer to checking method, as shown below																		
Symptom	If the motor connector break away / Indoor unit Fan does not operate by motor or PBA defectiveness.																		

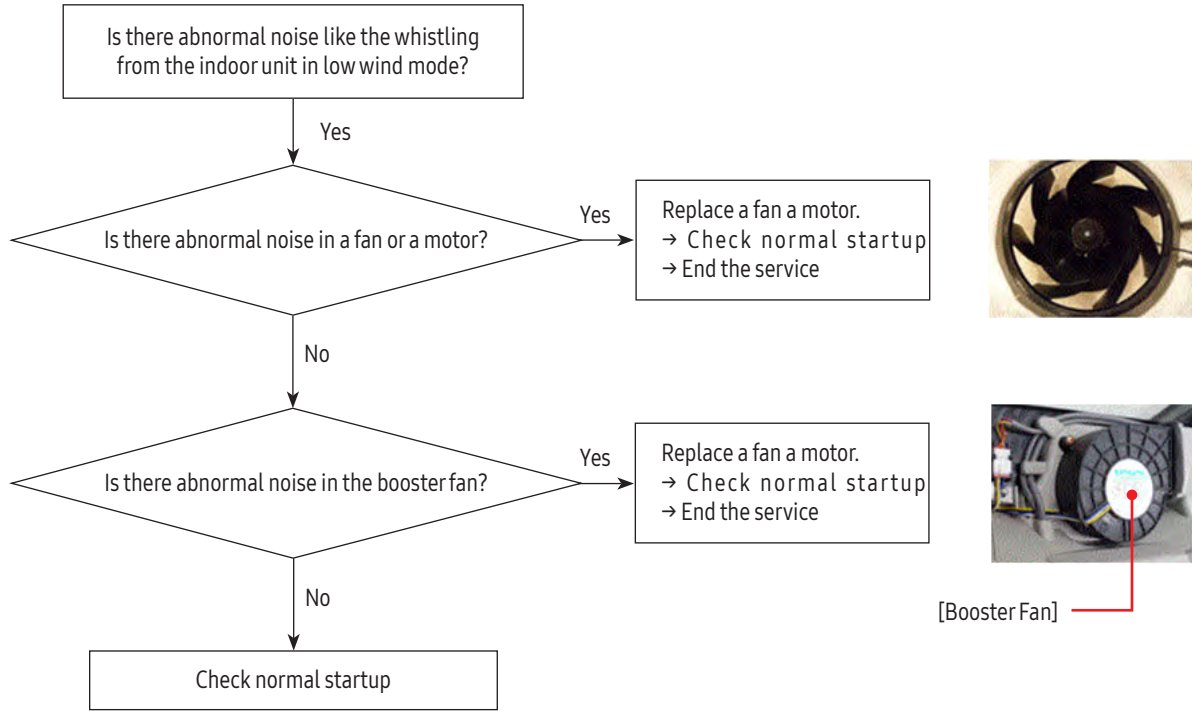

### 4-4-6. Communication error after finishing Tracking (E202)

Display	Outdoor Unit display		E202														
	Wired remote Control, Wind Free RAC		E202														
	Duct, 1way Cassette			4way Cassette, 4way Cassette(600x600)				MAX4			Console				360 Cassette		
	 Duct Blue Red 1way Blue Yellow X X		 or  or  or X	 or  or  or X	 X	 X	 X	 X	 X	 X	 X	 X	 X	 X	 X	 X	GRN ●
	Judgment method																
Symptom																	

### 4-4-7. The whistling noise from the indoor unit in low wind mode

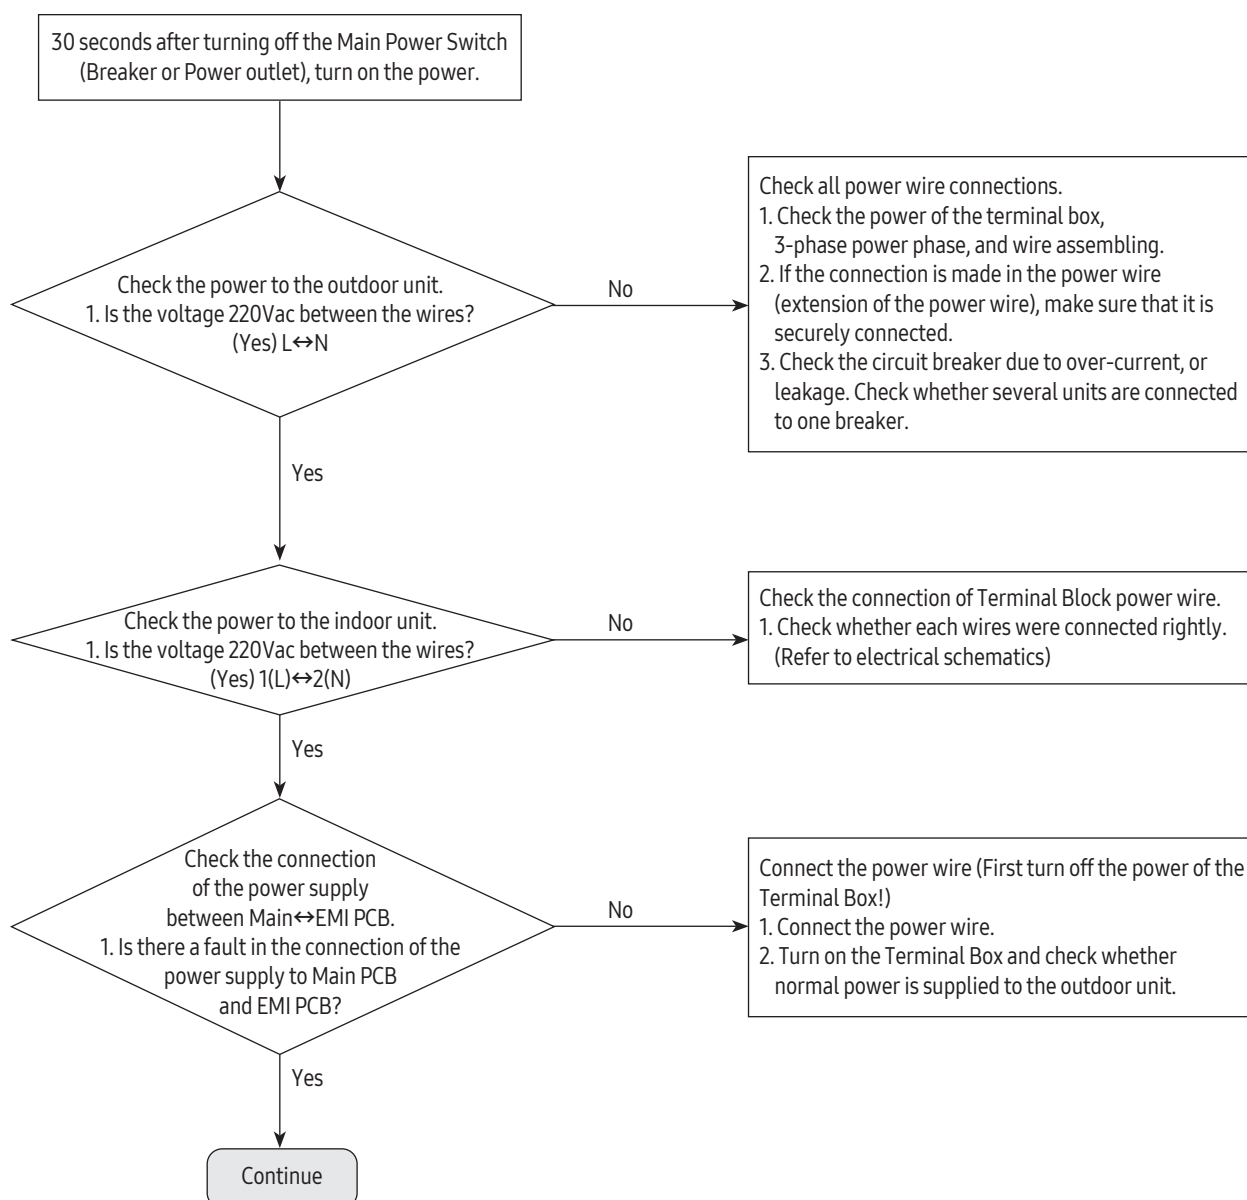

### 4-4-8. When the outdoor unit power is not ON - Initial Diagnosis : 1-phase products

1. Test items

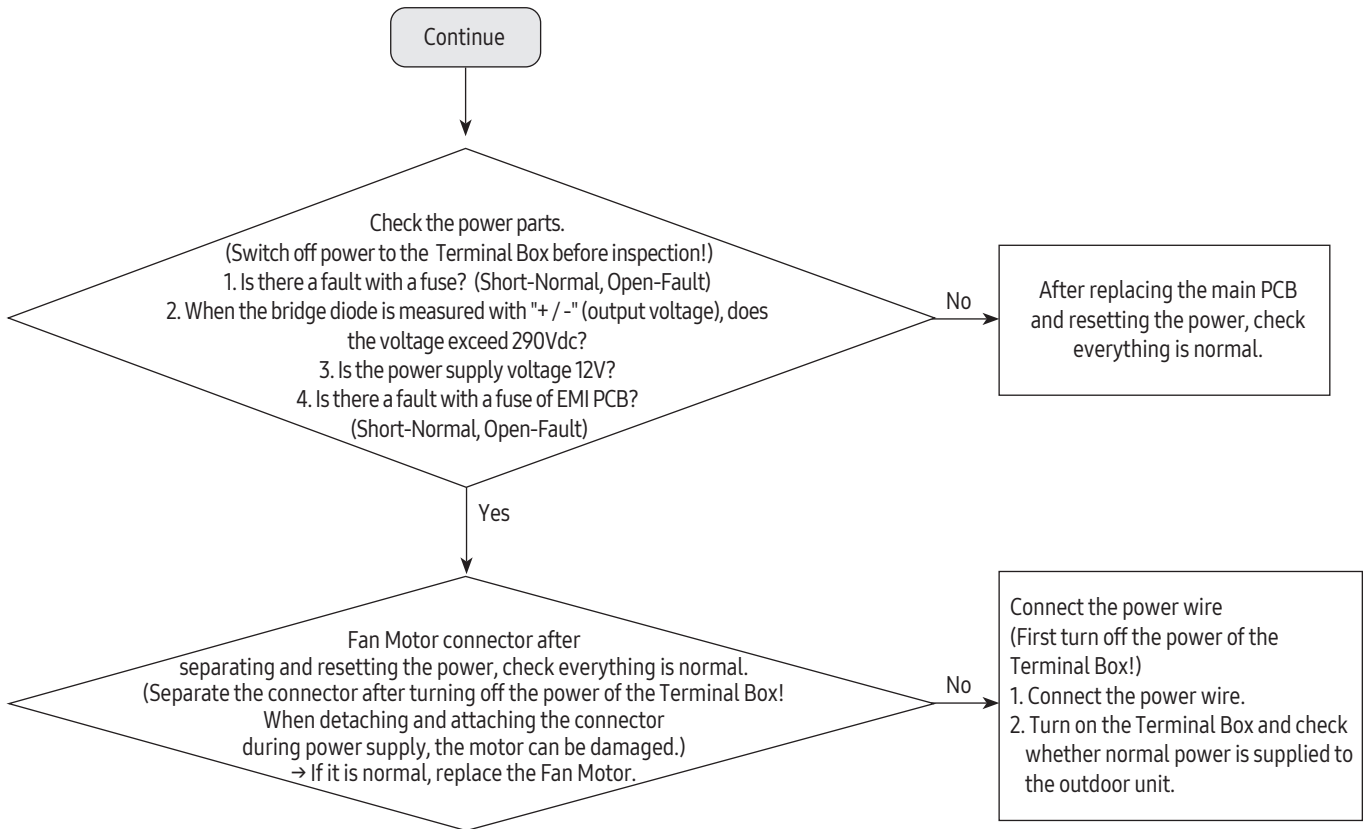

- 1) Check the power connection of outdoor unit.
- 2) Check the whole connection part of the power wire.
- 3) Check the power on the indoor unit.
- 4) Check the connection of the power wire of the Terminal Block.
- 5) Check the connection of the power wire between the Main ↔ EMI PBA of the outdoor unit.
- 6) Connect the power wire. (Never forget to turn off the power of the Terminal Box).
- 7) Check the power supply parts. (Check after turning off the power of the Terminal Box!)
- 8) Check everything is normal after separating the fan motor connector and resetting the power.  
(Separate the connector after turning off the power of the Terminal Box! When detaching and attaching the connector during power supply, the motor can be damaged.)

- 7-segment off.
- Conduct the following test if the mode is not Eco-mode (power saving mode).

