

Chimney Lining Systems & Direct Vent

Z-FLEX® Aluminum Liner Kits and Connectors

Aluminum Chimney Gas Liner Kits GAS APPLICATIONS

Z-FLEX® Aluminum Chimney Liner Kits come complete with everything needed to quickly and easily install a professional venting system.

Z-FLEX® liner is manufactured using a dead soft aluminum strip which is spirally wound and mechanically joined together forming an air-tight and leakproof Triple Lock™ seam.

Z-FLEX®'s specially designed corrugations provide excellent flexibility while maintaining superior crush strength. The result is a clearly superior product offering incredible longevity.

Aluminum Liner Kit Includes:

2-Ply Aluminum Liner Chimney Flashing Rain Cap Mortar Collar 3 Screws

Part No.: 2GACKIT Dia.: | Lath.:

Dia.:____ | Lgth.:___ Dia.: 3", 4", 5", 6", 7", 8", 10"

Lengths: 15' - 50'

- Patented Triple Lock® design for strength
- Right sized packaging to lower shipping costs
- Best available materials/alloys

- 40+ years of manufacturing experience
- "Immediate" availability (24–72 hour lead time)
- Listed by Underwriters Laboratories

Gas Fireplace Kit Includes:

2-Ply Aluminum Liner Chimney Flashing Rain Cap Fireplace Adapter (Single Appliance)

3 Screws

Part No.: 2GAFKXX

Dia.: ____ | Lgth.: ___ Dia.: 3", 4", 5", 6", 7", 8", 10"

Lengths: 15' - 50'

Z-FLEX Insul-liner®

Pre-Insulated Chimney Liner for Category 1 Natural Draft Gas Heating Equipment & Gas Fireplaces

- Insul-Liner® is another "simple solution" from Z-FLEX®. The National Fuel Gas Code (NFPA 54, ANSI Z223.1) recommends that liners be insulated in certain situations.
- A good rule of thumb is to use an insulated liner in exterior chimneys or when a brick chimney has no clay liner at all. The insulation will keep the flue gases warm to prevent condensation. Also refer to the equipment manufacturer's instructions for their recommendations.
- Insul-Liner® replaces B-Vent when relining a masonry chimney.
- Insul-Liner® is insulated at the factory and protected with an outer aluminum jacket. This eliminates the time needed to insulate on the job site and prevents damage to the insulation during installation. Simply remove from the box and install

Insul-liner® Kit Includes:

Insulated Aluminum Liner Chimney Flashing Rain Cap Mortar Collar 3 Screws

Part No.: 2GIAKXX

Dia.: ____ | Lgth.:___ Dia.: 3", 4", 5", 6", 7", 8"

Lengths: 15'

Insul-liner® Gas Fireplace Kit Includes:

Insulated Aluminum Liner Chimney Flashing Rain Cap Fireplace Connector 3 Screws

Part No.: 2GIAFKX

Dia.:____ | Lgth.:_ Dia.: 4", 5", 6" Lengths: 15'

Fireplace Connector

Gas Fireplace Kits only. Part No.: 2ZSCPRP

Dia.: 3", 4", 5", 6", 7", 8"

Nose Cone

Part No.: 2NCXXXX

Dia.: 3", 4", 5", 6", 7",

8", 10"

Galvanized Y

Part No.: 2GAYXXX

Dia.: ___ | Lgth.: ___ Dia.: 3", 4", 5", 6",

7", 8"

Connects two vent connectors to

common vent.

Liner Coupling

Part No.: 2CNNTRG

Dia.:

Dia.: 3", 4", 5", 6", 7", 8", 10" Custom sizes available. Used to attach two lengths of vent.

Universal B-Vent

Connector

Part No.: 2CNNBFC

Dia.:

Dia.: 3", 4", 5", 6", 7", 8", 10" Connects any B-Vent to Z-FLEX® liner.

Part No.: 2GAXXXX

Dia.:____ | Lgth.:_

Dia.: 3", 4", 5", 6", 7", 8", 10" Available in multiples of 5' to 50'.

Z-FLEX® Features and Benefits

Z-Flex® Triple Lock® - Manufactured from 316Ti, titanium stabilized, nickel, chromium, molybdenum stainless steel. Excellent resistance to the corrosive effects of flue gases. Suitable for extended periods at elevated temperatures without compromising corrosion resistance. A superior 29-4C grade stainless steel option is also available for conditions requiring greater resistance to acidic attack.