2. Check procedure

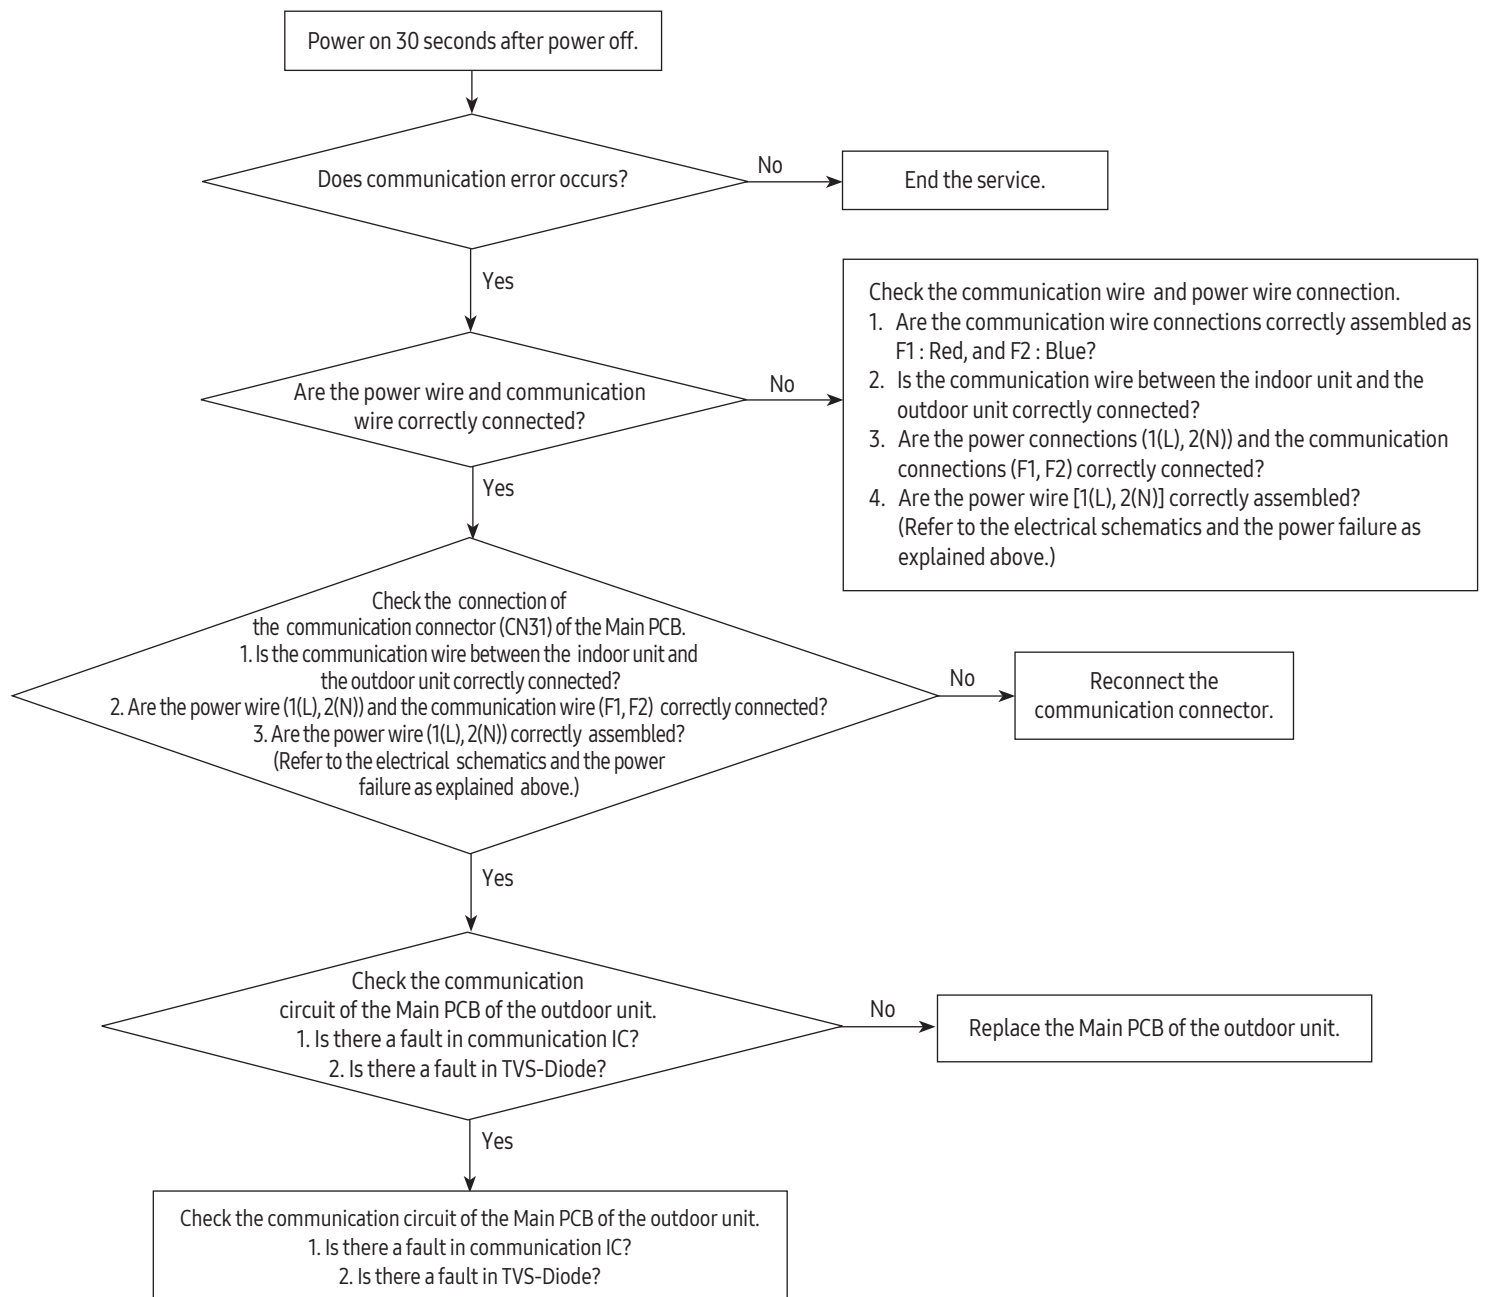

### When the outdoor unit power is not ON - Initial Diagnosis : 1-phase products (Cont.)

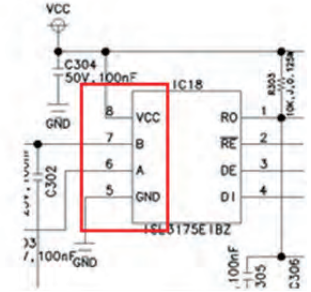

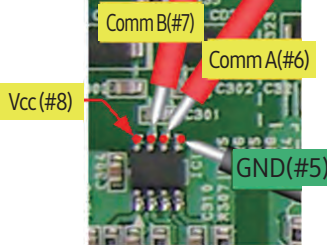

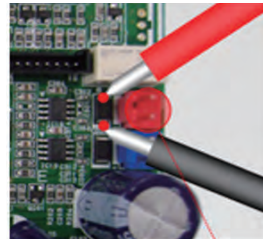

### 4-4-9. Indoor/outdoor communication error (2min.) (Error Code : E202)

Display	Outdoor Unit display		E202													
	Wired remote Control, Wind Free RAC		E202													
	Duct, 1way Cassette			4way Cassette, 4way Cassette(600x600)				MAX4			Console				360 Cassette	
	Duct Blue Red 1way Blue Yellow		or or or													GRN
	X	X			X	X			X	X			X			X
Judgment method	Refer to checking method, as shown below															
Symptom	Communication error between the indoor and outdoor unit for two minutes															

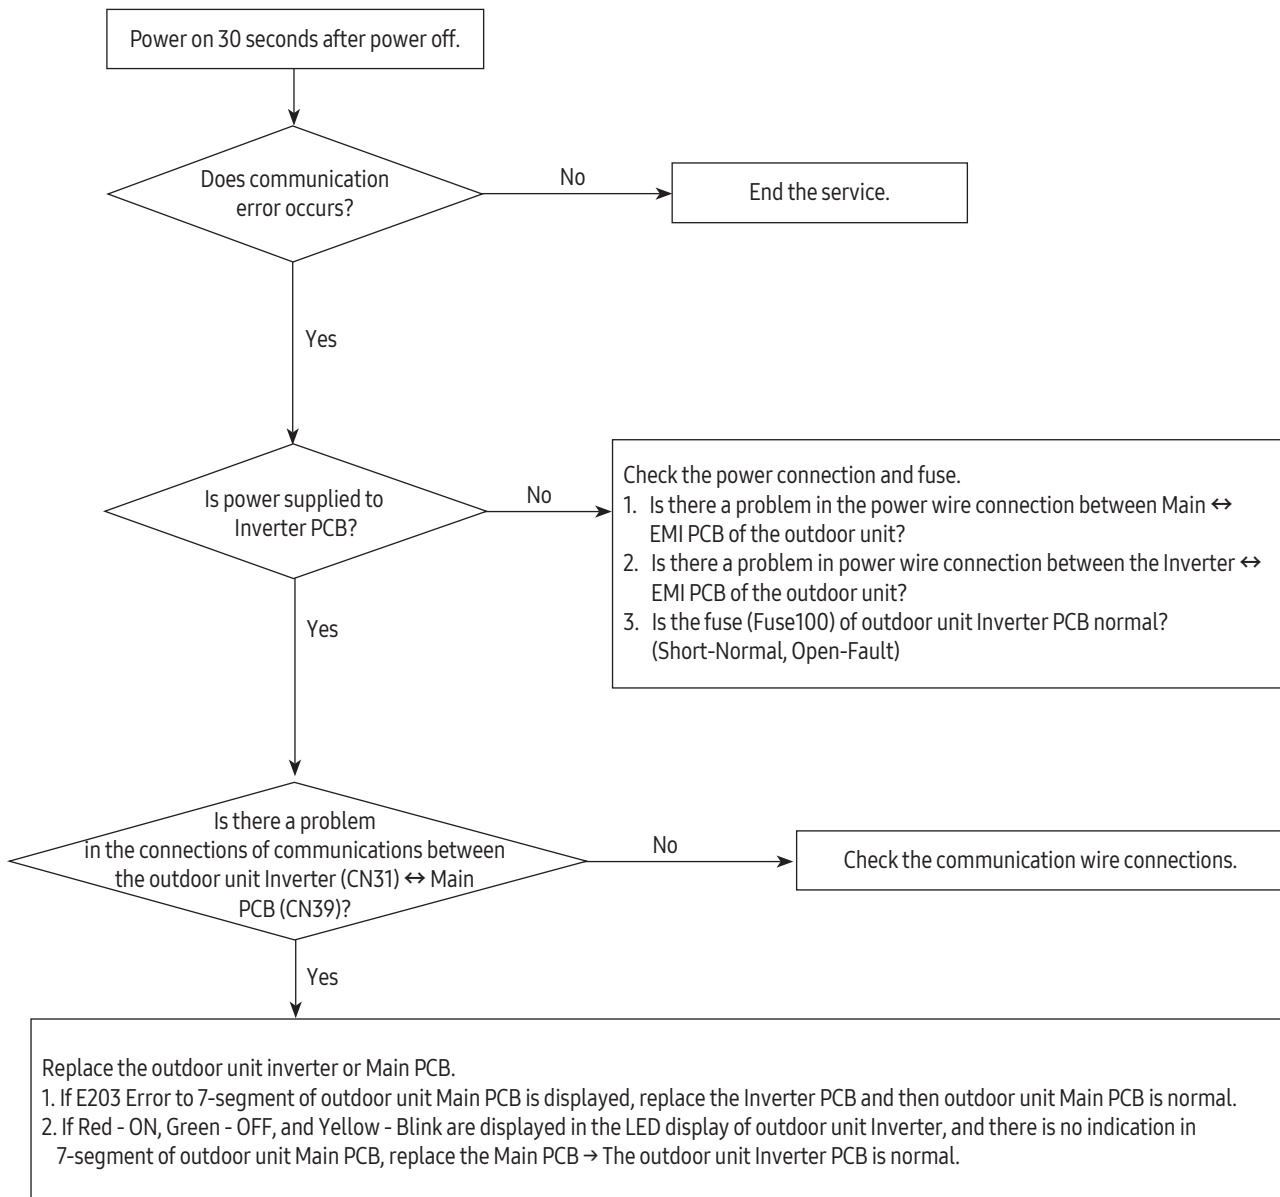

**Indoor/outdoor communication error (2 min.) (Error Code: E202) (Cont.)**

Measuring Part	Communication IC Measuring Part (Circuit Diagram)	Example of Measuring Communication IC	Example of Measuring TVS-Diode
Location			
Measuring Point	#5-GND, #6- Communication A, #7-Communication B, #8-Vcc		

Communication IC Measuring (Port)	Steady-state Measuring Value	Remark
	COM 1(RED)	
#6 - #5	0.9kΩ ~ 1.2kΩ	Measuring after separating the communication connection
#7 - #5	0.9kΩ ~ 1.2kΩ	
#8 - #5	4.7Vdc ~ 5.3Vdc	
TVS-Diode Measuring		Steady-state Measuring Value
Both ends of diode		1kΩ or above

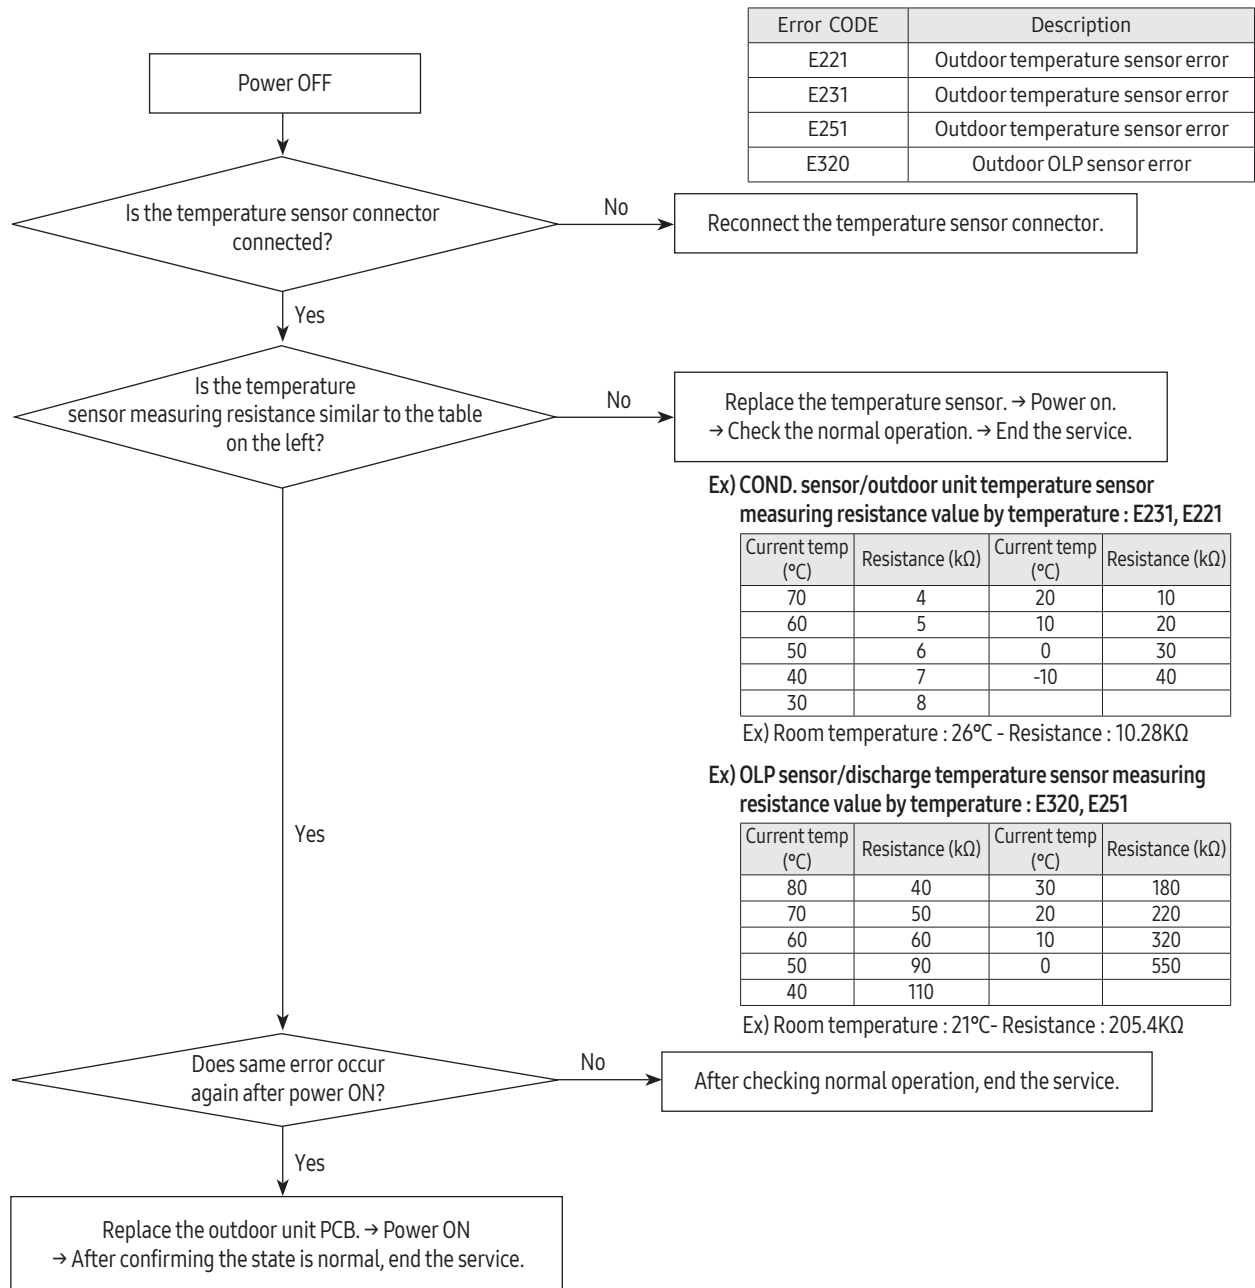

### 4-4-10. Communication error between outdoor unit INV ↔ MAIN MICOM (1 min.) (Error Code: E203)

Display	Outdoor Unit display		E203															
	Wired remote Control, Wind Free RAC		E203															
	Duct, 1way Cassette		4way Cassette, 4way Cassette(600x600)				MAX4			Console				360 Cassette				
	 Duct Blue   Red 1way Blue   Yellow		 or 	 or 	 or 													GRN ●
	X	X	●	●	X	X	●	●	X	X	●	●	X	●	●	X	X	
Judgment method																		
Refer to checking method, as shown below																		
Symptom																		
Communication error between the outdoor unit INV and Main Micom for one minutes																		

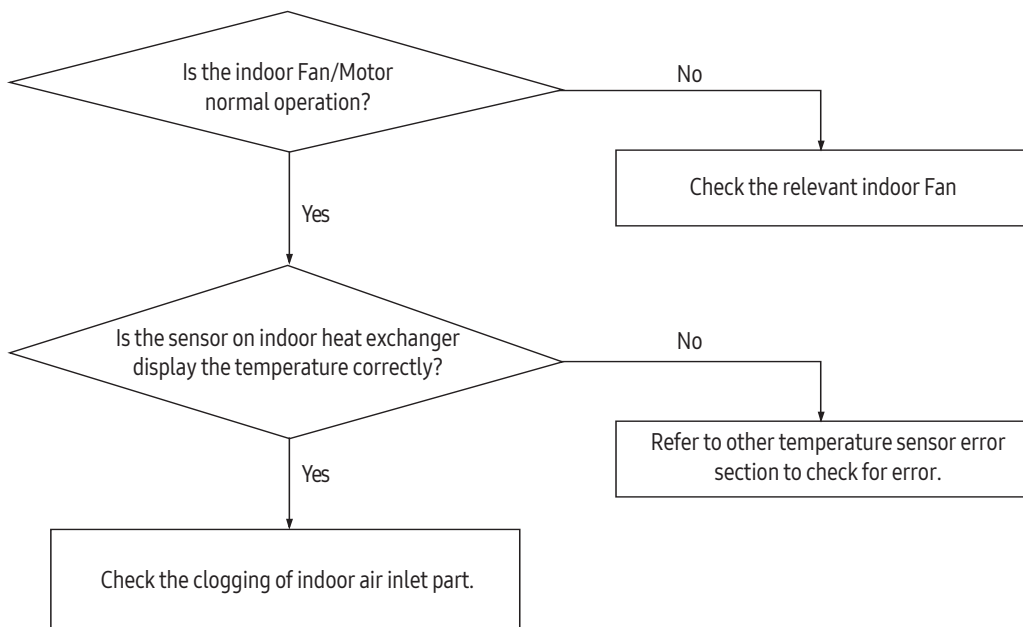

### 4-4-11. Outdoor sensor error(Error Code : E221, E231, E251, E320)

Display	Outdoor Unit display		E221,E231,E251,E320														
	Wired remote Control, Wind Free RAC		E221,E231,E251,E320														
	Duct, 1way Cassette		4way Cassette, 4way Cassette(600x600)				MAX4			Console				360 Cassette			
	Duct Blue   Red 1way Blue   Yellow		or 	or 	or 												
		X	X		X		X		X		X		X		X	X	
Judgment method	Refer to checking method, as shown below.																
Symtom																	

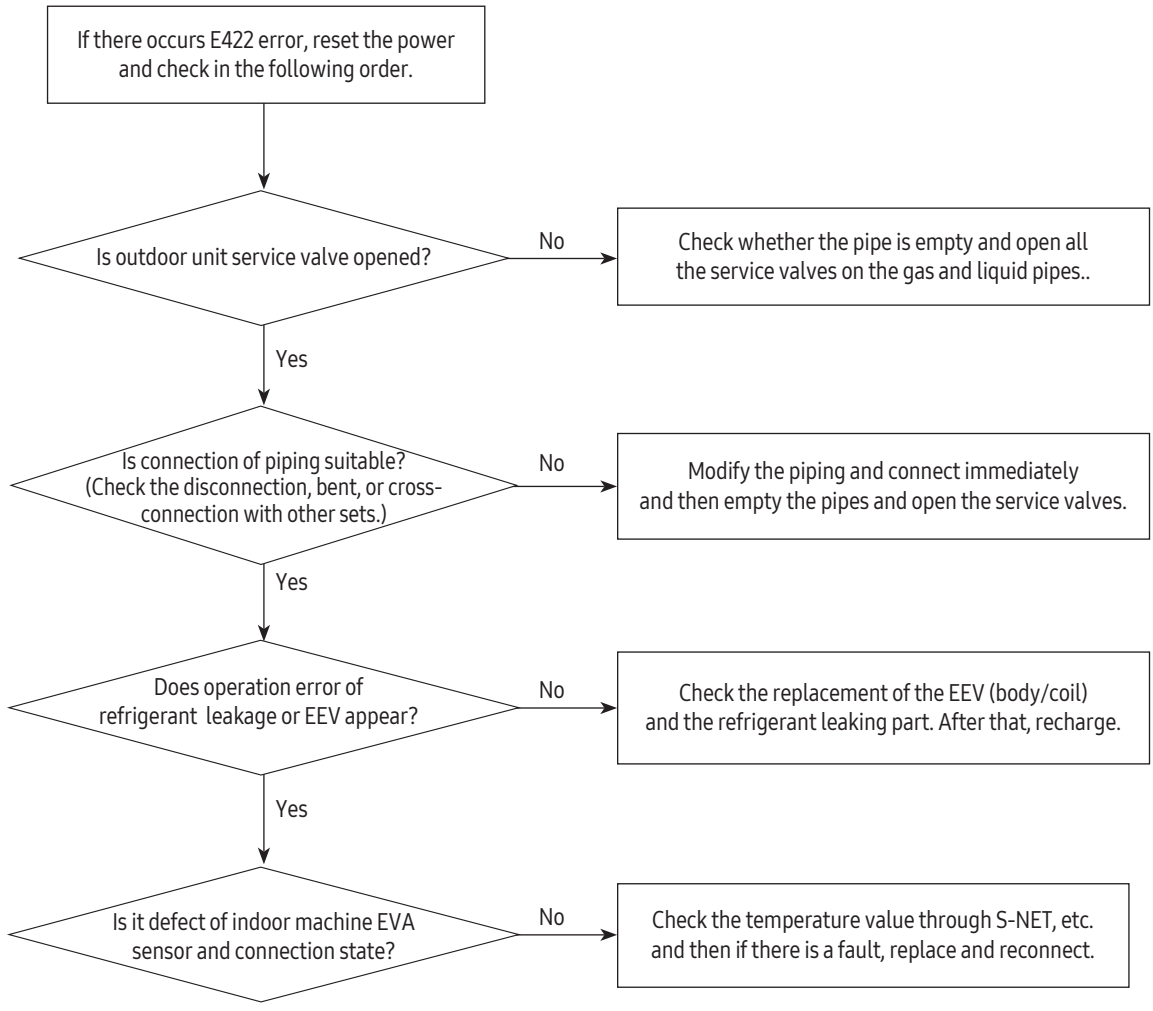

### 4-4-12. Compressor down due to freezing control (Error Code : E403)

Display	Outdoor Unit display		E403															
	Wired remote Control, Wind Free RAC		E403															
	Duct, 1way Cassette			4way Cassette, 4way Cassette(600x600)				MAX4			Console				360 Cassette			
	 Duct Blue Red 1way Blue Yellow		 or 	 or 	 or 													BLUE
	X	X				X											X	X
Judgment method	Refer to checking method, as shown below.																	
Symtom																		