Construction - Triple Lock® Joint System; acknowledged to be the best available for strength and longevity. Stainless steel strip is spirally wound and mechanically joined together forming an air tight and leakproof **Triple Lock®** seam.

The corrugated outer wall provides crush protection during installation. The thin walled corrugated construction conducts heat quickly, aiding draft and discouraging the buildup of soot and other potentially corrosive residue.

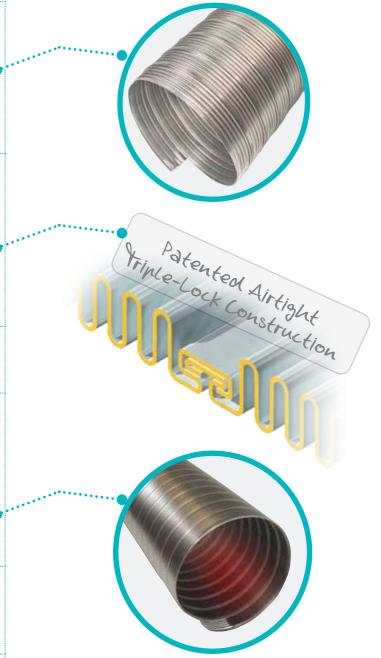

Dimensions - Available in a range of sizes suiting all applications, from 2" to 24" diameter. Supplied in standard lengths up to 50 ft.

Triple Lock® Smoothcore® Construction - Twin Strip (2 ply) construction. The corrugated outer wall provides crush resistance during installation. The inner wall is smooth, permitting the smooth flow of flue gasses and impeding the build up of soot and other potentially corrosive residue. The inner and outer walls are joined by a **Triple Lock® Joint System**; acknowledged to be the best available for strength and longevity.

Approval - Z-Flex® Triple Lock® Chimney Liner

Systems are listed and labelled by Underwriters Laboratories to UL1777 and ULC S635, Chimney Lining Systems for existing Masonry and Factory Built Chimneys.

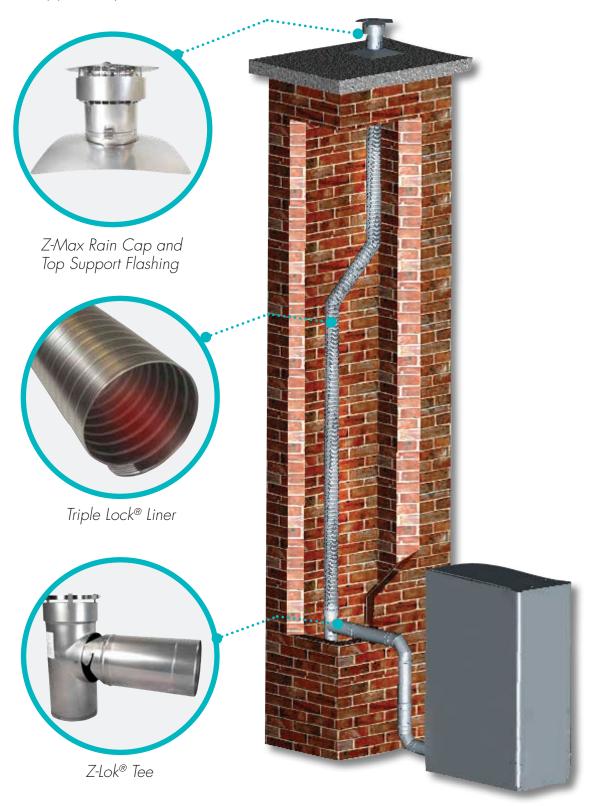

Warranty - Lifetime Limited Warranty.

When to Z-FLEX® a Chimney

- When a masonry chimney has no liner at all
- When damage to existing chimney lining is evident
- When retrofit appliance has fan-assisted combustion and is vented alone
- When additional or replacement equipment is installed or an appliance is converted to gas from another fuel
- When the existing chimney is oversized relative to heating requirement

Smoothcore® Triple Lock® Liner eliminates turbulence inherent with corrugated liners, improving draft. Resists corrosive attack by not impeding the flow of condensate down the liner. Less opportunity for soot to accumulate.