### 4-4-13. Pipe blockage error (Error Code : E422)

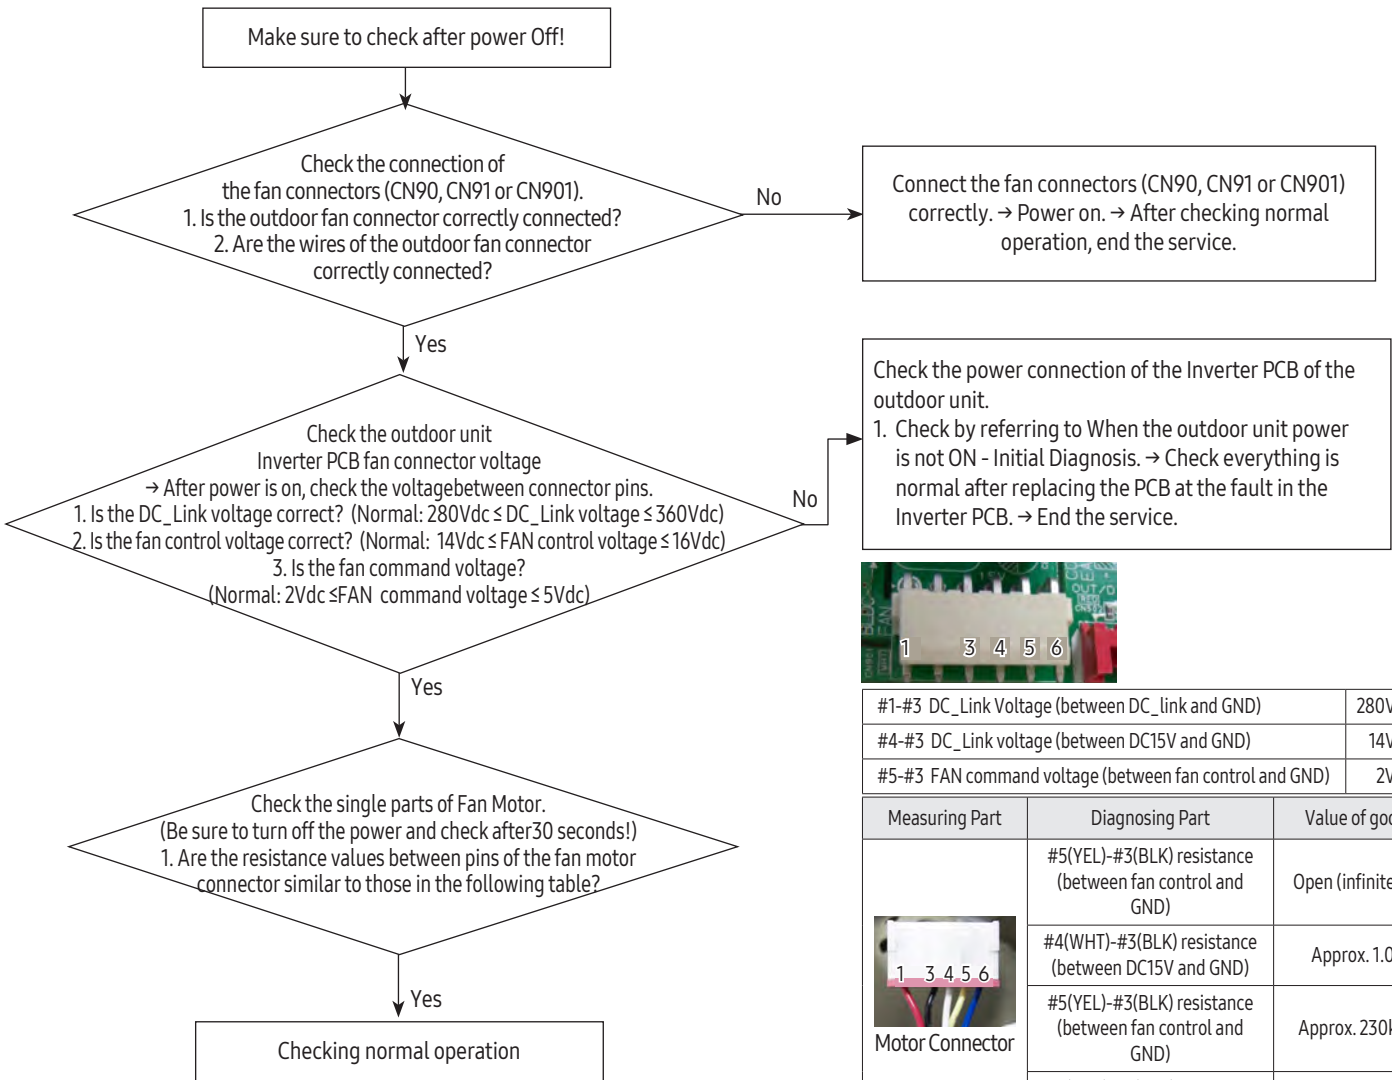

Display	Outdoor Unit display		E422															
	Wired remote Control, Wind Free RAC		E422															
	Duct, 1way Cassette			4way Cassette, 4way Cassette(600x600)				MAX4		Console				360 Cassette				
	 Duct Blue Red 1way Blue Yellow		 or 	 or 	 or 													BLUE 
	●	X	X	●	●	●	X	●	●	●	●	●	●	●	X	X	●	
Judgment method	Refer to checking method, as shown below.																	
Symptom																		

### 4-4-14. Outdoor unit Fan error (Error Code : E458, E475)

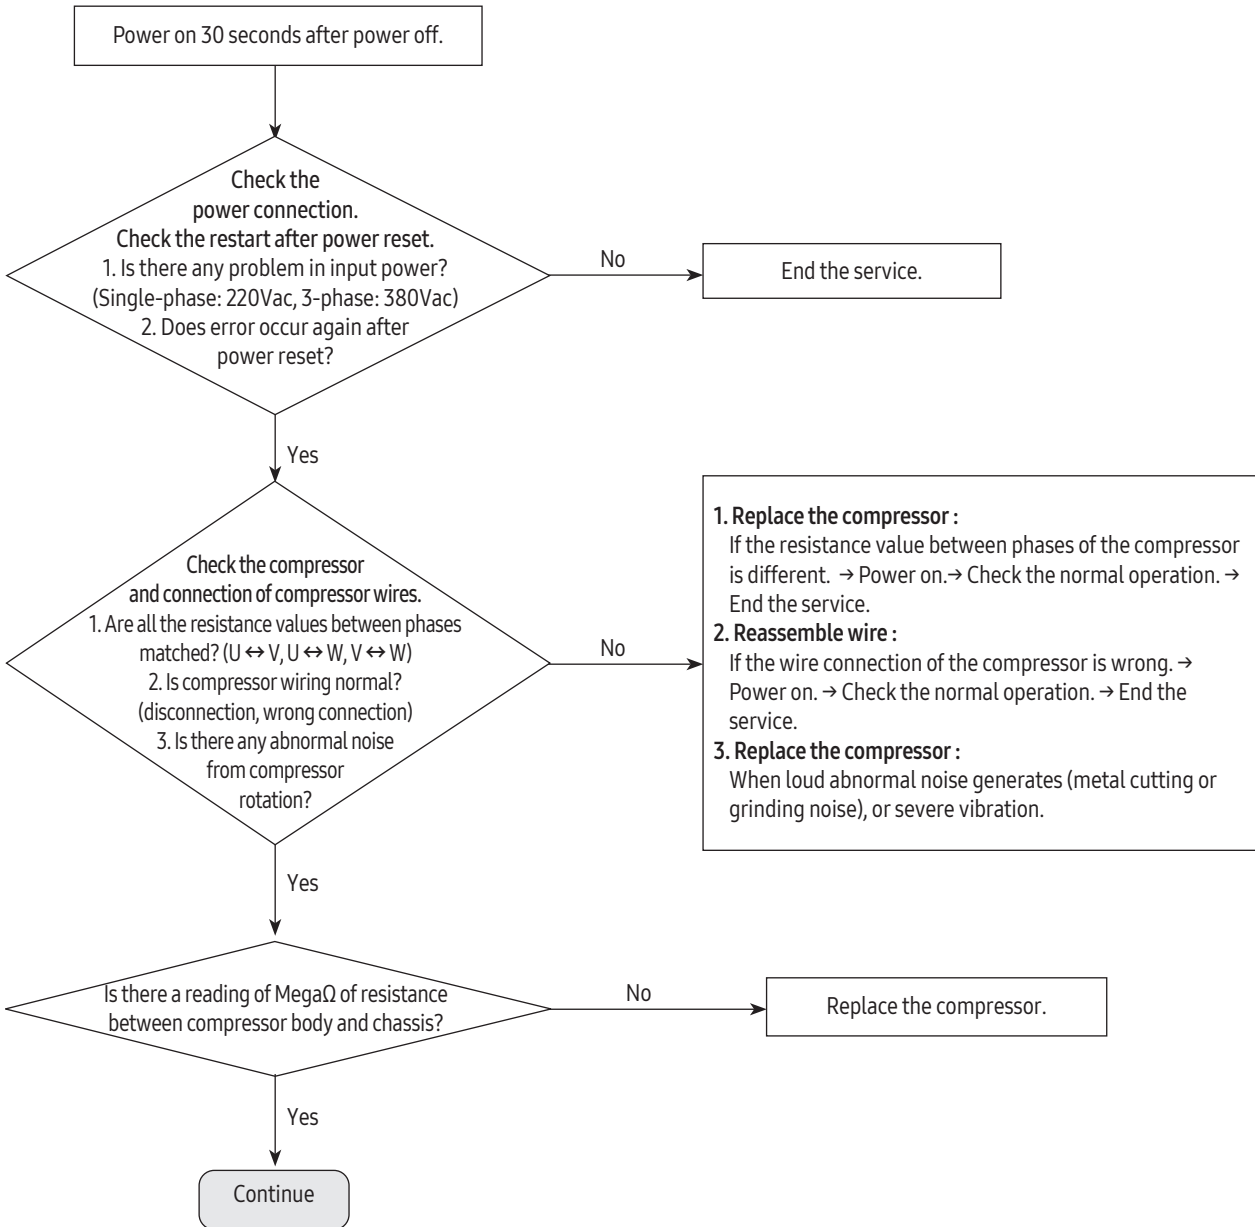

Display	Outdoor Unit display		E458, E475															
	Wired remote Control, Wind Free RAC		E458, E475															
	Duct, 1way Cassette			4way Cassette, 4way Cassette(600x600)				MAX4		Console				360 Cassette				
	Duct Blue Red		or ⌚	or 🌀	or 📊	⌚	⚠️	⌚	📊	⌚	⌚	TURBO	...	🌀	⌚	⚠️	●	BLUE ●
	1way Blue Yellow																	
X	X	●	●	●	X	●	●	●	●	●	●	●	●	●	●	X	X	
Judgment method	Refer to checking method, as shown below.																	
Symptom																		

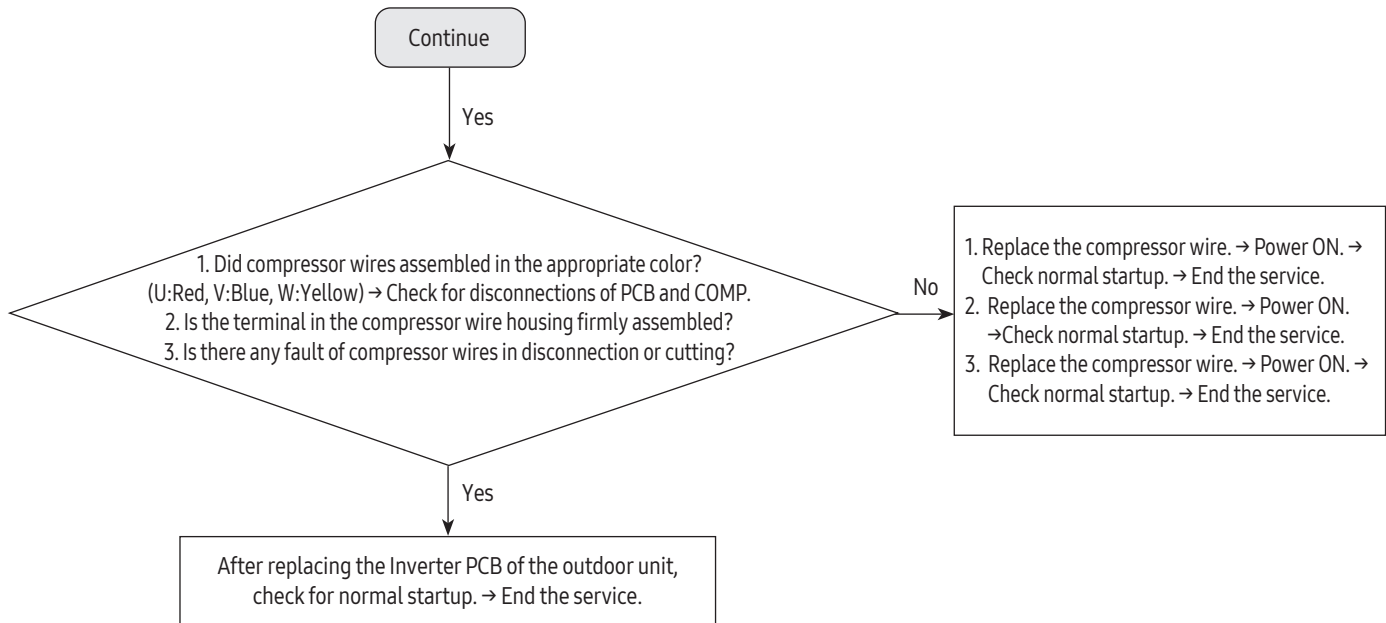

- ※ At least 30 seconds after power is OFF, attach/detach the fan motor connector!  
→ Threatened to cause secondary damage to the motor and the PCB.
- ※ Check the Inverter PCB or Fan Motor single parts and only if there is a fault, replace!
- ※ Do not replace the Main PCB of the outdoor unit relating to the fault in the Fan Motor!  
→ If the error is indicated on 7-segment of the Main PCB of the outdoor unit, the Main PCB of the outdoor unit has no fault.  
→ In case of a control problem, it is possible to solve with S/W update.

### 4-4-15. Compressor starting error / rotation error (Error Code : E461, E467)

Display	Outdoor Unit display		E461, E467															
	Wired remote Control, Wind Free RAC		E461, E467															
	Duct, 1way Cassette		4way Cassette, 4way Cassette(600x600)				MAX4			Console				360 Cassette				
	 Duct Blue Red 1way Blue Yellow		 or 	 or 	 or 													BLUE 
	X	X				X											X	
Judgment method	Refer to checking method, as shown below.																	
Symptom																		

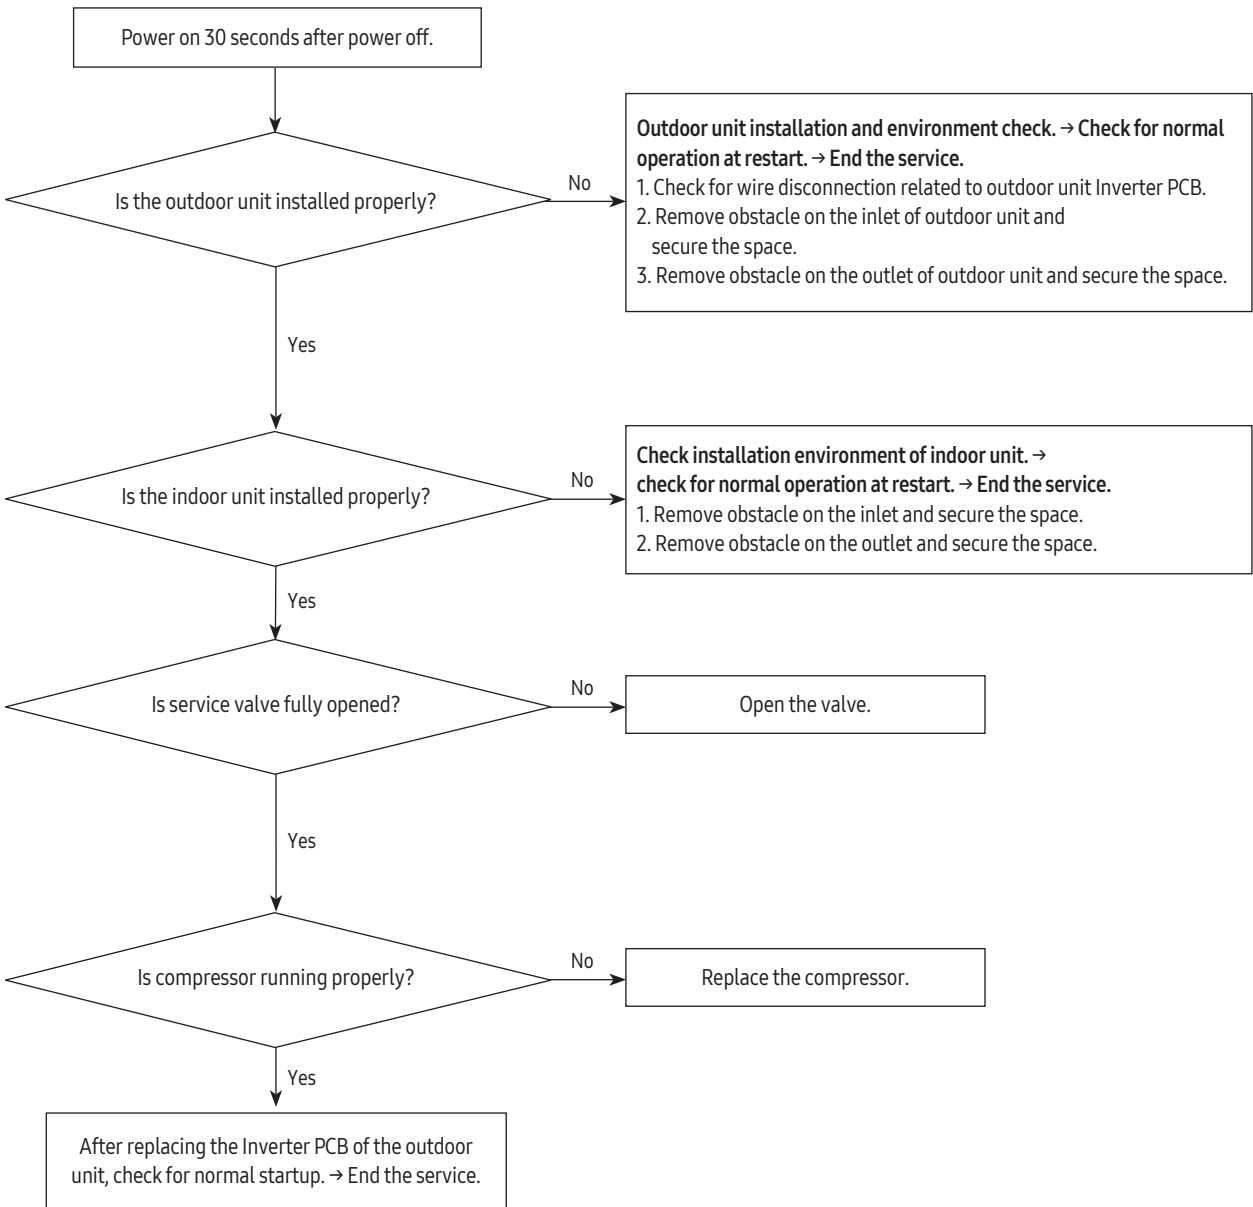

### Compressor starting error / rotation error (Error Code : E461, E467) (Cont.)

- ※ E461, E467 Error-related, EMI / outdoor unit Main / Indoor unit Main PCB do not replace!  
→ This error is related to the compressor and Inverter PCB. (Not related to the above PCB)
- ※ Ensure that the service valve is open!  
→ When the service valve is closed, the defects may be caused by differential pressure when starting the compressor.

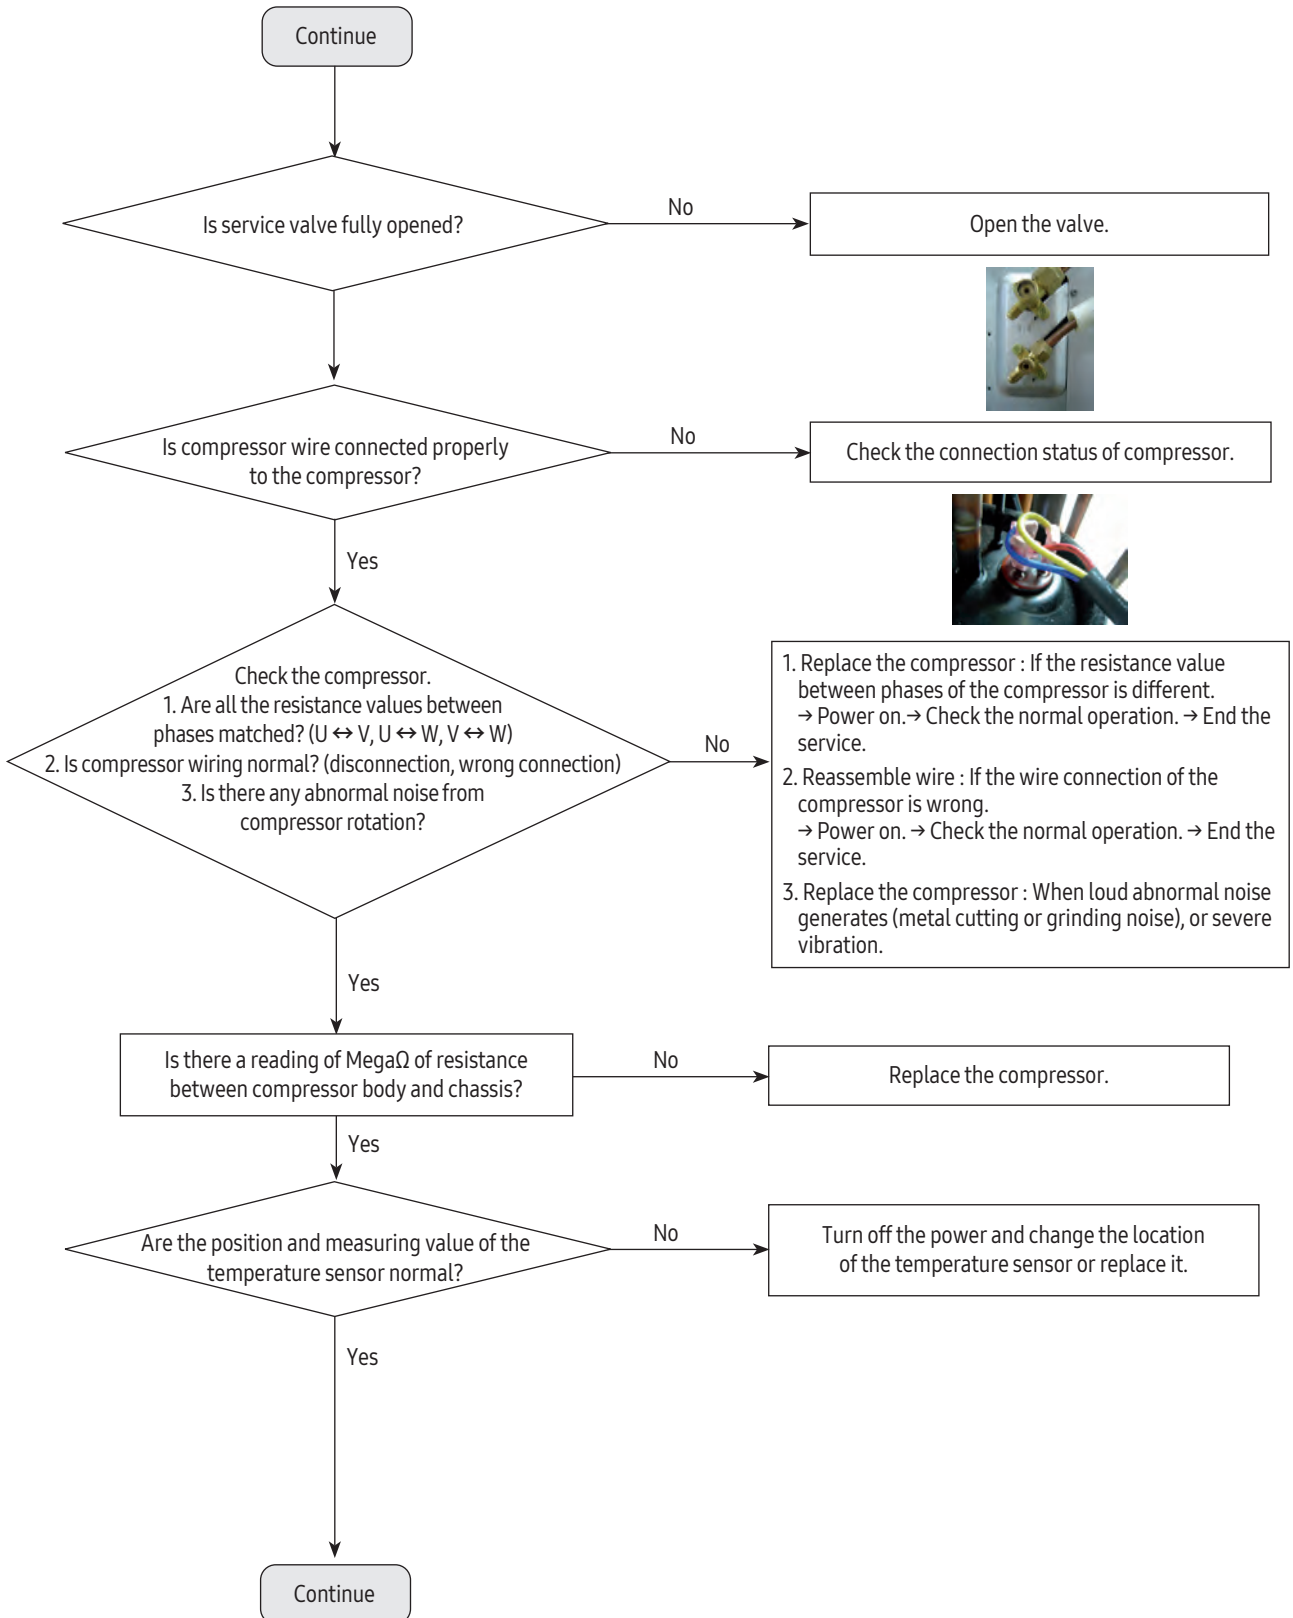

**4-4-16. Full current error / PFC over-current error (Error Code : E462, E484)**

Display	Outdoor Unit display		E462, E484														
	Wired remote Control, Wind Free RAC		E462, E484														
	Duct, 1way Cassette			4way Cassette, 4way Cassette(600x600)					MAX4			Console				360 Cassette	
	 Duct Blue Red 1way Blue Yellow		 or  or 	   	   	   	BLUE ●										
	X	X	●	●	●	X	●	●	●	●	●	●	●	●	●	●	X
Judgment method	Refer to checking method, as shown below.																
Symptom																	