Z-FLEX® Stainless Steel Chimney Kits Everything you need to get the job done right

Triple Lock® Stainless Steel ALL FUEL APPLICATIONS

- Z-FLEX® Stainless Steel Chimney Liner Kits come complete with everything you need to quickly and easily install a professional venting system.
- Patented Airtight Triple Lock® Construction Ideal for use with gas, oil, pellets and wood. (For use with coal, see warranty). The patented Triple Lock® construction is tested and listed by U.L. Triple Lock® is accepted by industry as the strongest joint system available.
- Manufactured from special high temperature and acid 316Ti resistant stainless.
- **Z-FLEX**®'s specially designed corrugations provide excellent flexibility while maintaining superior crush strength. The result is a clearly superior product offering incredible longevity.

Lock N'Go Tee

Part No.: 2ZFTCB

Dia.:__

Dia.: 3" - 24"

Flex Ready Tee with Gear

Clamp Assembly

Dia.: 3" - 24"

Flex ready tool-less

connection.

4" Flex Ready Pellet Tee with 3" Branch

Part No.: 2ZPT43

Connects Z-Flex to solid fuel inserts where space is minimal.

Offset Adaptor 45°

Part No.: 2ZOA45

Dia.:

Dia.: 3" - 10"

Apply the right liner every time with Line Finder from **Z-FLEX®**. Gas and Oil Liner Finders make it fast and easy to match the right **Z-FLEX®** product and size to the liner application. The convenient "slide rule" design is simple to use, portable, and foolproof.

Triple Lock® Stainless Steel Flex Liner & Accessories ALL FUEL APPLICATIONS

Z-Max Deluxe Rain Cap & Flashing

Rain Cap: 2ZMRCS_ Flashing: 2AFCS_

Dia.:___

Dia.: 3" - 10"

Z-Max Rain Cap prevents moisture and debris entering the chimney. Pre-stressed base plate provides greater strength under snow load conditions. For use with flexible liner. Spark arrester meets California code.

Extension for Z-Max Raincap

Part No.: 2ZMEXT__

Dia.: 4" - 8"

12" or 18" extension

Dripless Type "C" Connector

Part No.: 2CNNTRC

Dia.:

Dia.: 3'' - 24''

Used to connect Z-FLEX® Liner to stove-pipe, fireplace insert or other liner component.

Insert Connector

Part No.: 2CNNI

Dia.:_

Dia.: 3" - 10"

Used to connect flexible liner to insert. Supplied with three tabs for ease connection to insert

from inside firebox.

*6" insert to 5" liner reducer available

Insulating Blanket w/Protective

Cloth Wrap & Gear Clamps

Part No.: 2INSKIT

Dia.:_ _ _ Sold in 5,10, 25 ft kits.

1, 2, 3, 4 ft lengths. Includes 2 gear clamps per 5' section. 1/4", 8lb. ceramic fiber insulation with high temperature protective cloth wrap. Resists damage during installation.

Nose Cone

Part No.: 2NCXXXX

Dia.:_

Dia.: 3" - 24"

To attach to liner, attach rope to cone and pull rope down chimney.

Stainless Steel Offset Box

Part No.: 2ZFOFFSET

6" only

Used to connect flex liner to insert. One piece design. 6" center to center offset.

Reducer

Reducer Part No:

2RD___ R___ X_ Available in 4"-3", 5"-4", 6"-5", 7"-6", 8"-6", 8"-7", 10"-8. Used to reduce the liner size to accommodate a range of flue sizes, appliances and installations.

Note flow direction.

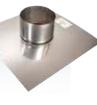

Stainless Steel **Chimney Flashing** Starter Collar 16" x 16" Base

Part No.: 2ZSCSXX

Dia.:__

Dia.: 3" - 24"

Used to cover chimney top opening.

Top Support

Part No.: 2ZTSXXX

Dia.:_

Dia.: 3" - 24"

For use with flex liner and

flashing.

Increaser

Increaser Part No.

Available diameters 3"-4", 4"-5", 5"-6", 6"-7", 6"-8", 7"-8", 8"-10".

Used to increase the liner size to accommodate a range of flue sizes, appliances and installations. Note flow direction.

2IN___ R__ X_

Female Adapter Rigid

Part No.: 2ZRBTA

Dia.:___ Dia.: 4" - 8"

Adapts male tee banch to male smoke pipe.

Stainless Steel **Self-Drilling Screws**

Part No.: 2SSSCREW

Aerocowl Flue Stabilizer

Aerocowl Flue Stabilizer is aerodynamically designed so that when fitted to structurally sound chimneys and flues, completely eliminates down-draft. Aerocowl prevents troublesome smoke and toxic fumes from circulating within the home.

Aerocowl built-in bleeding system reduces excessive fuel burning for all types of heating appliances whether solid fuel, oil, gas or wood-burning, resulting in significant savings in energy consumption.

Stainless Steel Aerocowl Round Base

Part No.: 2ARCORB

Dia.:_

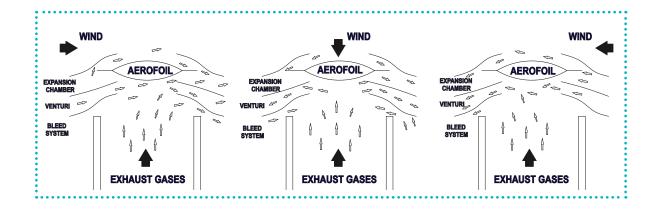

Dia.: 4", 5", 6", 7", 8", 10"

Part No.: 2ARCOWL_B

Dia.: 12", 18"

| Saves Fuel - Saves Money | After fitting an Aerocowl, testing found a minimum saving of 12% and in some cases up to 30%. | |
|--|--|--|
| Easily Installed | Simple installation. Just locate on to chimney, and secure. Available in three sizes to fit all domestic chimneys and flues. | |
| Doubles as a Rain Cap | Prevents rain, snow or sleet entering the chimney or flue. | |
| Reduces Condensation | Aerocowl improves ventilation and reduces condensation. | |
| Aesthetic Design | Aerodynamic design; blends in naturally with surroundings. | |
| Long Service Life Comprehensive Accelerated Corrosion Testing rates an average life expectancy of 12 | | |

Oval Liner System All Fuel Applications

DIRECT VENT System

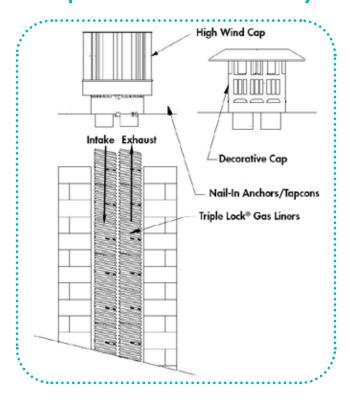

A Completely Sealed System that does not Compromise Indoor Air Quality

Designed for use when converting existing wood-burning fireplaces into gas fireplaces

In terms of safety, efficiency and versatility, Direct Vent fireplaces have several advantages over traditional fireplaces.

Using indoor air for combustion can de-pressurize the living space and potentially pull harmful flue gases back into the home. Direct Vent Systems use outdoor air instead of indoor air for combustion. Outside air is drawn in for combustion while flue gas is exhausted outside. The natural flow of heat creates a convection loop; as hot air exits the pipe, cooler, denser air is pulled back to the burner.

Direct Vent Insert Kits include: Two Triple Lock® Gas Liners for flue exhaust and outside combustion air, and either an extreme weather or decorative co-linear termination.

Decorative Kit

Direct Vent Co-Linear Flexible Liner Kit with Decorative Cap/ Flashing

includes:

- Chimney Liners (Exhaust and Intake)
- Decorative Cap/Flashing
- High Temperature RTV Sealant
- Self-Tapping Screws

Extreme Weather Kit

Direct Vent Co-Linear Flexible Liner Kit with Extreme Weather Cap/Flashing

includes:

- Chimney Liners (Exhaust and Intake)
- Extreme Weather Cap/Flashing
- High Temperature RTV Sealant
- Self-tapping Screws

Z-FLEX® Chimney Liner Systems

DIRECT VENT System

Safety - Direct Vent Systems exhaust all products of combustion outside maintaining higher indoor air quality. When fuel burns, releasing poisonous carbon monoxide becoming dangerous when exposed to it for too long and in high concentrations. Direct Vent flue Systems are completely sealed from the interior of the building, therefore no harmful flue gases are released into the living space.

Efficiency - Direct Vent Fireplace Systems burn natural gas or propane, unlike tradition fireplaces, converting most of the fuel to usable heat. They are completely sealed off from the interior rooms by a glass door, which prevents significant heat loss.