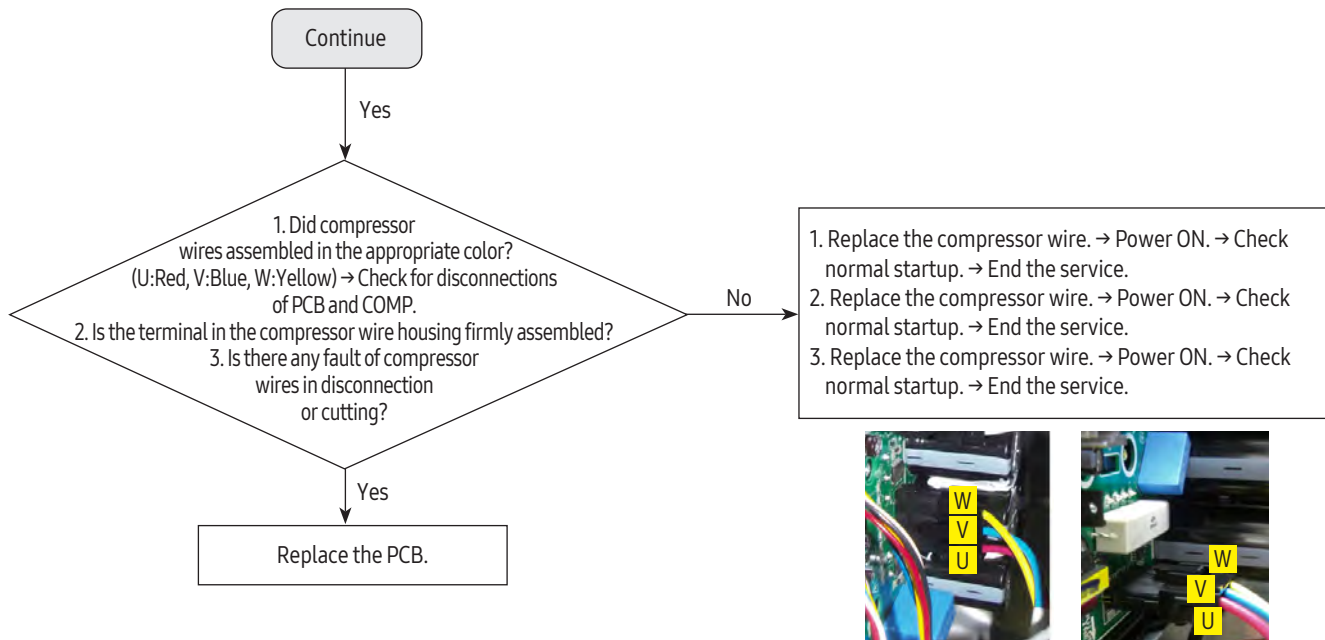

**IPM (Over Current) error (Error Code : E464) (Cont.)**

### IPM (Over Current) error (Error Code : E464) (Cont.)

- ※ E46 Error-related, EMI / outdoor unit Main / Indoor unit Main PCB do not replace!  
→ This error is related to the Inverter PCB. (Not related to the above PCB)
- ※ Ensure that the service valve is open!  
→ When the service valve is closed, the defects may be caused by differential pressure when starting the compressor.

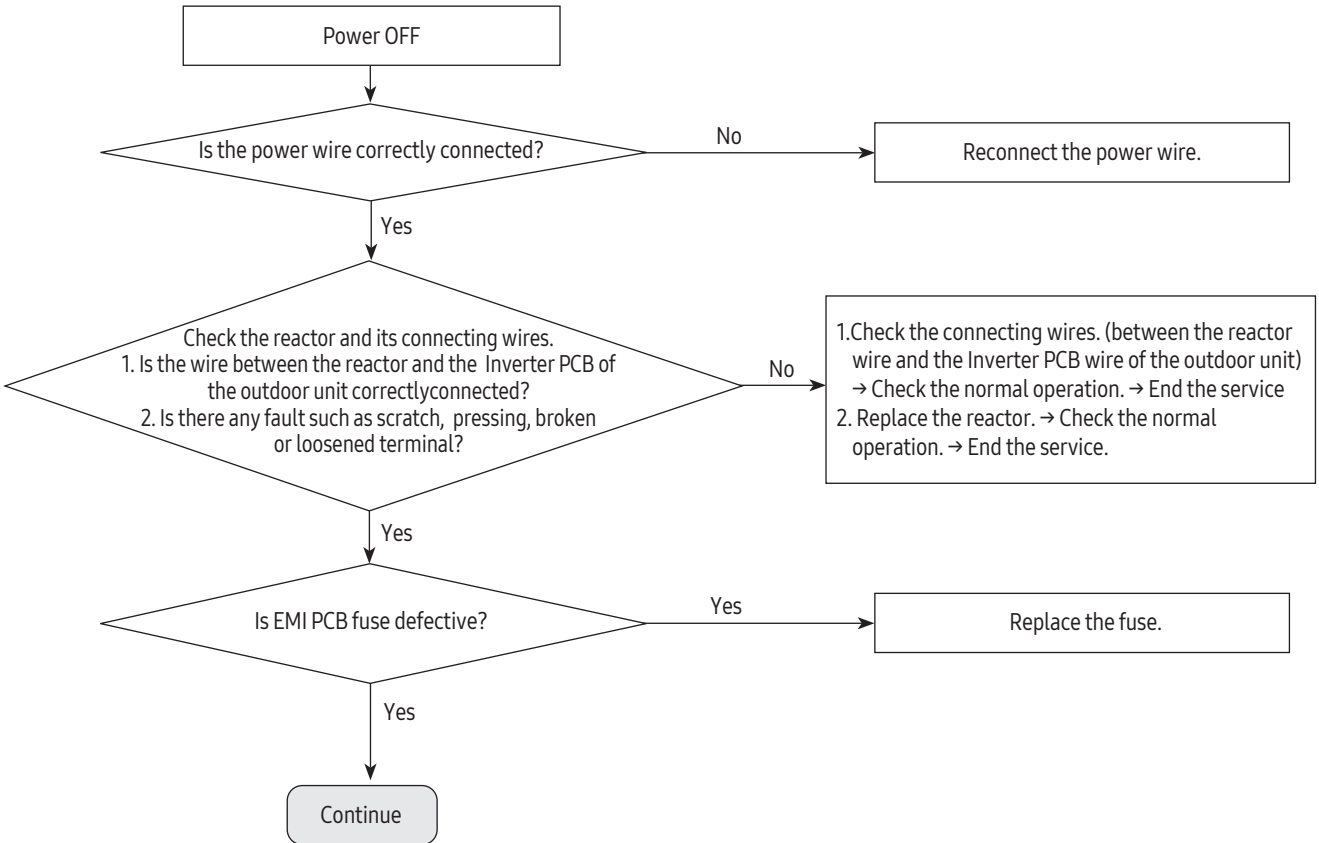

**4-4-18. DC LINK over-current / low-voltage error (Error Code : E466)  
H/W DC\_Link Over Voltage Error (Error Code : E483)  
AC Input Voltage Sensor Error (Error Code : E488)**

Display	Outdoor Unit display		E466, E483, E488																
	Wired remote Control, Wind Free RAC		E466, E483, E488																
	Duct, 1way Cassette					4way Cassette, 4way Cassette(600x600)				MAX4		Console				360 Cassette

	1way Blue Yellow																		⌚
X	X	●	●	●	X	●	●	●	●	●	●	●	●	●	●	●	●		
Judgment method																			
Symptom																			

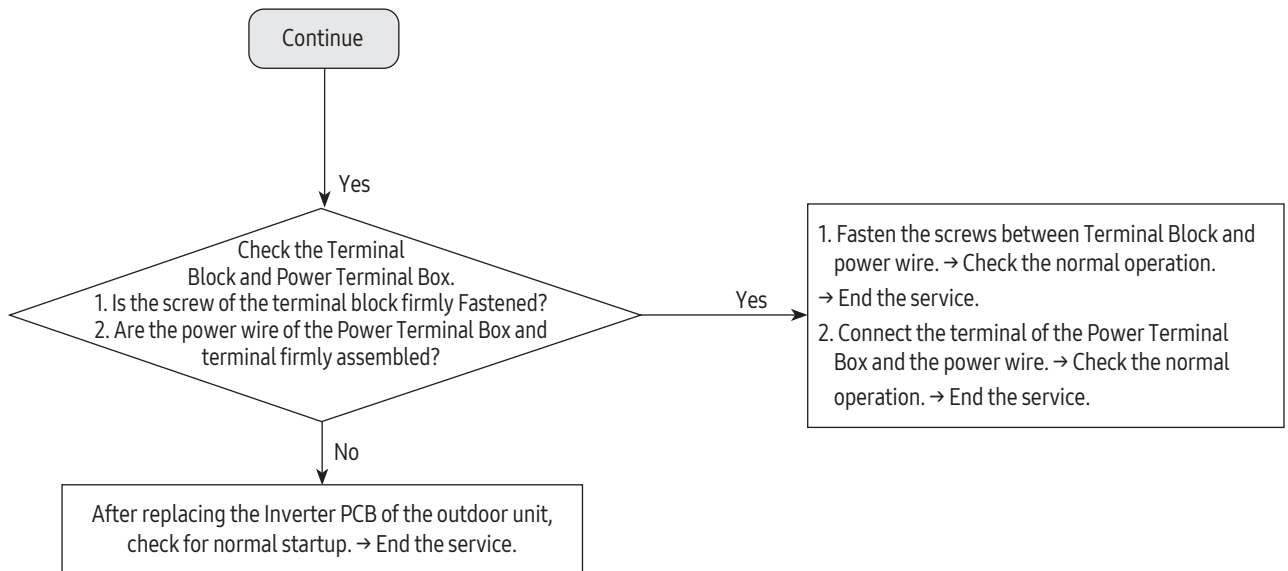

- Test items
  - Check the power connection. / Check the restart after power reset.
    - Is there a fault in input power? (Single-phase : 220Vac, 3-phase : 380Vac)
    - Does error occur again at operation after power is reset?
  - Check the connection of the power, and check whether the jointed power connection exists.
    - After having installed several units, please check that communication wires are not interchanged with piping.
  - Check the reactor and its connecting wires.
  - Check the fuses of EMI PBA.
  - Check the Terminal Block and Power Terminal Box and the wire assembly.