Quality - Z-Flex Triple Lock®, regarded as the strongest flexible duct construction method in the industry; provides piece of mind that flue gases are being safely vented outside the living space through continuous length flexible gas vent. In addition, computer added design and construction methods help produce aesthetically pleasing and efficient system components.

Versatility - Direct Vent Systems are easy to install.

Continuous length Triple Lock® Flexible Gas Vent provides only two connection points; Insert and Termination. The Flexible Venting is quickly and easily routed through straight or offset existing masonry chimneys. Extreme Weather and Decorative Terminations are available for any installation.

Safety Issues

Since the federal government required modern heating equipment to achieve higher efficiencies in 1992, safely venting them has become more of a challenge. Today's more efficient equipment produces lower flue gas temperatures than pre-1992 equipment. The low temperature flue gas provides little natural draft in chimneys and is more likely to condense into an acidic, and corrosive, solution. The result can cause property damage, personal injury, or death. The natural laws of physics that control this phenomenon pertain to all gas and oil fired equipment.

Our three major product lines; chimney liners, special gas vent (AL29-4C[®]* stainless steel), and flexible vent connectors are all designed to prevent flue gas condensation or protect against its corrosive effects. Most of the products **Z-FLEX**®

has developed are now recommended or required by the following national codes and testing agencies:

1992 National Fuel Gas Code

Venting Tables for sizing Chimney Liners and Vent Connectors when adding or replacing equipment. Insulated Connectors required in attics and other "cold" spaces.

1997 NFPA 31

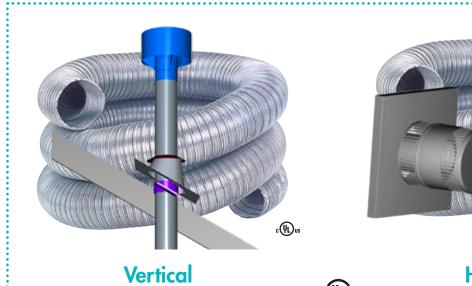

"Installation of Oil Burning Equipment" Venting Tables for sizing Chimney Liners.

International Approval Services (Formerly AGA) June, 1996 – IAS requires all Category III gas boilers and furnaces to use a UL 1738 approved vent system (as **Z-VENT®**). July, 1998 – IAS requires all Category III gas residential unit heaters to use a UL 1738 approved vent system(as **Z-VENT®**).

Coaxial FLEXIBLE Direct Vent Kits

- Z-Flex® DVK Kits are designed to ease gas burning fireplace or insert installations
- Allows for a completely sealed system that does not compromise indoor air quality
- Kit includes two TRIPLE LOCK® flexible vents, one for flue exhaust, the other for combustion air
- · Available in coaxial vertical extreme weather, horizontal round or square termination options

Horizontal

Model DVK-VX Coaxial Flexible Direct Vent Kit with Vertical Extreme Weather Termination Kit also includes:

Coaxial Flexible Vent Spacers & Supports Fire Stop/Insulation Shield Insulation Collar Rigid Pipe with Roof Support Flashing for 0° to 30° Pitched Roof Storm Collar/Support High Temperature Sealant Self-Drilling Screws Model DVK-HR
Coaxial Flexible Direct Vent Kit
with Horizontal ROUND

Z-FLEXThe Flexible Venting Solutions Specialist

Z-FLEX®, part of the Novaflex Group of companies, is the leading manufacturer of specialty venting systems for furnaces, boilers, water heaters, oil heaters, fireplaces, and more.

Z-FLEX® has been providing flexible answers to gas oil, pellet and wood venting applications since 1979. We have pioneered flexible chimney liner solutions and special gas vent (AL 29-4C®).* A variety of innovations in materials and construction have led to products that deliver:

- Superior performance and increased efficiency
- Easier handling and faster, simpler installation
- Greater reliability, safety and increased service life

To that, we add responsive customer service and expert technical support.

The NovaFlex Group® is a privately held company committed to continuous advancement in venting, HVAC, hose and connector solutions. NovaFlex® has one of the broadest product ranges available in the hose and ducting marketplace as well as in the HVAC, Industrial Venting and Hose Industries and in Commercial Exhaust Venting Systems.

*AL 29-4C® is a registered trademark of Allegheny Ludlum Corp.