2. Check procedure

**4-4-18. DC LINK over-current / low-voltage error (Error Code : E466)  
H/W DC\_Link Over Voltage Error (Error Code : E483)  
AC Input Voltage Sensor Error (Error Code : E488)(Cont.)**

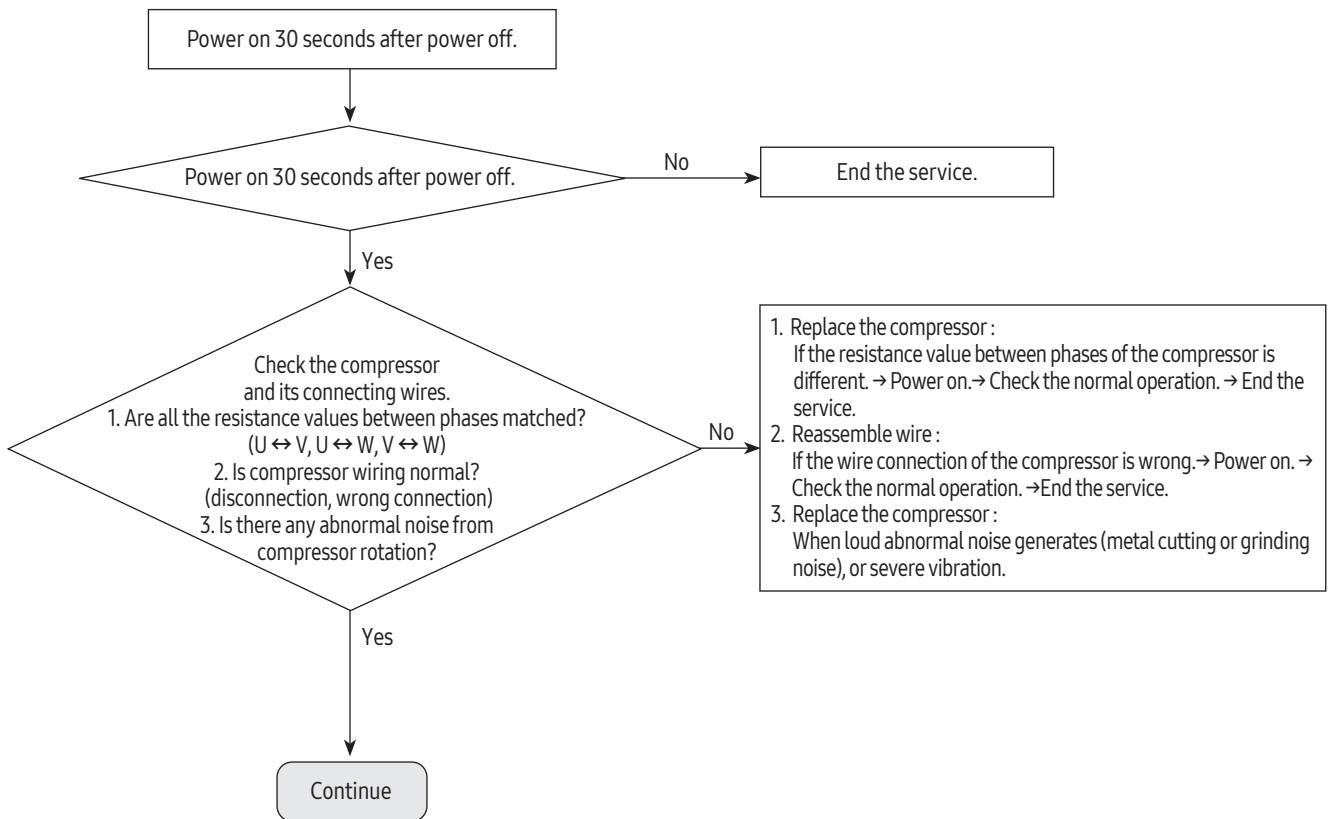

### 4-4-19. Gas leakage error (Error Code : E554)

Display	Outdoor Unit display		E554																
	Wired remote Control, Wind Free RAC		E554																
	Duct, 1way Cassette			4way Cassette, 4way Cassette(600x600)				MAX4			Console				360 Cassette				
	 Duct Blue Red 1way Blue Yellow		 or 	 or 	 or 													BLUE 	
	X	X				X													X
Judgment method																			
Symtom																			

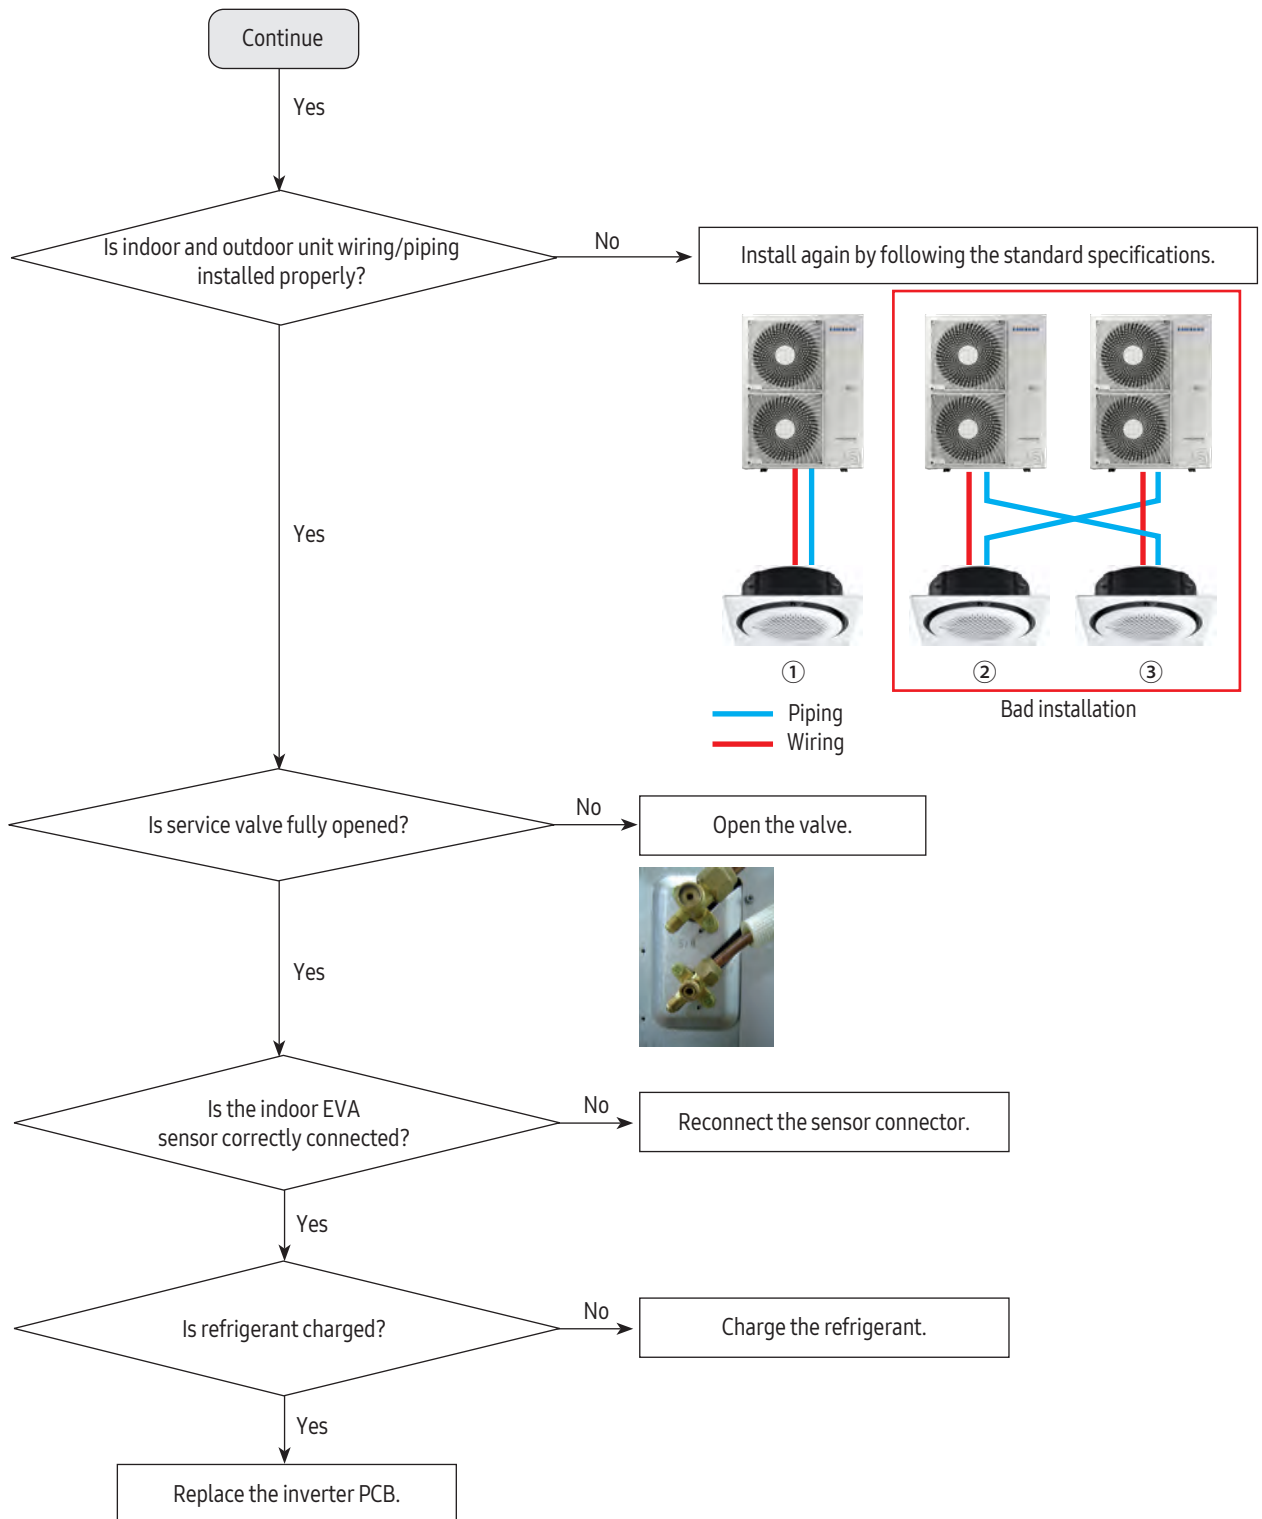

1. Test items

- 1) Check the power connection. / Check the restart after power reset.
  - Is there a fault in input power? (Single-phase : 220Vac, 3-phase : 380Vac)
  - Does error occur again at operation after power is reset?
- 2) Check the compressor and the state of compressor wire assembling.
- 3) Check the outdoor unit installation environment.
  - Check for disconnection of the wires regarding the Inverter PCB of the outdoor unit and check the installation environment.
  - At the site where several units were installed at the same time, check whether communication wire and pipes have been wrongly connected!

2. Check procedure

### Gas leakage error (Error Code : E554) (Cont.)

#### 4-4-20. Others

1. EEPROM option error (E163) : Reset the options.
2. Temperature fuse error : E198
  - If the Terminal Box temperature rise fuse is disconnected, replace the PCB.
  - Check the wiring connector of temperature fuse.
3. Current sensor error : Upload EEPROM to the Main PCB of the outdoor unit.
  - After checking for normal operation of PCB, replace the inverter PCB.
4. Compressor Vlimit error : E465
  - If the compressor is abnormally run, replace the compressor and then ensure that it works normally.
  - If the compressor is normally run, check the assembling between the heatproof plate and the Inverter PCB and then if there is no abnormality, replace the Inverter PCB.
5. DC link voltage sensor error : E469
  - Error occurs when DC LINK value is not normal (DC LINK VOLTAGE: 280~320V)
  - Check the value of DC link when error occurs and check the reactor disconnection
6. EEPROM read/write error : E470
  - Error occurs when there is no EEPROM data in the set.
  - Check the model name and insert EEPROM for corresponding model or load the EEPROM data.
7. Input current sensor error : E485
  - Detect the input sensor while the set is in stop status to check if there's any problem.
  - When error occurs, turn on/off the power for number of time and if same error occurs while the power is off, replace the Inverter PCB.
8. OTP error : E471
  - Upload EEPROM to the Main PCB of the outdoor unit.
9. Capacity inconsistency error : E556
  - Check the model name between the outdoor and indoor unit and re-enter the option code to the indoor unit.
10. 3-phase power wire disconnection : E424
  - Check for disconnection of the 3-phase (open) power wire, and check the disconnected EMI PBA fuse.
11. Outdoor unit freezing detection (at the stop of the compressor) : E403  
 Outdoor overload protection control (at the stop of the compressor) : E404
  - Check whether the fan and the motor operate normally.
  - Check the operation of EEV.
  - Check the temperature sensor of the indoor unit heat exchanger.
  - Check the indoor unit inlet blockage.
12. Outdoor unit compressor discharging temperature protection control : E416
  - Check for lack of refrigerant.
  - Check the blockage of the solenoid valve.
  - Check the malfunction of the exhaust temperature sensor.
  - Check the EEV.
13. Error of impossibility to operate Heating at outdoor temperature exceeding 30°C : E440  
 Error of impossibility to operate cooling at outdoor temperature of -5°C or under : E441
  - It is not the error code in the product and it is a specification to protect the product by limiting the temperature scope of use.
  - Use by referring to the temperature scope of use on the product manual, etc.

## Others (Cont.)

14. OLP overHeating and compressor stop : E463
  - Check the opening of the sub valve.
  - Check the amount of the cooling water.
  - Check the OLP sensor.
15. Current sensor error : E468
  - Check the EEPROM data.
  - Check the PCB operation.
16. IPM (IGBT Module) or PFCM temperature sensor error : E474  
 IPM overheat error for outdoor unit inverter compressor : E500
  - Check whether IPM is correctly assembled on the heatproof plate.
  - Check whether the inlet is blockage.
  - If there is a defect, replace the IPM.
17. How to check Booster Fan
  - 1) In case of do not not operate 1 Booster Fan  
 Action method : Remove the Booster Fan connector wire and cross-assembling the another Booster Fan wire and then horizontally or intermediate or swing operate.

Type ① : When the existing Booster Fan does not operate, replace the Booster Fan.

Type ② : If type ① is not defective, Booster Fan Wire 4 (Blue Wire), 3 (Black Wire) pin voltage :  
 When it is more than 2.7V, replace the PCB.

- PIN No.1 : VCC (YELLOW/+)
- PIN No.2 : SIGNAL (WHITE)
- PIN No.3 : GROUND (BLACK/-)
- PIN No.4 : PWM (BLUE)

## Others (Cont.)

2) In case of do not operate 3 Booster Fan (all Fan)

Action method : horizontally or intermediate or swing set up.

Type ①: Booster Fan Wire 1 (Yellow Wire), 3 (Black Wire) pin voltage :  
When it is less than DC12V, replace the PCB.

PIN No.1: VCC (YELLOW/+)  
PIN No.2: SIGNAL (WHITE)  
PIN No.3: GROUND (BLACK/-)  
PIN No.4: PWM (BLUE)

Type ②: If type ① is not defective, Booster Fan Wire 4 (Blue Wire), 3 (Black Wire) pin voltage :  
When it is more than 2.7V, replace the PCB.

PIN No.1: VCC (YELLOW/+)  
PIN No.2: SIGNAL (WHITE)  
PIN No.3: GROUND (BLACK/-)  
PIN No.4: PWM (BLUE)

Type ③: If type ② is not defective, Booster Fan Wire 2 (White Wire), 3 (Black Wire) pin voltage :  
When it is approximately 5V, replace the PCB.

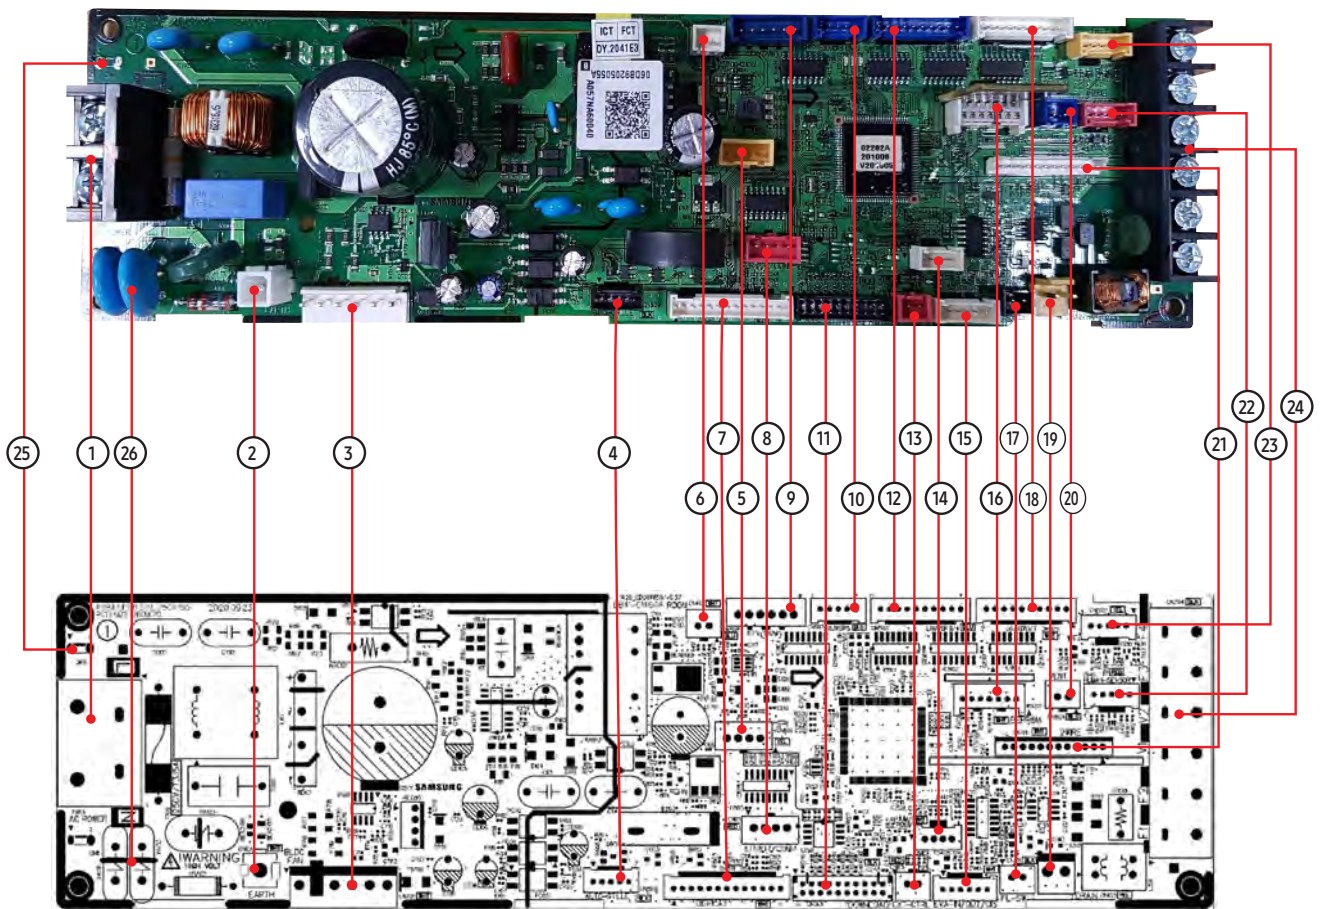

PIN No.1: VCC (YELLOW/+)  
PIN No.2: SIGNAL (WHITE)  
PIN No.3: GROUND (BLACK/-)  
PIN No.4: PWM (BLUE)

## 5. PCB Diagram and Parts List

### 5-1. Indoor Unit Main PBA

■ 1way Cassette, 4way Cassette, 4way Cassette(600x600) :

## 7-1. Index for Model Name

### 7-1-1. Indoor Unit

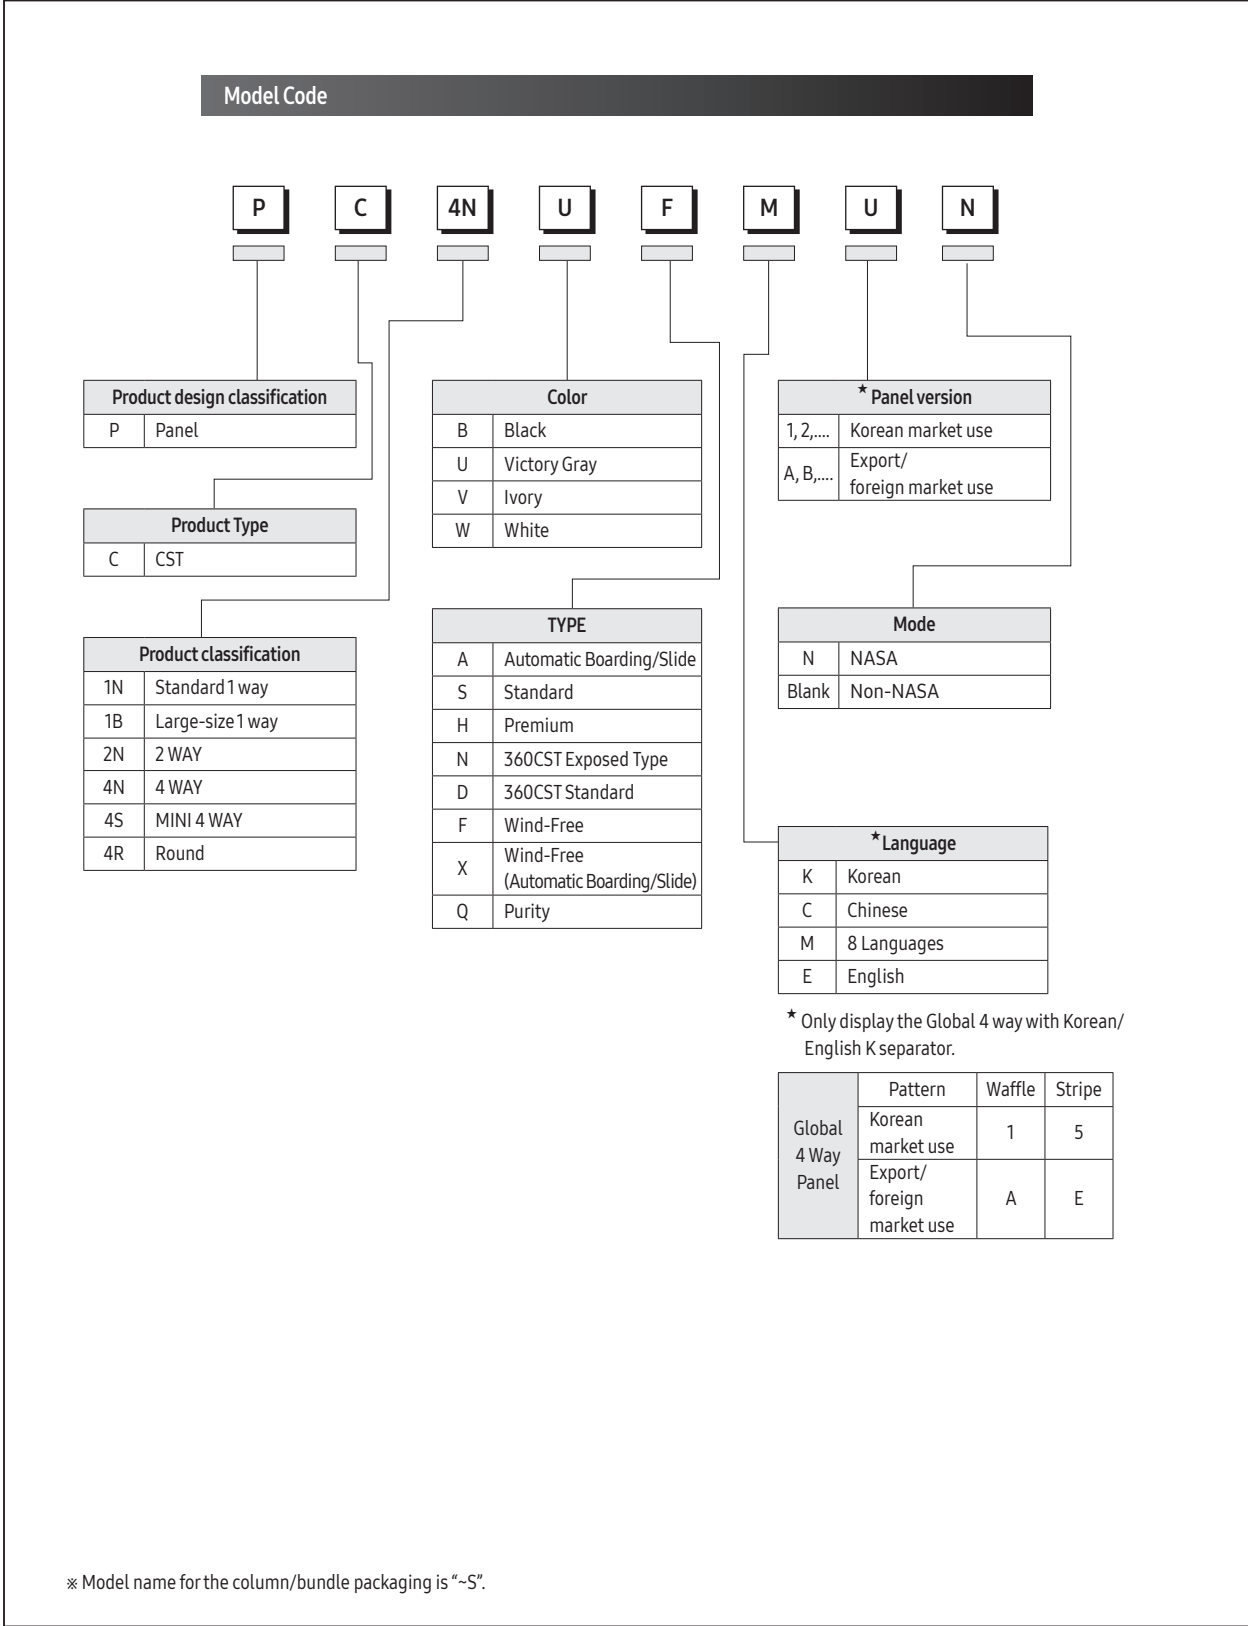

## Index for Model Name (cont.)

### 7-1-2. Outdoor Unit

# Index for Model Name (cont.)

## 7-1-3. Panel

## 7-2. Refrigerating Cycle Diagram

### ■ CONDENSER

High temperature and high pressure gas state refrigerant discharged from the compressor is converted to a liquid state as it is cooled down by the heat emission in the outdoor condenser unit, and sent to the evaporator.

### ■ COMPRESSOR

Low temperature and low pressure refrigerant is compressed and sent to the cycling system.

### ■ EVAPORATOR

Liquid refrigerant sucked in through the capillary tubes cools down the room by absorbing the surrounding heat as it evaporates (converting from liquid to gas). (Absorbing heat required for evaporation)

### ■ SERVICE VALVE

You can open the valve by turning the need valve counterclockwise using hex wrench, and it is used for vacuum, gas purging, refrigerant injection, refrigerant purging, and indoor-outdoor unit connection.

### ■ ACCUMULATOR

Accumulator prevents the flow of liquid-state refrigerant into the compressor. (Liquid-state refrigerant flowing into the compressor will overload the compressor.)
